Introducing Bambora APAC Payment for Magento 2

Magento 2 Bambora APAC Payment implements the Bambora payment method into any Magento store and provides the services for users from the APAC region. The extension allows processing payments secure and fast thanks to the PCI compliance and the SOAP API connection. All the credit card data inserted during checkout are kept solely in Bambora servers and are available

Compatibility: Magento Open Source 2.2.X — 2.3.X, Magento Commerce 2.2.X — 2.3.X

Bambora APAC Payment for Magento 2 is a payment method tool aimed at providing high-level security and increased user-friendliness. As you can see in the title the service is available only for APAC users.

What is special in Aheadworks Bambora APAC for Magento 2 in comparison to similar extensions:

- Improvements in code structure;
- Full PCI Standard compliance;
- SOAP API request processing via Bambora WSDL;
- Magento 2 Vault support;
- Integrated into [Magento 2 Advanced Subscription Products](#).

Configuring Magento 2 Bambora APAC

Extension Settings

To configure the extension follow **Stores > Configuration > Sales > Payment Methods > Aheadworks Bambora APAC**.

Access

Setting up starts with **enabling the payment gateway**.

The title field shows the payment method name that **will be displayed during the checkout**.

The environment can be selected between **sandbox and production**. The first option allows you to test the payment method with the help of test credit card data, the second one implements the actual functionality to your store.

The following boxes are filled with the Bambora account credentials:

- **Account Number;**
- **Live API Username;**
- **Live API Password;**
- **Sandbox API Username;**
- **Sandbox API Password;**
- **Merchant ID** (the Custom Checkout Merchant ID/Merchant GUID for the second level of authentication. It will be provided to you with the rest of the info as part of the Bambora sign up process).

The screenshot shows the configuration page for 'Aheadworks Bambora APAC'. On the left is a sidebar menu with categories: Shipping Settings, Multishipping Settings, Shipping Methods, Google API, Payment Methods (highlighted), Fraud Protection, Ingenico ePayments, and three expandable sections: ENGAGEMENT CLOUD, SERVICES, and ADVANCED. The main content area is titled 'Aheadworks Bambora APAC' and contains the following fields:

- Enabled** [website]: Yes (dropdown)
- Title** [store view]: Credit Card (Aheadworks Bambora APAC)
- Environment** [website]: Sandbox (dropdown)
- Account Number** [website]: (empty field)
Enter Account Number only if provided by Bambora.
- Live API Username** [website]: (empty field)
- Live API Password** [website]: (empty field)
- Sandbox API Username** [website]: (masked with dots)
- Sandbox API Password** [website]: (masked with dots)
- Merchant ID** [website]: (empty field)

Magento 2 Vault

Magento 2 Vault can be enabled in the same setting section and gives you the ability to save customer credit data and provide it to them for use for later purchases.

The screenshot shows two configuration fields for 'Vault':

- Vault Enabled** [website]: Yes (dropdown)
- Vault Title** [website]: Stored Cards (Aheadworks Bambora APAC)

Payments

The debug functionality - if enabled - will include some transaction info into logs.

The Payment Action allows you to select the type of payment processing between the 'authorize' and 'authorize and capture'.

Payment from Applicable or Specific Countries - let you restrict some countries from using the Bambora checkout.

Credit card types supported by the payment method can be specified in the corresponding field.

The Sort Order option indicates the position of the method among others at the checkout page.

The screenshot displays the configuration settings for the Bambora payment method. The settings are organized into several sections:

- Debug** [website]: A dropdown menu set to "Yes".
- Payment Action** [website]: A dropdown menu set to "Authorize".
- Payment From Applicable Countries** [website]: A dropdown menu set to "All Allowed Countries".
- Payment From Specific Countries** [website]: A scrollable list containing "Afghanistan", "Albania", and "Argentina".
- Credit Card Types** [website]: A scrollable list containing "American Express", "Visa", "MasterCard", "Discover", "JCB", "Diners", and "Maestro International".
- Sort Order** [website]: A text input field containing the number "1".

Checkout View

Bambora APAC for Magento 2 is integrated into the native Magento 2 checkout functionality and represents a design that all the Magento 2 users are familiar with.
