

# Custom Static Blocks

## Installation manual

To install the extension follow the instructions below:

- Backup your web directory and store database
- Get the Custom Static Blocks name and version in your Marketplace account:  
Login to Magento Marketplace with the username and password you used to purchase the Custom Static Blocks extension;
- Enter the My Purchases section: **Your name (top-right corner of the page) > My Profile > My Purchases;**
- Find Custom Static Blocks and click **Technical details.**
- Copy the provided component name and version in order to update your composer.json file.

**Note:** We advise you to use the latest version of our extension.

- Update your composer.json file:
- Open the root Magento directory on your server and send Composer the following command:

```
Composer require <custom_static_blocks:<version>
```

- At the Composer request, enter your Magento marketplace credentials (public key - username, private key - password).
- Make sure that Composer finished the installation without errors.
- Flush store cache, log out and log in the backend again.

The Custom Static Blocks extension is now installed and ready for work.

Use Magento [Dev Docs](#) for more details.
