

Adyen Magento 2 payments Plugin

Built in-house to enable great customer experiences and global growth

Give customers the right payment methods and expand into any market with one quick integration.

One integration, all of Adyen

Leverage the full power of Adyen's platform and gather data from multiple touchpoints. Through the plugin you'll get our industry-leading checkout, fraud protection, and conversion optimization out of the box.

Great Customer experience

Create a consistent experience across all sales channels with one integration. Get a complete view of your businesses, with data from the entire payment flow, enabling you to increase payment success rates, block fraud, and reward loyal shoppers.

Built in-house

Magento and Adyen are fully synchronised meaning dedicated support from our local in-house Adyen engineers. Scale your business with an agile integration which is also flexible to your needs if you wish to customise.

Global growth

The only payment platform that lets you handle online, mobile, and in-store payments in one product connecting you to all relevant key payment methods. Accept local payment methods, including all major cards, mobile wallets like Apple Pay and WeChat Pay, and many more.

Key Plugin Features

Geared for growth:

- Data-driven payment optimization
- Real-time fraud prevention
- Accept all key payment methods: credit cards, e-wallets, stored and local payment methods like Visa, Mastercard, WeChat Pay, Alipay, Apple Pay, and Google Pay™

Better customer experiences:

- Offer one click payments
- Native 3D Secure 2 authentication
- Optimised UX checkouts

Operational excellence & security

- Unified cross-channel reporting
- Manage Adyen payments from the Magento admin panel
- Automated risk with manual review options
- 24/7 Adyen platform support in local languages
- Adyen hosted PCI compliance
