For more details see the [Customer Group Catalog](#) extension page.

Customer Group Catalog for Magento 2

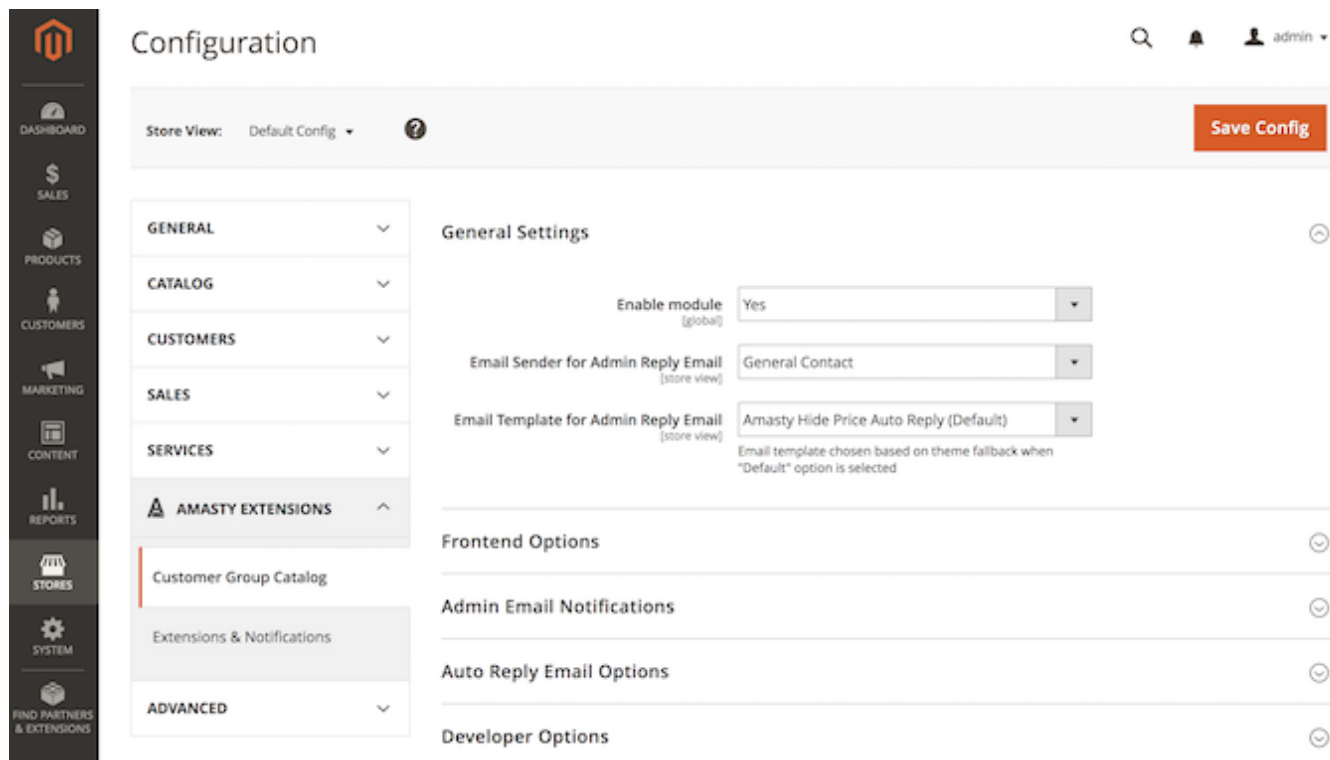

Adjust your selling strategy. Hide or replace the price block on category and product pages to motivate visitors to perform certain actions. With the Customer Group Catalog extension, you can provide customers with the get a quote form instead of the price or restrict access to particular products and categories for groups of customers.

