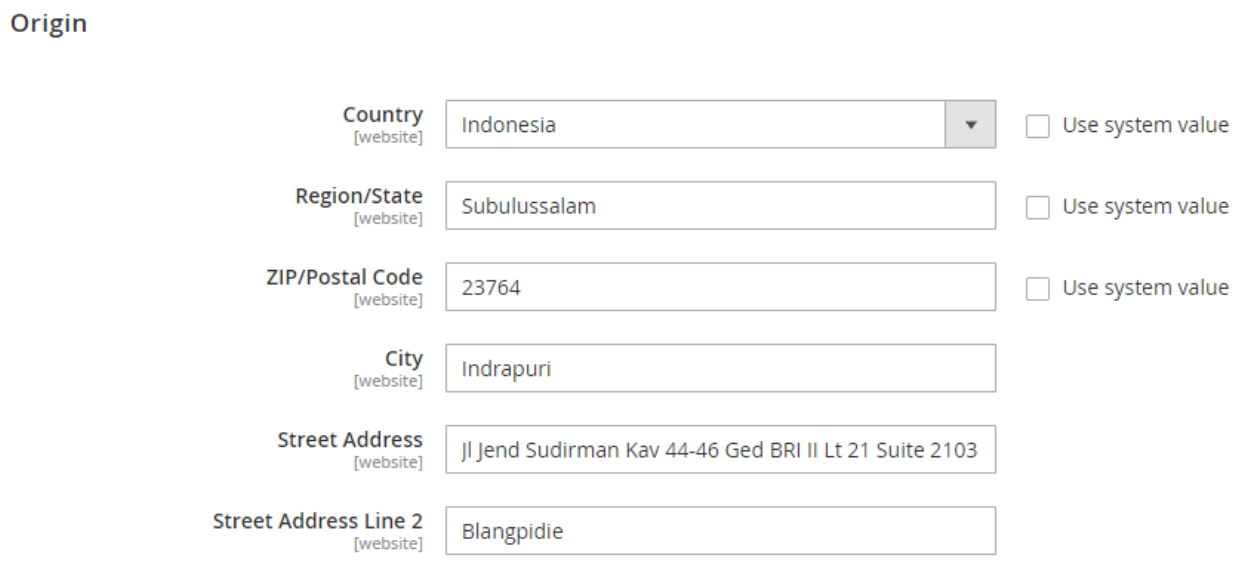
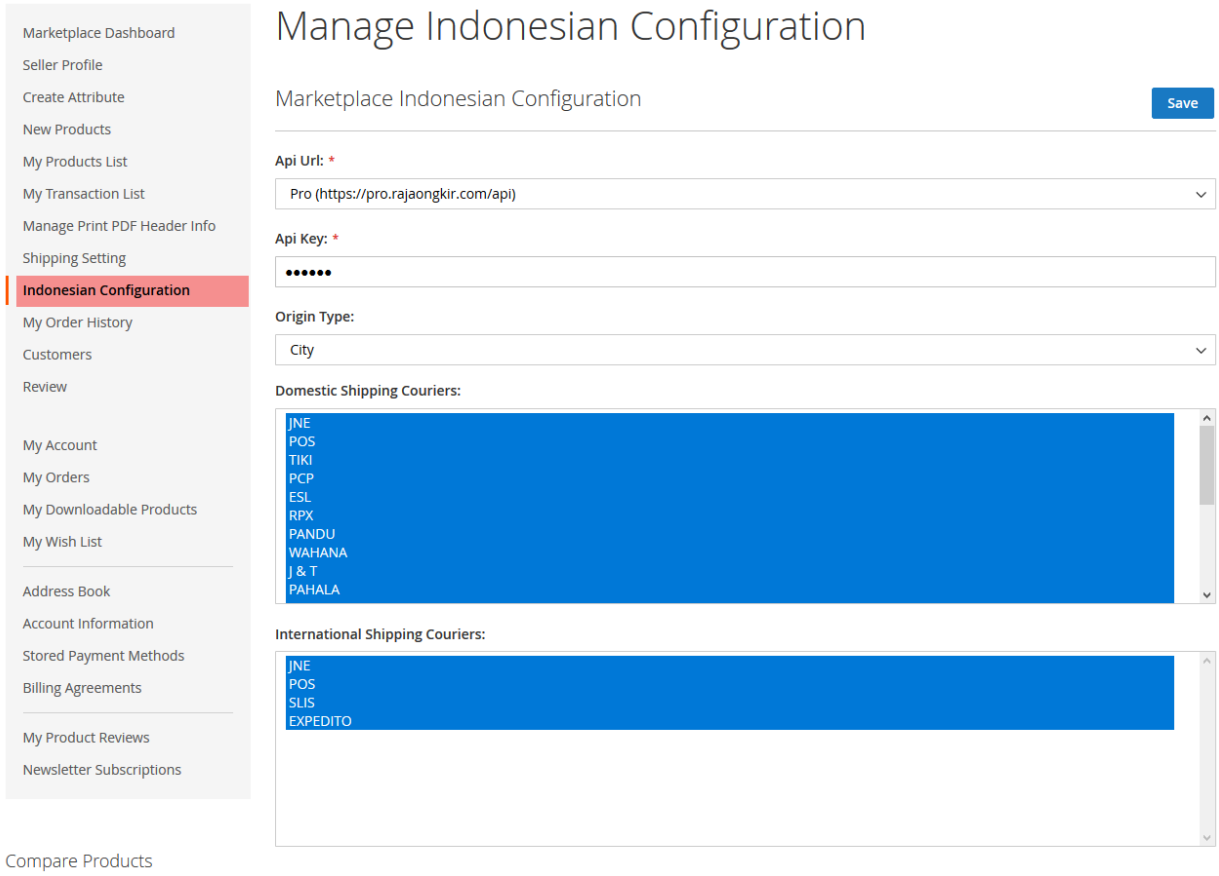
Shipping Setting

Under this section, the admin will set up his **store origin** by navigating through **Stores->Configuration->Sales->Shipping Settings**.



