

# Special Service Extensions

Created by Unknown User (malynow) on Oct 14, 2016

AW\_All, AW\_Core and AW\_Lib are special service extensions that come as a part of every Aheadworks extension package distributed via [ecommerce.aheadworks.com](http://ecommerce.aheadworks.com). These service extensions help Aheadworks products run smoothly on all Magento stores, both Community and Enterprise editions. Service extensions introduce additional set of libraries that expand functionality of Aheadworks extensions for Magento and help these run at full potential. Most of the extensions require only AW\_All service extension installed, whereas other may require two or three installed simultaneously.

Packages of Aheadworks extensions available at Magento Marketplace come without service extensions and require manual installation of service extensions using Magento Connect manager. This is a limitation of Magento Connect Manager, that allows only a single extension installed at a time. Before installing an extension purchased from Magento Marketplace, make sure to install all the service extensions listed in bold before extension description.

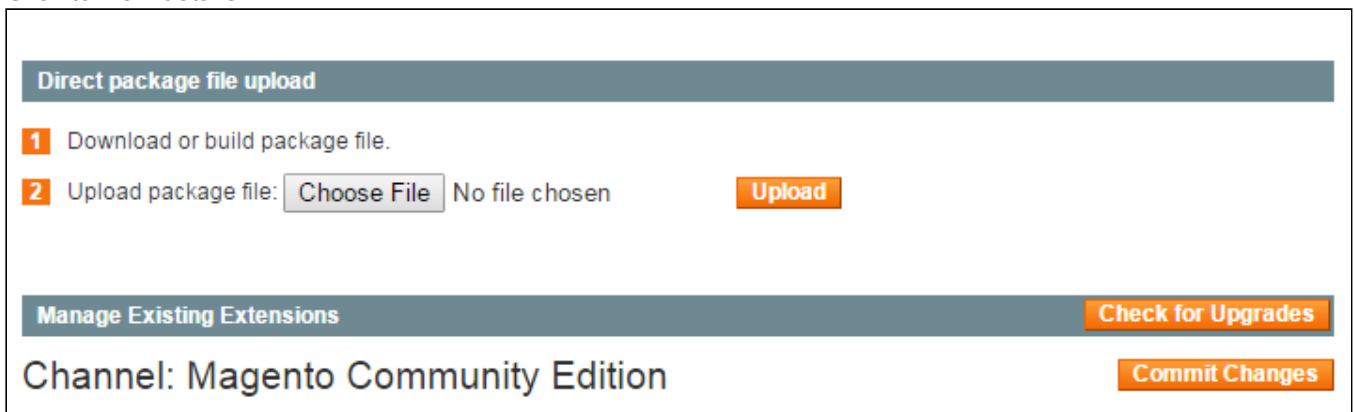

## Installation

1. Download required special service extensions by the links below:

- AW\_All
- AW\_Core
- AW\_Lib

2. Log in to the Magento backend and navigate to **System > Magento Connect > Magento Connect Manager**

3. Upload special service extension in the **Direct package file upload** section of Magento Connect Manager  
[Click to view details](#)

- Click  button, and show the extension package downloaded;
- Click  button to install special service extension to your store.

4. Make sure the service extension is installed successfully in the frame at the bottom of the page  
[Click to view details](#)

In the extension has been installed successfully you should see a similar message:

```
 Auto-scroll console contents
Package installed:
community AW_All 2.3.8
Cleaning cache
...
Cache cleaned successfully
```

Make sure to install all the required service extensions before proceeding with installation of purchased extension.

5. You can now proceed with installation of the Aheadworks extension purchased.