- Configure the visibility of products and categories
- Provide customer groups with selective access to store catalog
- Hide or replace product price with CMS-block or image
- Redirect users to custom CMS-pages or to 404 page
- Hide the 'Add to cart', 'Add to wish list', and 'Add to compare' buttons

Extension Configuration

To configure the extension go to **Store → Configuration → Amasty Extensions → Customer Group Catalog**

General Settings

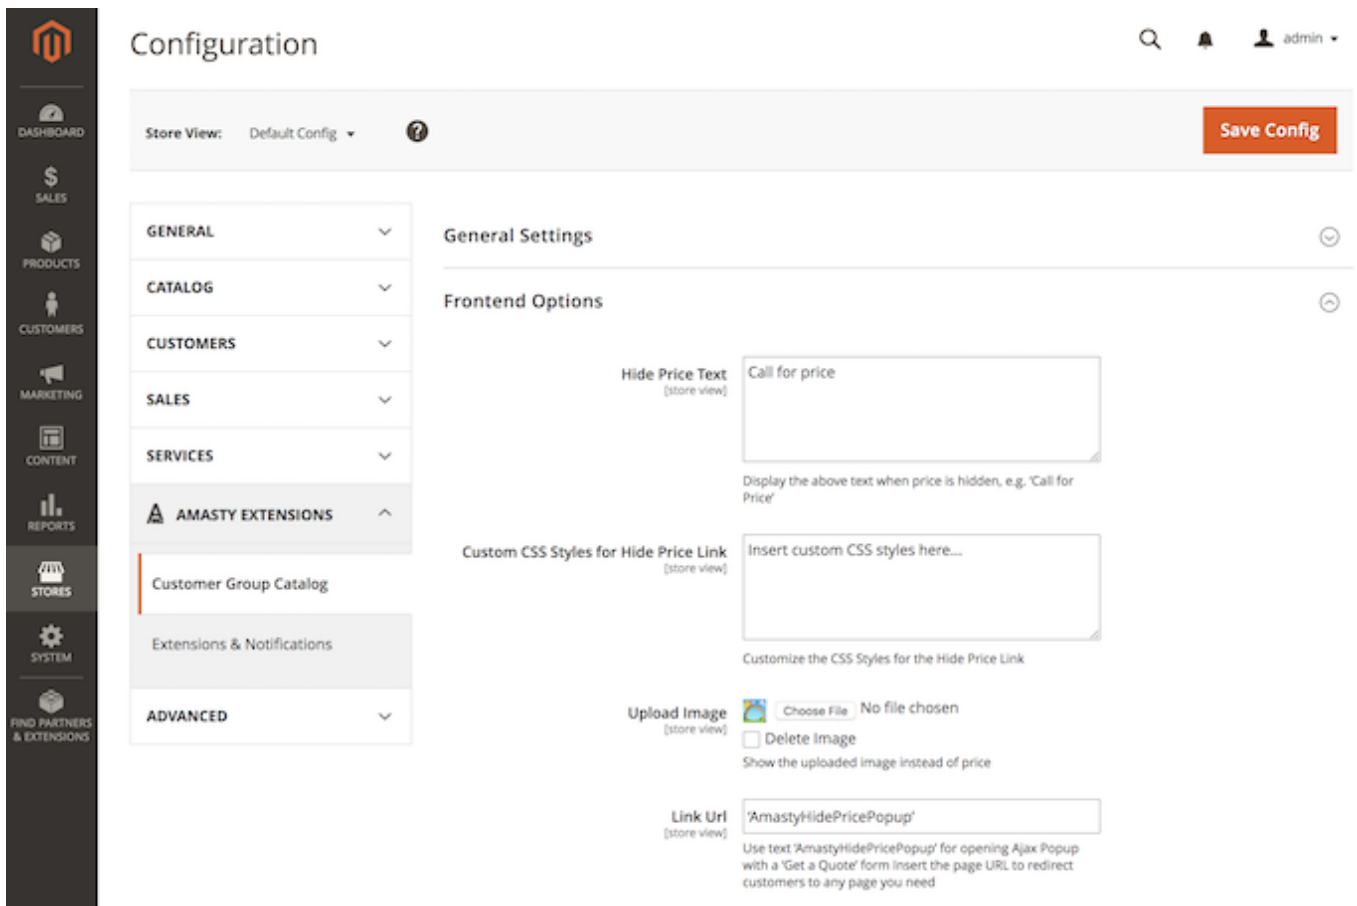

Enable Module — modify this option to enable or disable the module;

Email Sender for Admin Reply Email — specify the email sender for admin's replies;

Email Template for Admin Reply Email — define the email template for admin's replies.

Frontend Options

Hide Price Text — fill in the text to display instead of price;

Custom CSS Styles for Hide Price Link — customize CSS styles when using a link instead of price;

Upload Image — select and upload an image to replace price;

Link URL — specify URL to redirect visitors to any address or use *AmastyHidePricePopup* to show the **Get a Quote** form.