Seller's End – Shipping Configuration

After the successful installation of the extension, the seller will navigate to the menu option **Indonesian Configuration**.



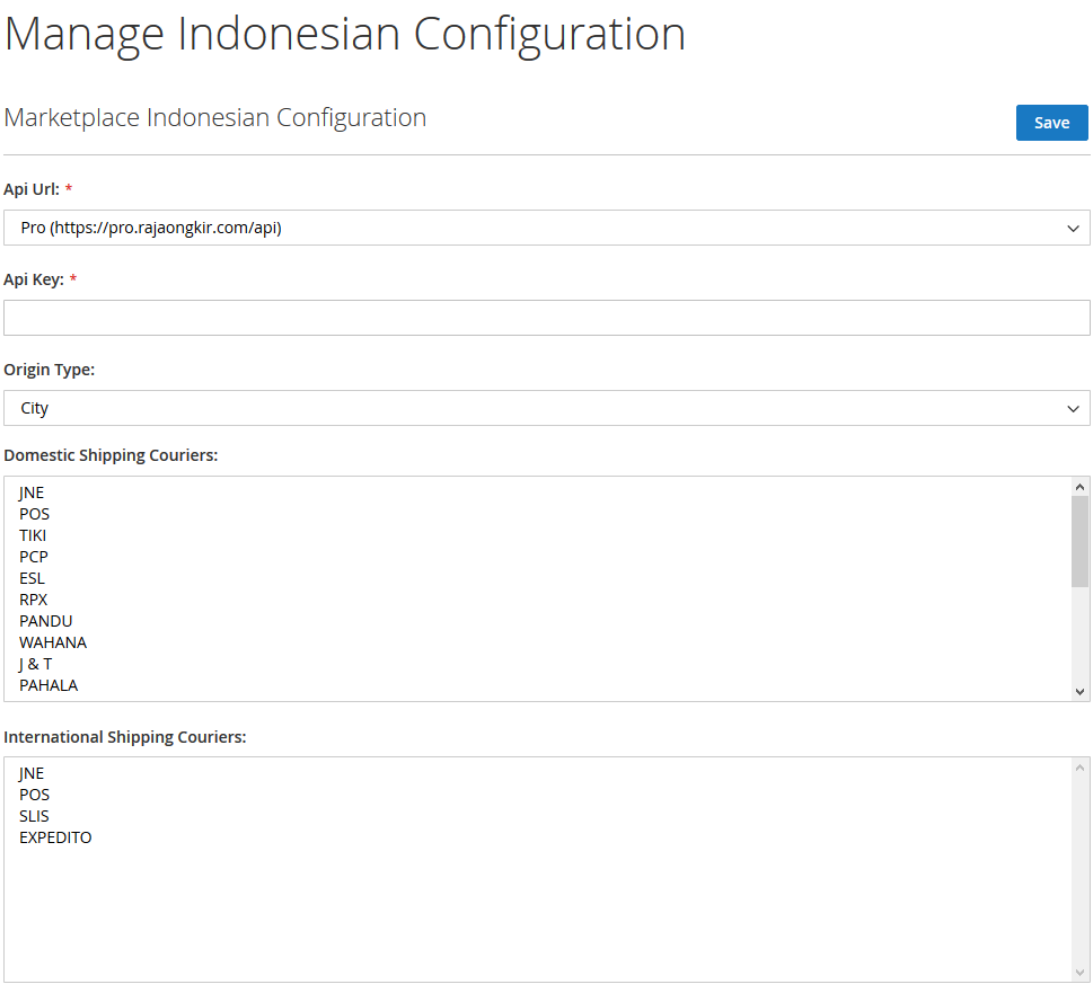
Here, the seller will –

- Select respective **API URL** from the drop-down option

- Here, the seller will get the **Starter Pack** in the **API URL** by **default**. To choose any **other URL** select the respective **API URL** from the drop down option.
    - **Starter** – It includes only one domestic shipping service that is **JNE**.

    - **Basic** – It includes **Starter Pack** features + Get an **International Courier service**.

