
PRODUCTS SOLD COUNTER

User Guide
Version 1.0

How to Configure the Extension:

At the backend, go to **Addify EXTENSIONS > Addify Sold Counter > Configurations**. Here you will have access to the following configurations:

General Settings:

Enable Extension:

Select Yes or No to enable or disable extension respectively. If extension is disabled, one cannot view or change either mode from backend and will be redirected to store's main page.

The screenshot shows a configuration field for 'Enable Extension'. On the left, the text 'Enabeld' is displayed with '[store view]' underneath it. To the right is a dropdown menu with 'Yes' selected and a downward arrow icon.

Display Type:

Choose which type of sale quantity you want to show on your storefront. There are three type of display type

1. **OnSite Order Quantity:** Show only your web store order quantity
2. **OffSite Order Quantity:** Show Only off-site order quantity
3. **OffSite + OnSite Order quantity:** show both onsite and offsite order quantity

The screenshot shows a configuration field for 'Display Type'. On the left, the text 'Display' is displayed with '[store view]' underneath it. To the right is a dropdown menu with 'On Site + Off Site (Order)' selected and a downward arrow icon. Below the dropdown, the text 'Display Sold Type' is visible.

Product Page Settings:

1. Enable Extension:

Select Yes or No to enable or disable for sales counter each product page respectively. If product is disabled, It will be not shown on product page.

Note: You must have to enable sold counter on product grid or product form admin panel too.

2. Sale Label: It will be used and label with order quantity.

Note: If you have set product label for product then extension will use that label.