Admin Email Notifications

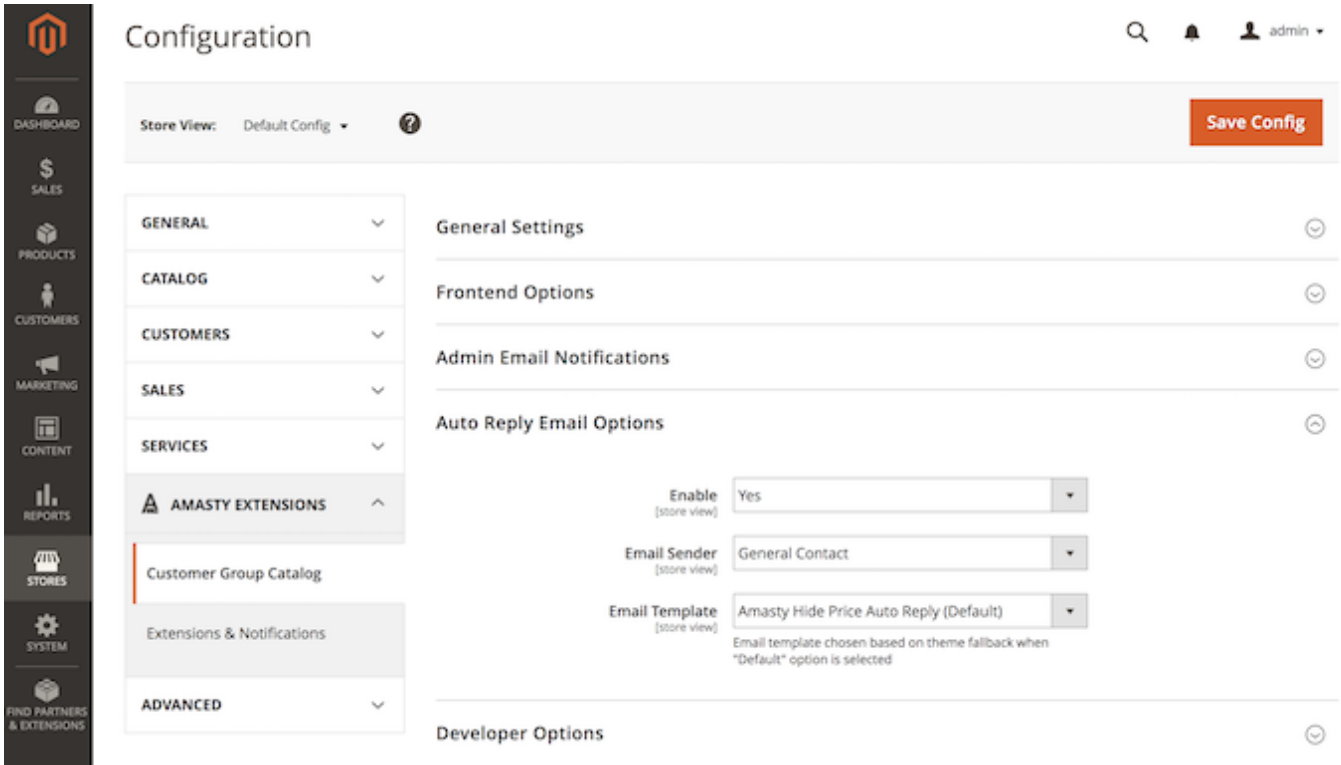

The screenshot shows the Magento 2 Configuration interface. On the left is a vertical sidebar with navigation icons for Dashboard, Sales, Products, Customers, Marketing, Content, Reports, Stores, System, and Find Partners & Extensions. The main area is titled 'Configuration' and shows the 'Store View' set to 'Default Config'. A 'Save Config' button is in the top right. The configuration is organized into sections: General Settings, Frontend Options, Admin Email Notifications, Auto Reply Email Options, and Developer Options. The 'Admin Email Notifications' section is expanded, showing three fields: 'Send Email to' (with the value 'admin@example.com'), 'Email Sender' (with the value 'General Contact'), and 'Email Template' (with the value 'Amasty Hide Price Admin Notification (Defal...').

Send Email to — fill in the email to enable notifications about new quotes or leave this field empty to disable notifications;

Email Sender — specify the email sender for admin's notifications;

Email Template — define the email template for admin's notifications.