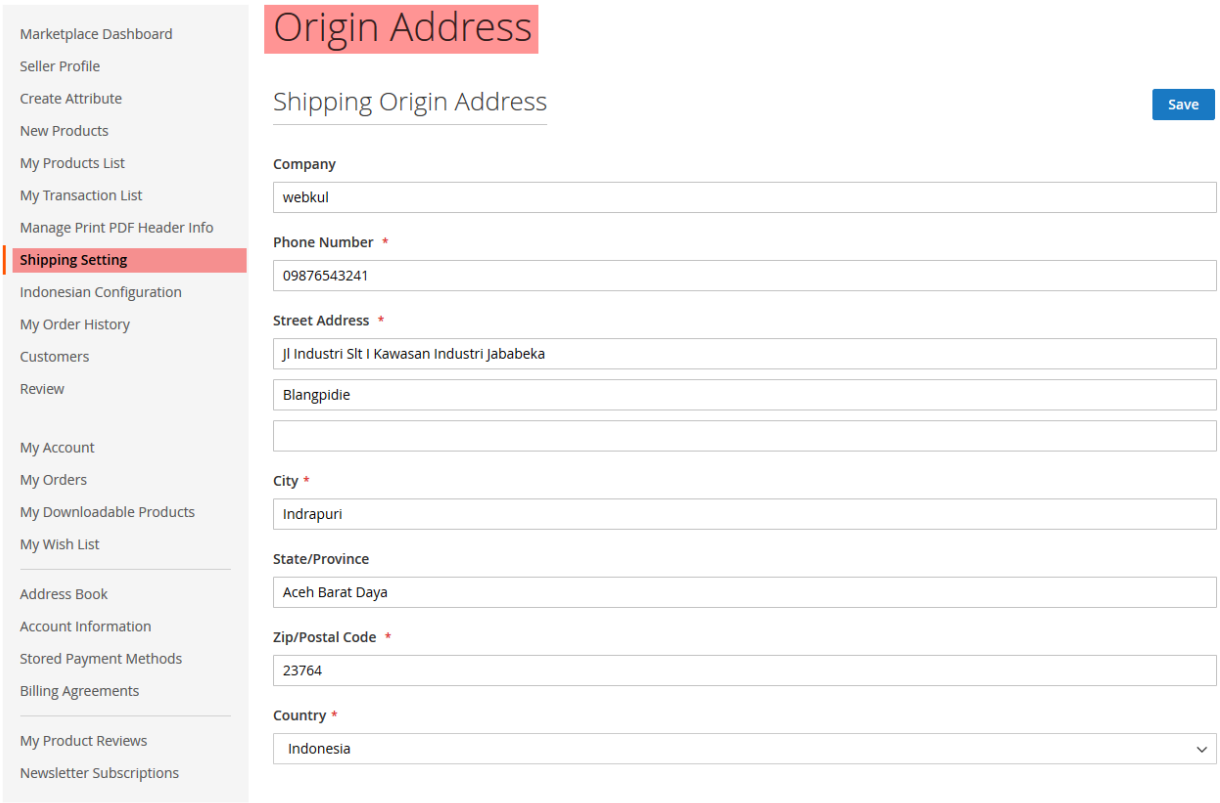
    - **Pro** – It includes **Starter Pack + Basic Pack +** Get the option of **choosing** the **city** and **sub districts** for shipping under the Origin Type(**Only in Pro**) option.



- **Enter** the **API key** for the selected **API URL**.
- Select the **Origin Type** as – **City** or **Sub District** as required
- Select the **Domestic Shipping** carriers
- Select the **International Shipping** carriers

Shipping Setting

After configuring the Indonesia Shipping, the seller will navigate to the **Shipping Settings** section to set up their **origin**.



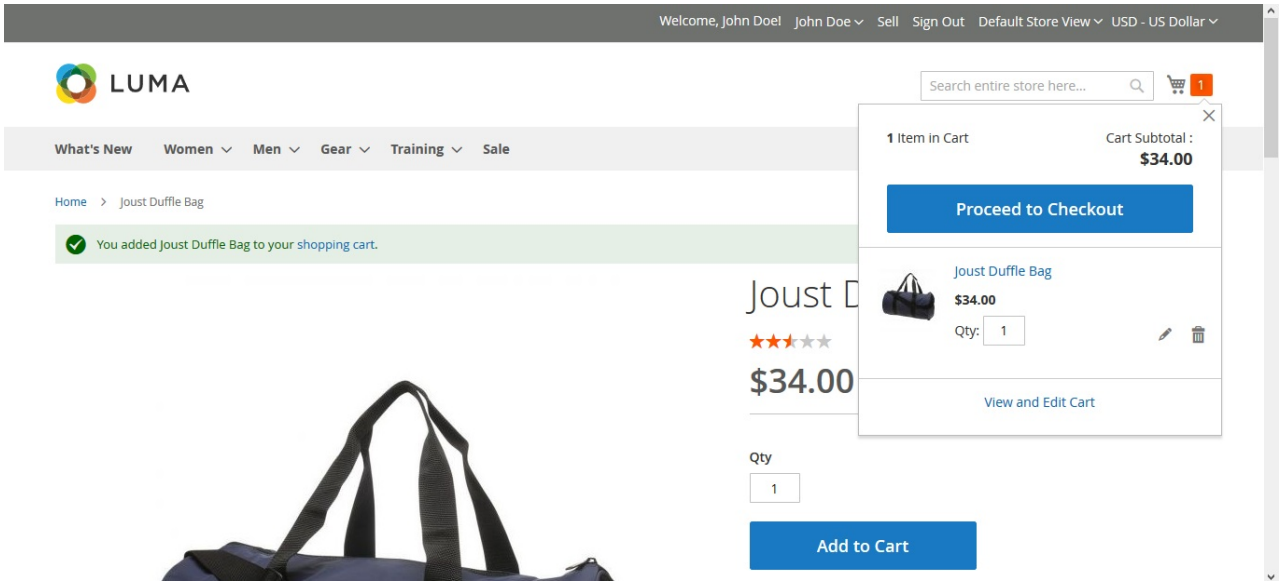
Here, the seller will –

- Enter his **Company** name
- Enter the **Phone** number
- Enter the **Street Address**
- Enter the **City**
- Enter the respective **State/Province**
- Enter the **Zip Code** of your location
- Select the **Country**

