Getting Around

Order Success Page for Magento 2 makes order success page highly-customizable via adding additional blocks, basing on customer segment or and order details. The content of the order success page is managed by the rules configured in the backend. Also, the module allows displaying cross-sells, checkout registration and newsletter signup blocks, and the links to the pages in social networks.

Compatibility: Magento Open Source 2.2.X – 2.3.X, Magento Commerce 2.2.X – 2.3.X

Extension Logic

The Order Success Page extension adds its own blocks to the native Magento Order Success Page. The blocks can be divided into two types: Standard (see General Settings section) and Rule-based (see Rule section). Standard blocks are always displayed for all customers, while rule-based are shown only if the order complies rule settings.

Tracking codes

Because the extension uses the native page as a base, all tracking codes you may have on that page should continue working as they did before the installation.

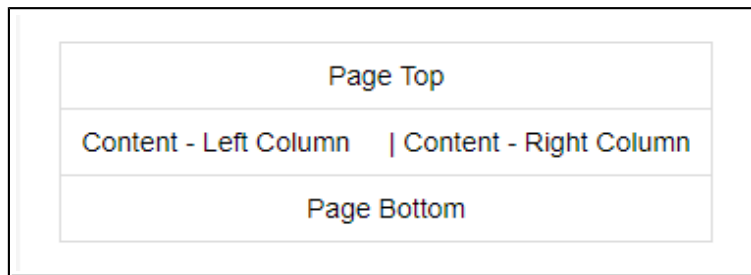

Layout

The extension has 4 main blocks positions:

- Page Top
- Page Bottom
- Content - Left Column
- Content - Right Column

Some blocks like “Order Summary” and “Cross-Sell” can only be set to Page Top or Page Bottom positions, because of their size.

By default, the blocks are placed the following way:

As you can see, if you would like to use a single-column layout, you can use only Page Top and Page Bottom positions.

To set a particular order of the Blocks, use the Priority field. This setting respects the layout position, so it is very easy to set the right order in every position of the page.

Backend Configuration

General Settings

- **Title of the success page** is an h1 tag, the main title of the page;
- **Text below the page title** is an optional text you may want to display. With the settings above, you will get the following result:

The screenshot shows a success page layout. At the top, there is a large heading 'Thanks for your order!' in a blue font. Below it is a subtitle 'We will take care of your order very soon.' in a smaller blue font. A red banner with white text 'CUSTOMIZABLE PAGE TITLE AND SUBTITLE' is overlaid on the page. Below the banner, the text 'Your order # is: 0000000...' is visible. At the bottom, there is a line of text: 'We'll email you an order confirmation with details and tracking info.'

- **Print Receipt For Guests** controls whether guests can print their order Receipt from the Order Success Page or not;
- **Preview Order Success Page** button allows quickly previewing any changes on the page.

Note, because the preview button uses an actual order data, make sure that you've got at least one order placed in the store view which you want to preview.

Order Summary

Order Summary

Enable Block
[store view] Yes

Position
[store view] Page Top

Sort Order
[store view] 10

Shipping Information
[store view] Yes

Billing Information
[store view] Yes

Expand Order Items List By Default
[store view] Yes

- Enable Block to place the Order Summary block to the Order Success Page;
- Position to choose between top and bottom positions of this block;
- Sort Order to assign the block priority;
- Shipping Information to add the shipping details to this block;
- Billing Information to enable the billing data displaying;
- Expand Order Items List By Default to allow/disallow this option.

Contacts

Contacts

Enable Block
[store view] Yes

Position
[store view] Content - Right Column

Sort Order
[store view] 20

Name
[store view] Contacts

Short Description
[store view] Made a mistake with an order? Contact us and we'll take care!

- **Enable Block** to place the Contacts block to the Order Success Page;
- **Position** to choose between top/bottom/left/right positions of this block;
- **Sort Order** to assign the block priority;
- **Name** to customize the title of this block;
- **Short Description** to create the text message relevant to your intends.

Note that while this block is intended for showing a link to your 'Contact us' page, generally, you can use it for any purpose, when you just need to show some text to all of your customers.

Customer Registration

Checkout Registration

Enable Block
[store view] Yes

Rules

General Information

Find the Rules section following the path Content-> Order Success Page by Aheadworks -> Rules. Here you can see a standard grid with the list of the rules. The rules can be filtered and enabled/disabled/deleted in bulk.

Enable Rule Yes

Name * Rule 1

Description Static Block

Visible for admin only

Store View * All Store Views
Main Website
Main Website Store
Default Store View

Customer Group * NOT LOGGED IN
General
Wholesale
Retailer

Active From 11/28/2018

Active To 11/30/2018

- **Enable Rule** to make the rule active;
- **Name the Rule** to easily find and manage the rules created;
- **Description** contains a summary of the rule functionality;
- **Store View** is a scope of application of the rule created;

- **Customer Group** includes different customer segments for you to choose;
- **Active From / Active To** options allow scheduling the rule duration.

Rule setup examples

Each rule can display one of the following block types:

- **Text / Html** - a basic type of the block; the content is configured right in the rule, in the WYSIWYG editor;
- **Static block** - a static block created beforehand in Content-> Elements-> Blocks;
- **FAQ Category** - a list of articles from a selected FAQ category. Requires [FAQ extension by Aheadworks](#) to be installed.
- **Blog Category** - a list of blog posts from a selected Blog category. Requires [Blog extension by Aheadworks](#) to be installed.

a) If you want to add a static block