Auto Reply Email Options

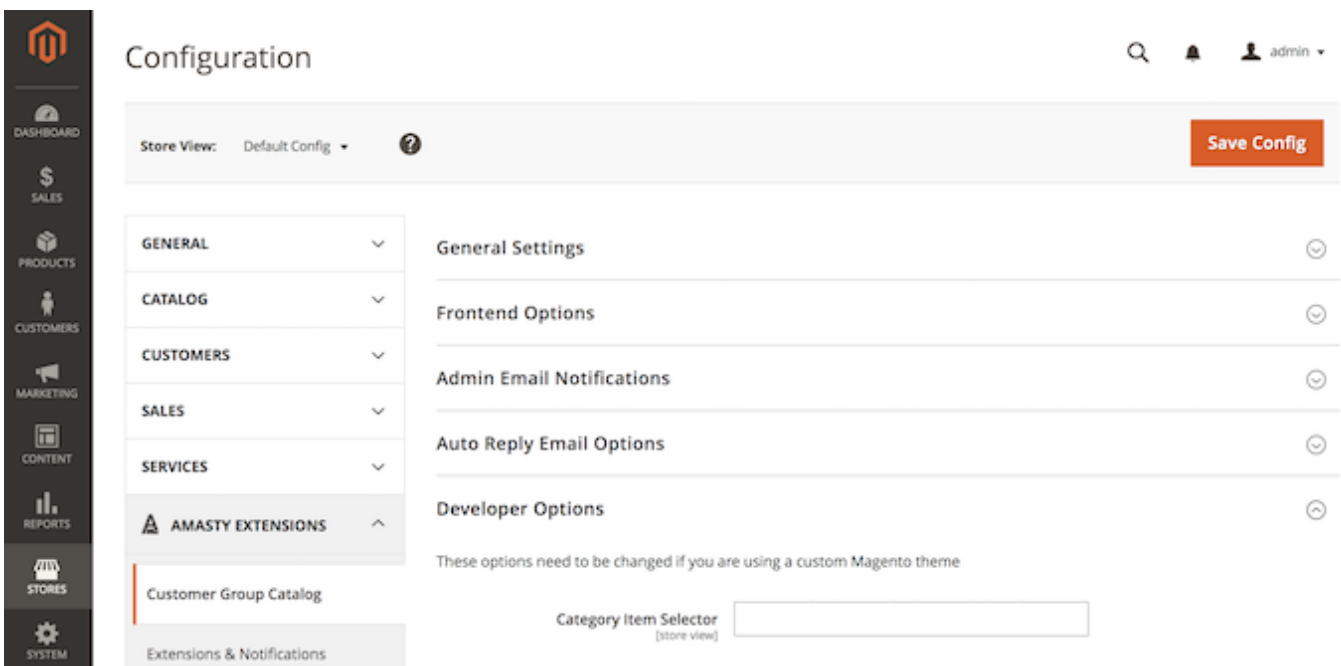

Enable — enable or disable automatic replies to quotes from the customers;

Email Sender — specify the email sender for automatic replies;

Email Template — define the email template for automatic replies.

Developer Options

Category Item Selector — use this option to set the category item selector when a custom Magento

theme is activated.

Creating a New Rule

To create a new rule, go to **Customers → Rules** and click the **Add New Rule** button.