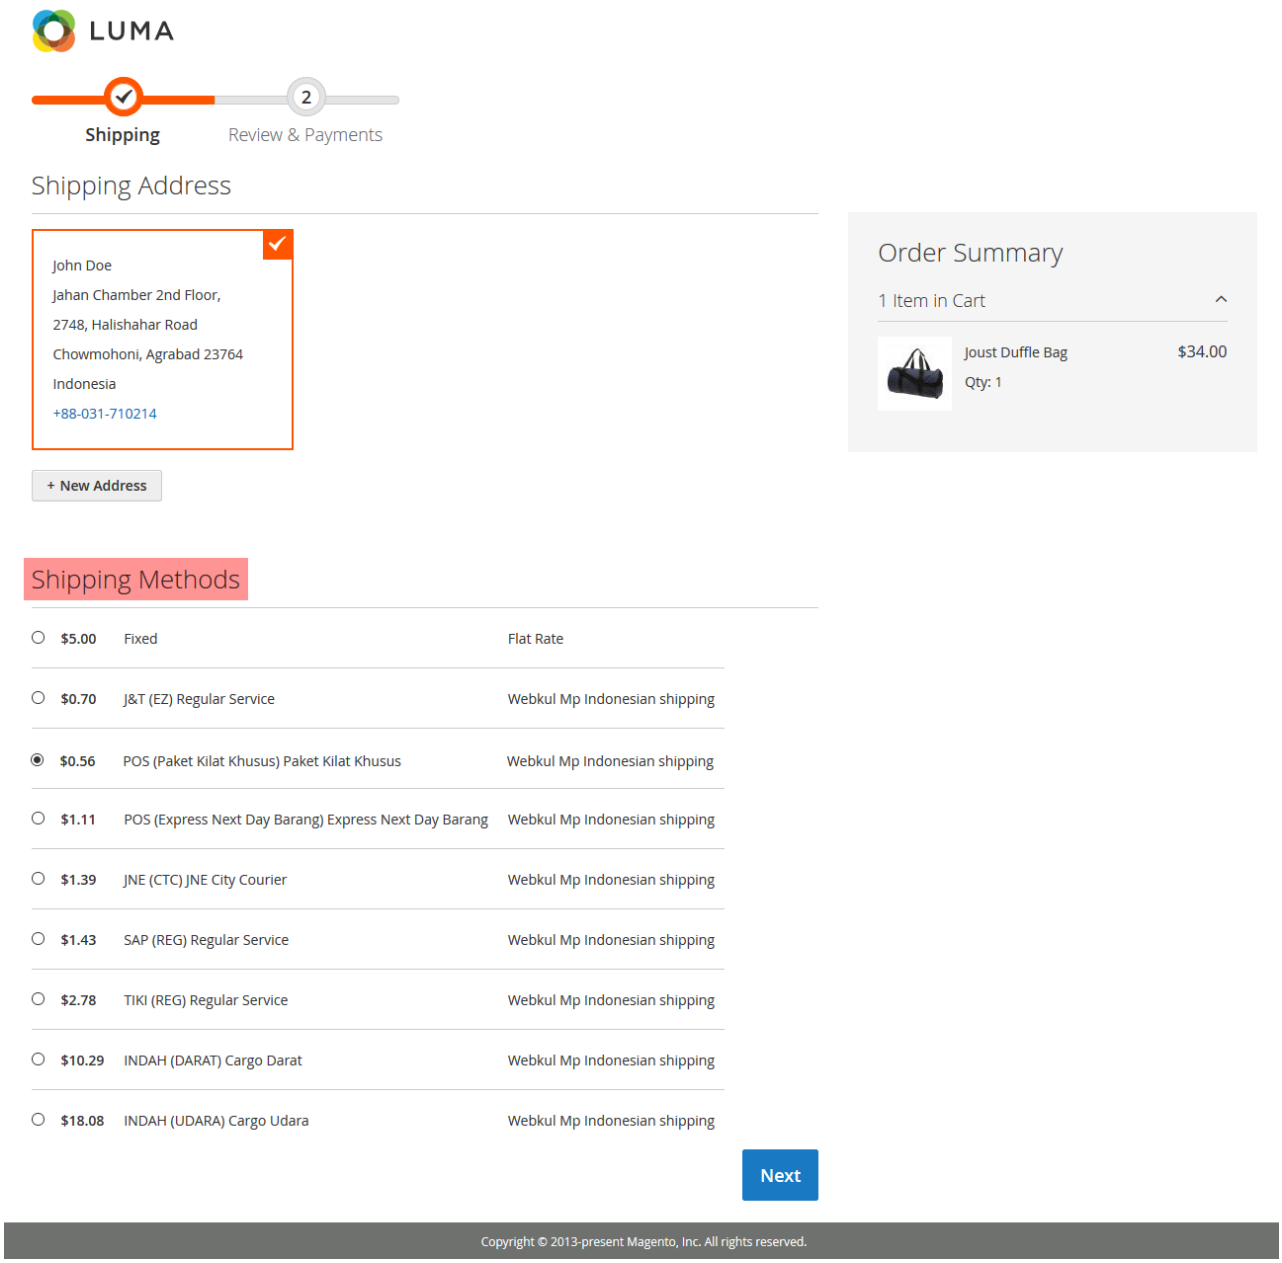
Lastly, tap the **Save** button to save the **Origin** settings for the seller.

Customer's End – Workflow

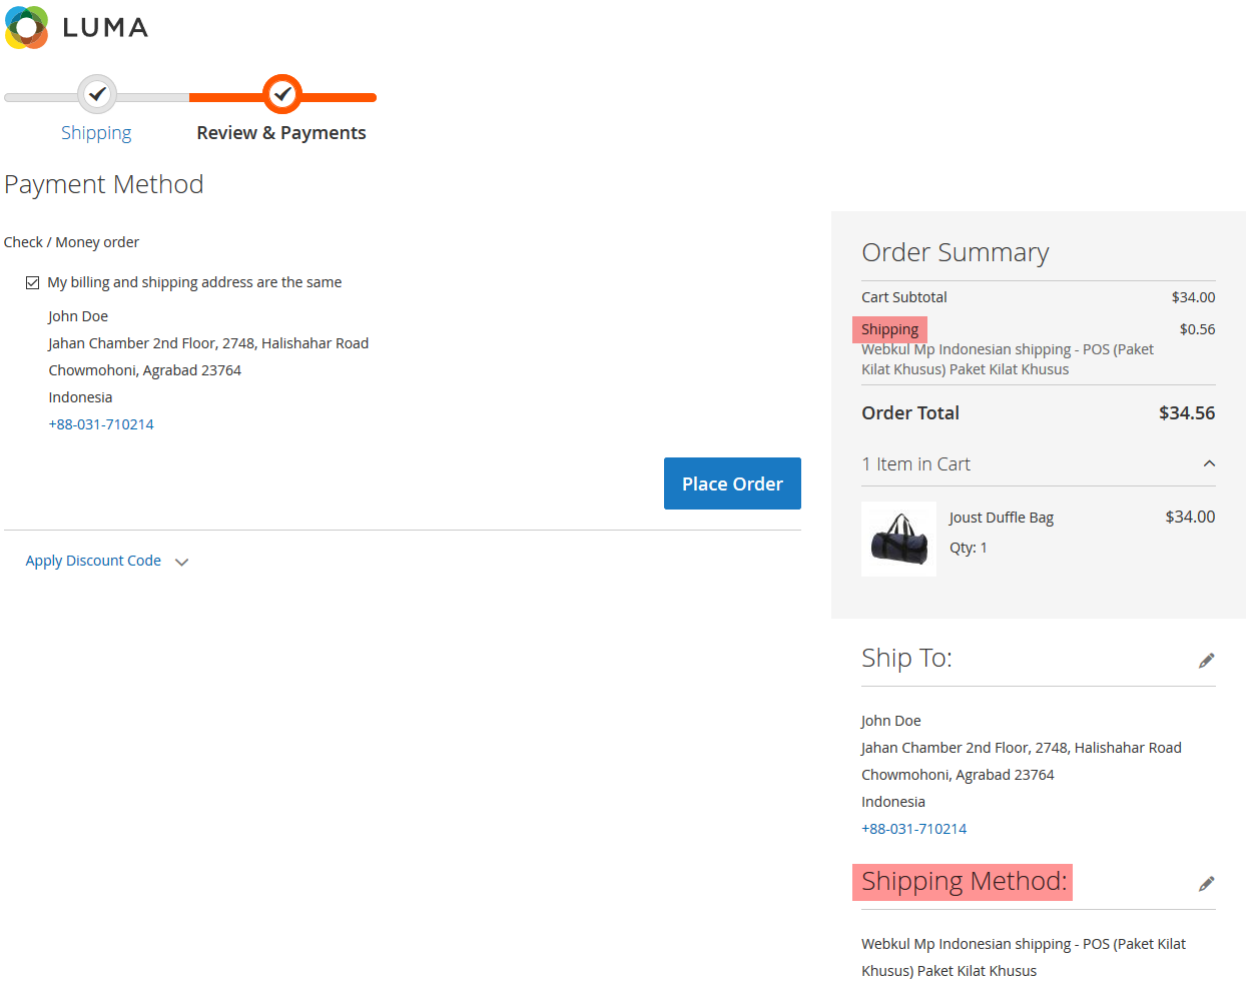
From the store frontend, the customer will add the product into the cart and **tap** the **Proceed to Checkout** button to proceed further.