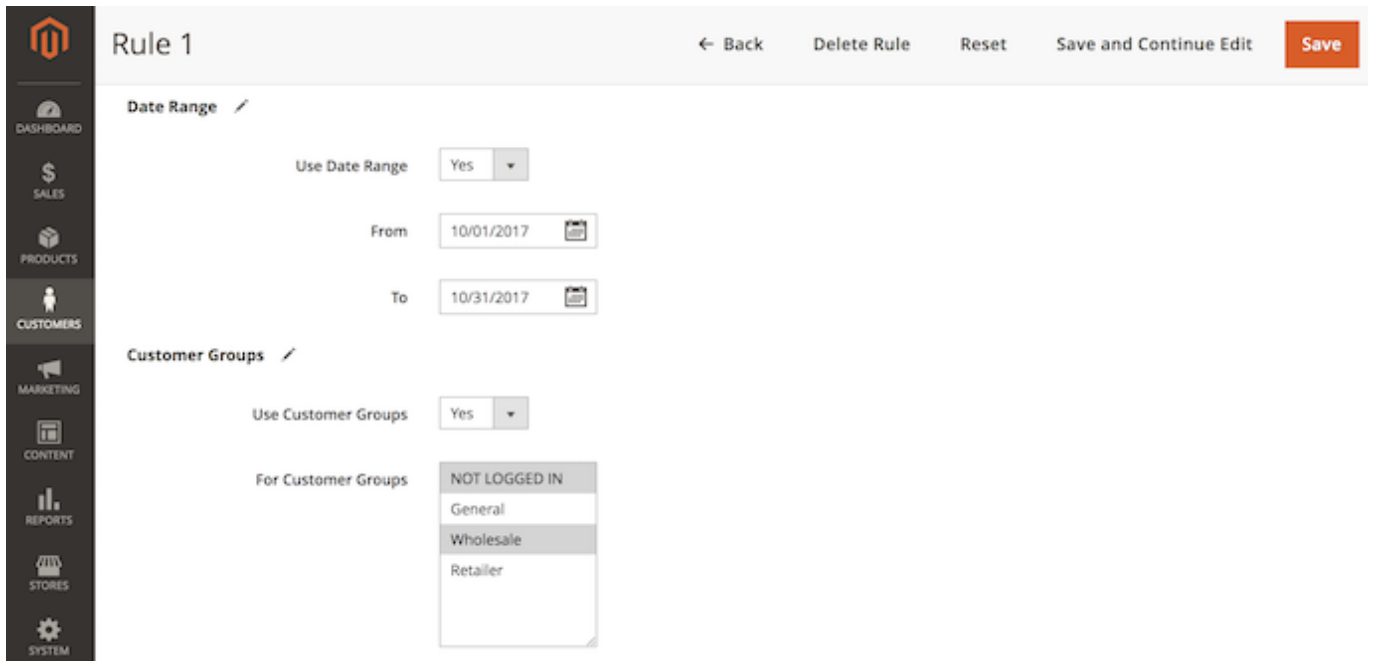

Then, you will have to configure the following options:

Status — choose **Active** or **Inactive** to enable or disable the rule;

Rule Name — fill in the name of the rule;

Stores — select store views to apply the rule to;

Rule Priority — define the rule priority when applying several rules at the same time;

Use Date Range — enable this option to set the time range when the rule will be active;

Use Customer Groups — enable this option to apply the rule to specific customer groups;

For Customer Groups — select the required customer groups.

Customer Conditions

Customer Conditions (Please mind these conditions are applied only for logged in customers)

If ALL of these conditions are TRUE :

Gender is Female ❌

Associate to Website is Main Website ❌

Here you can create conditions that your customers should meet to have access to price, product or category pages, etc.

Combine various customer attributes to set customer conditions.

The conditions are applied only for logged in customers.

Categories

- Default Category
- Gear
- Collections
- Training
- Men
- Women
- Promotions
- Sale
- What's New

Done

Category Access Restriction — restrict access to selected categories. Add categories by choosing them from the dropdown menu or remove them by hitting the cross icon.

Additional Filtering Options

Additional filtering options

Stock Status

Price Range

Use Price Range

By Price

From Price

To Price

Stock Status — configure this option to take stock status into consideration when applying the rule:

- Does not matter;
- Out of stock;
- In stock.

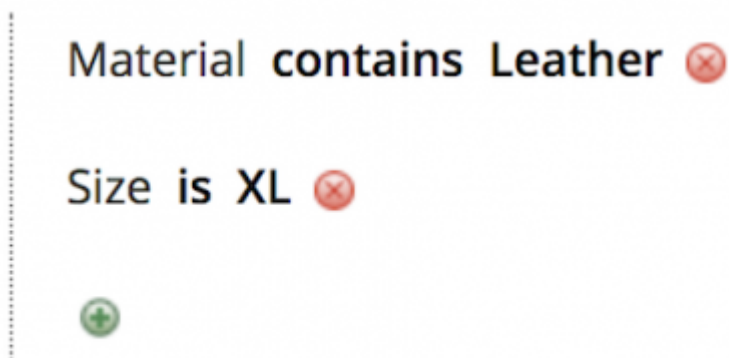

Use Price Range — enable this option to set the price range for the rule:

- By Price — select the condition for the price range;
- From Price — set the lowest price;
- To Price — set the highest price.