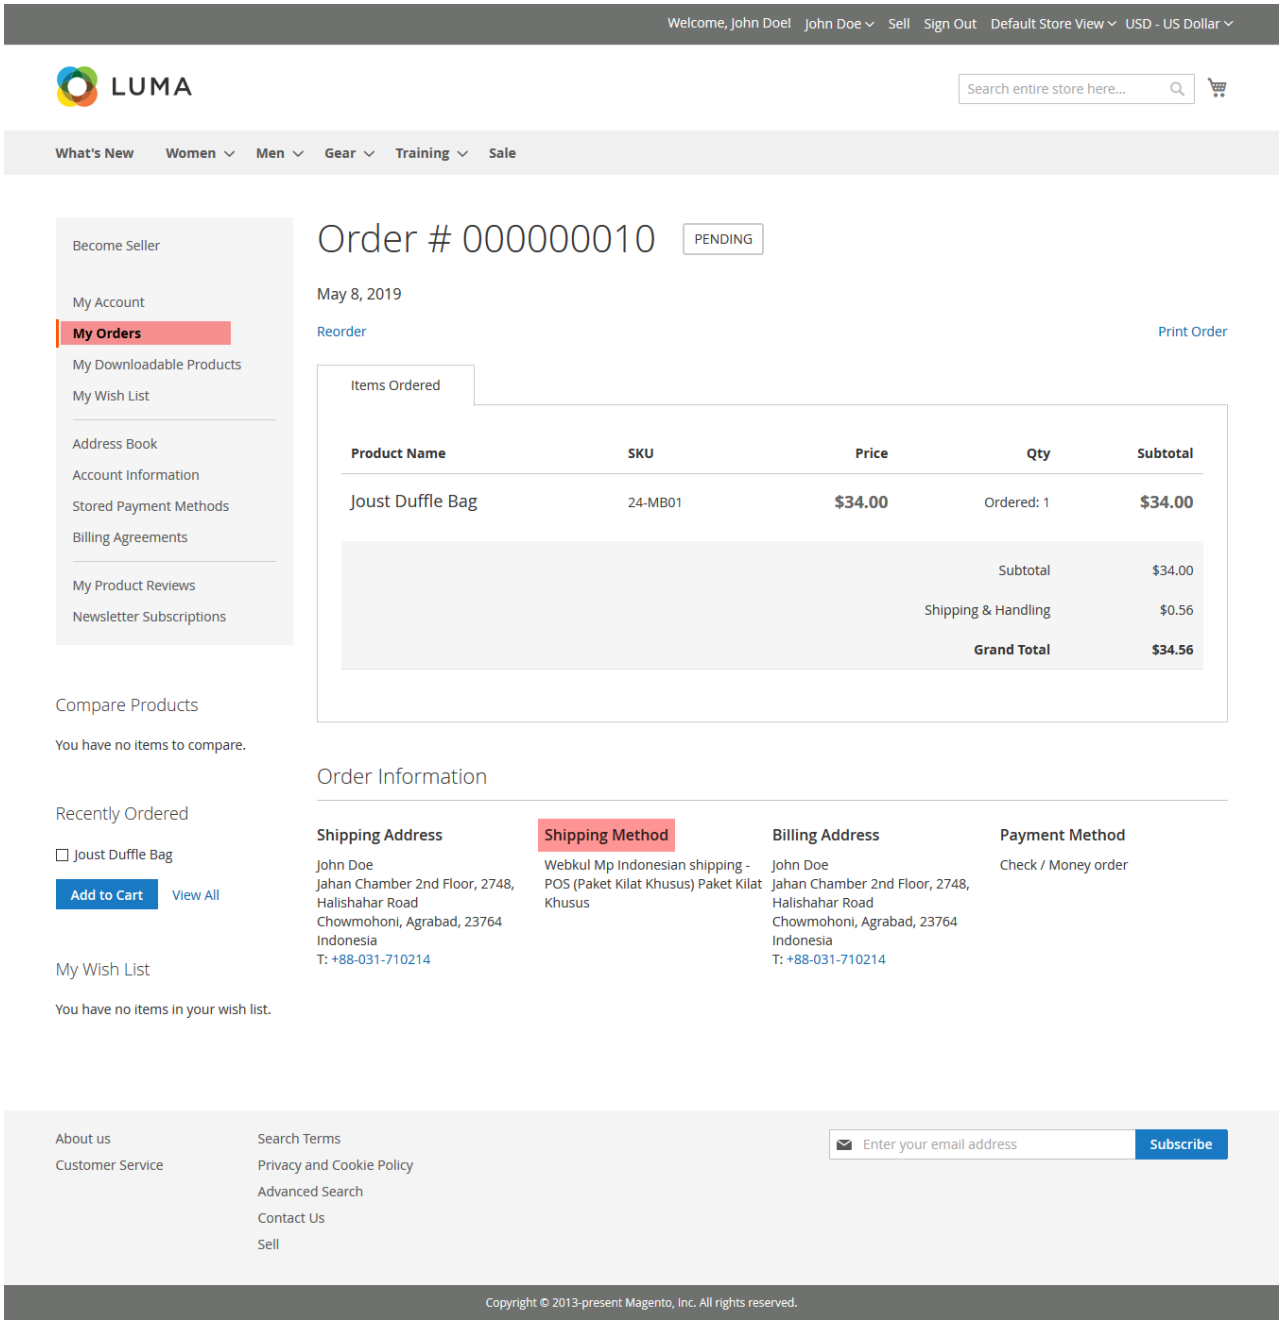
This brings up the section to select the shipping method. Here, the customer can **select** a **shipping method** and tap the **Next** button.



After this, the customer can see the **order summary** along with the **selected shipping** method**.** Here, the customer can tap the **Place Order** button to **complete** the purchase.

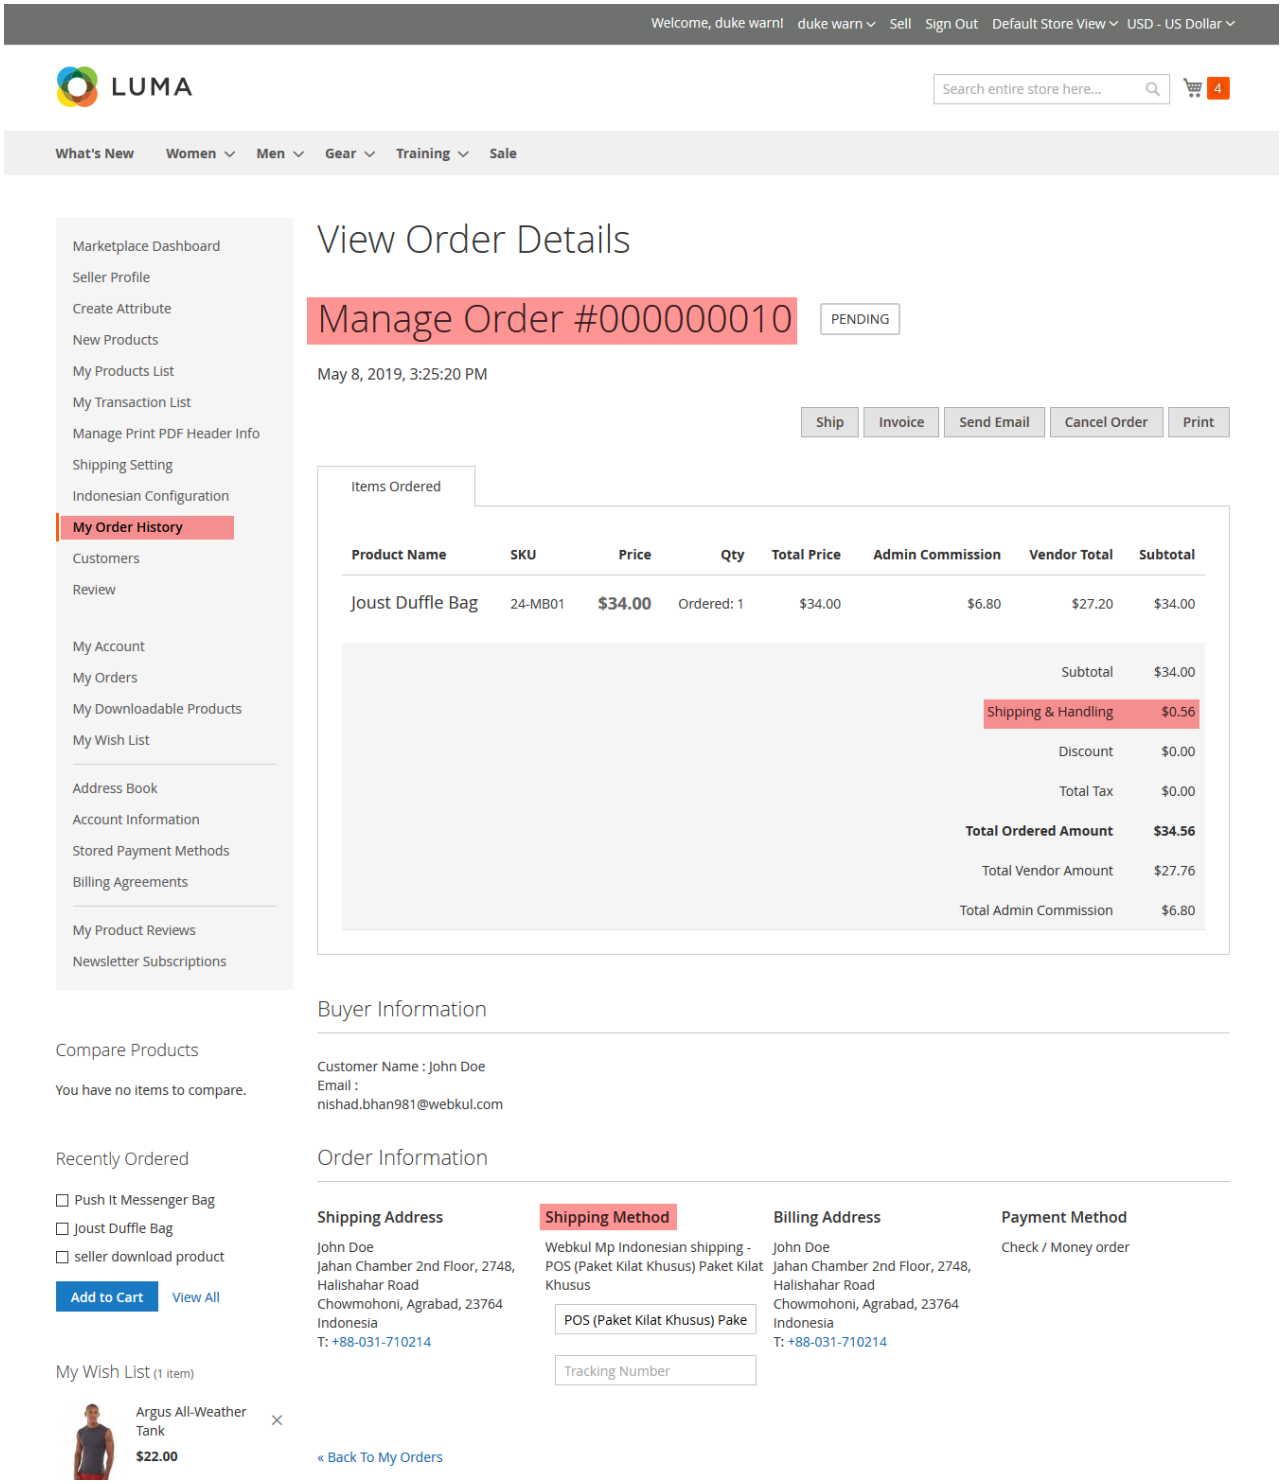


After placing a successful order, the customer can check the **order details** under **My Orders** section. Here, the customer can see the selected shipping carrier for the order.