Product Conditions

Product Conditions

If **ALL** of these conditions are **TRUE** :

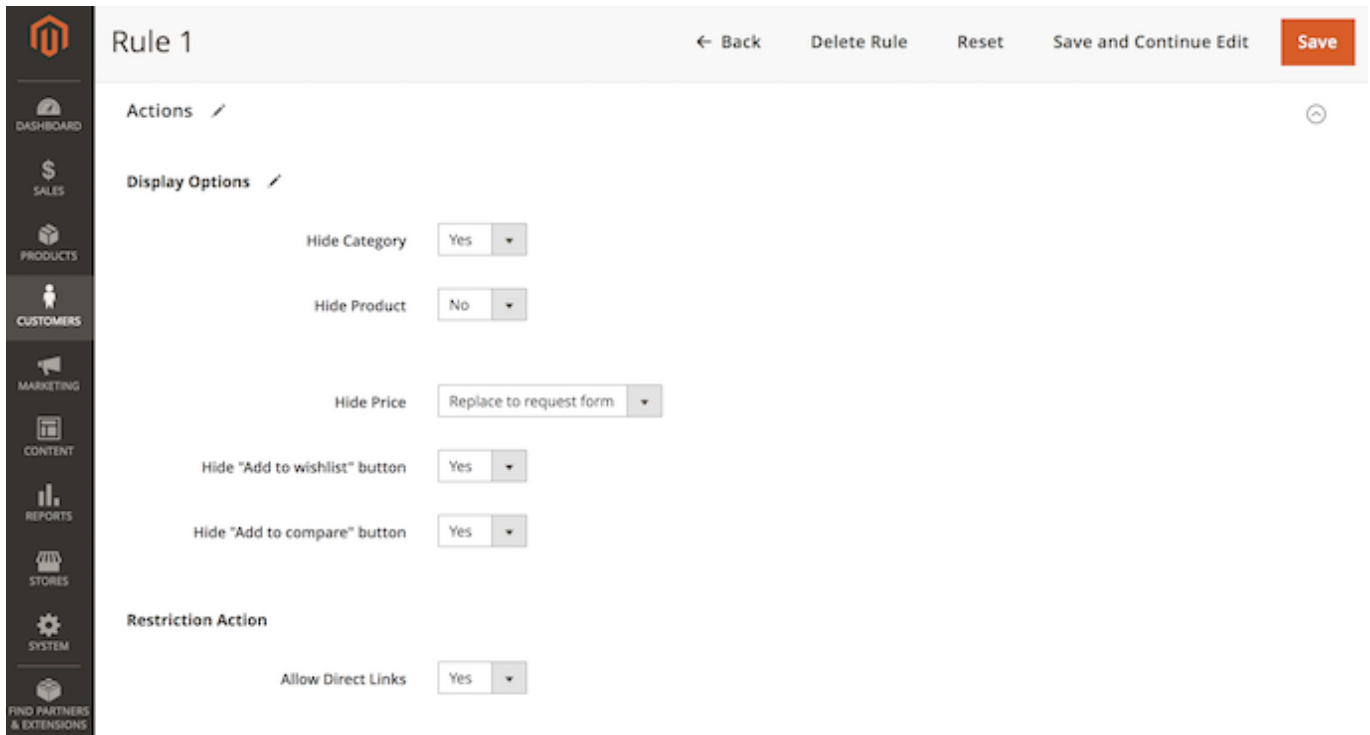

The screenshot shows a vertical list of conditions on the left side of a rule configuration interface. The conditions are:

- Material contains Leather (with a red 'X' icon)
- Size is XL (with a red 'X' icon)
- A green plus icon (+) indicating a condition to be added.

Create conditions to tell the module to what products the rule should be applied.

Actions

Hide Category — enable this option to hide selected categories from a certain group of customers;

Hide Product — enable this option to hide selected products from a certain group of customers;

Hide Price — enable this option to hide price from a certain group of customers. Also, you can:

- Replace with text — display custom text instead of price (you will need to select a replacement block for product and category pages);
- Replace to request form — display a link to the request form.

Hide “Add to wish list” button — enable this option to hide the Add to wish list button;

Hide “Add to compare” button — enable this option to hide the Add to compare button;

Allow Direct Links — enable this option to let customer access restricted product and category pages using direct links. If you disable this option then you configure:

- Action on Forbid — choose to show the 404 page or redirect visitors;
- CMS-page to redirect to — when you want to redirect visitors, here you can set the destination address.

Please see the [extension settings](#) to modify the above options behavior.