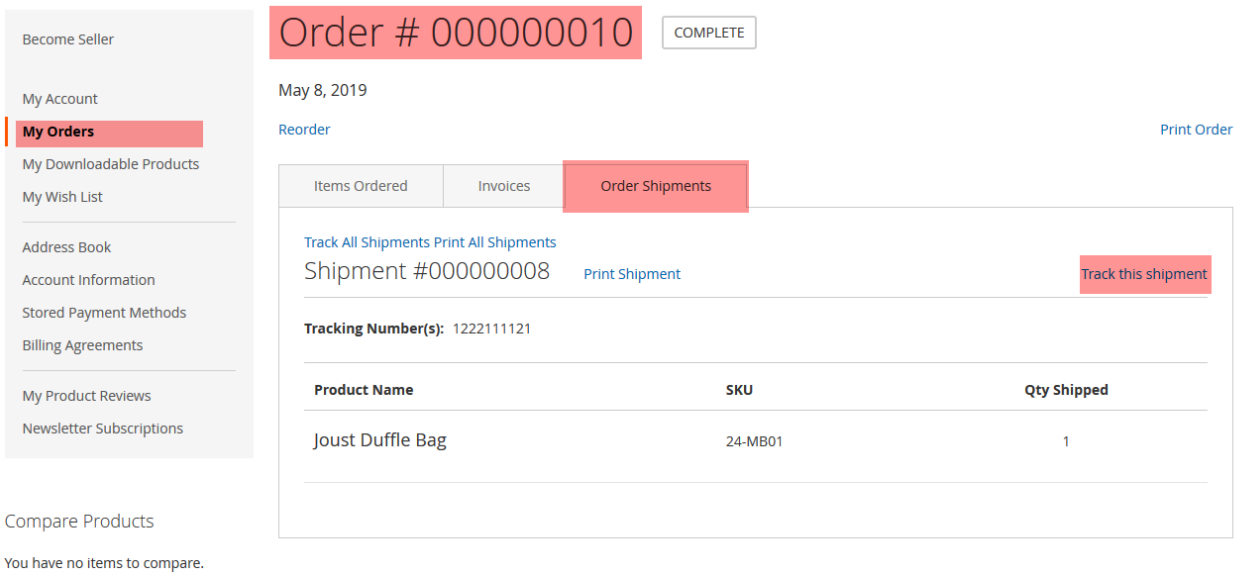


Seller's End – Management

The seller will navigate to **My Order History** menu option under the marketplace block to check the orders placed for his products.



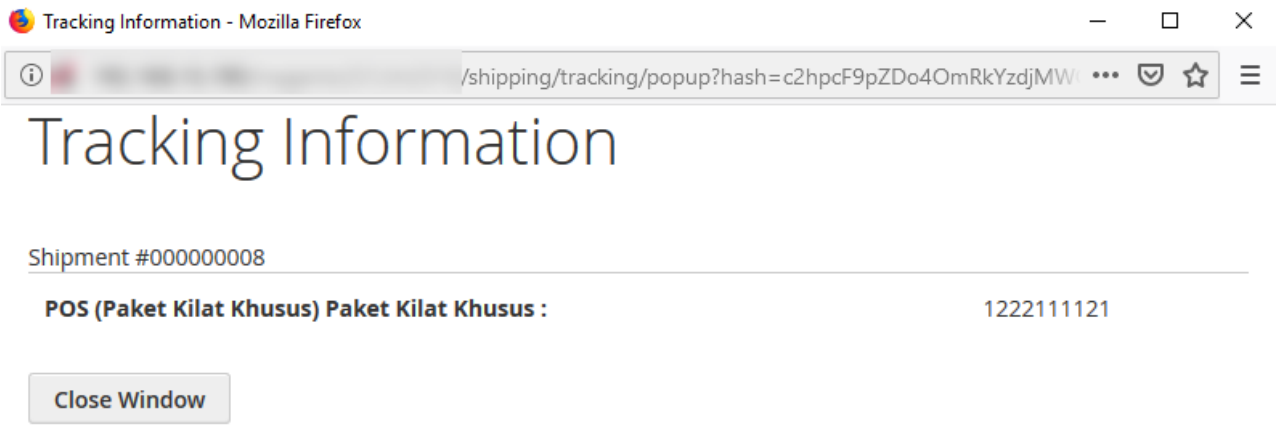
Here, the seller will be able to check the shipping method selected by the customer. Apart from that, the seller can **manage** the order by generating the **invoice**, enter the **tracking number** and tap the **Ship** button for generating the shipment and sending the **tracking number to the customer**.



***Note**:

1. The merchant(Admin/Seller) will have to manually send the shipment using the same courier service provider that the customer had selected while placing the order.
2. After receiving the tracking number, the merchant(Admin/Seller) can add the tracking details while creating the shipment for the particular order.

The customer can tap the **Track this Shipment** link which opens up a popup with the **tracking** details of the respective order.



That was all about the **RajaOngkir Indonesian Shipping Marketplace Add-On** extension. Still have any doubts or queries regarding the extension get back to us at support@webkul.com or create a ticket at our HelpDesk system.
