

amasty

For more details see how the [Customer Group Catalog](#) extension works.

Guide for Customer Group Catalog for Magento 2

Adjust your selling strategy. Hide or replace the price block on category and product pages to motivate visitors to perform certain actions. With the Customer Group Catalog extension, you can provide customers with the get a quote form instead of the price or restrict access to particular products and categories for groups of customers.

- Create private customer groups for Magento 2 store
- Configure the visibility of products and categories
- Provide customer groups with selective access to store catalog
- Hide or replace product price with CMS-block or image
- Redirect users to custom CMS-pages or to 404 page
- Hide the 'Add to cart', 'Add to wish list', and 'Add to compare' buttons

Important! We've updated the interface of rule creation. While upgrading your version to 1.6.2, old rules configured previously should be set up again using the new interface.

Extension Configuration

To configure the extension go to **Store** → **Configuration** → **Amasty Extensions** → **Customer Group Catalog**

General Settings

General Settings

Enable module [global] Yes

Email Sender for Admin 'Get a Quote' Reply Email [global] General Contact

Email Template for Admin 'Get a Quote' Reply Email [global] Amasty 'Get a Quote' Answer (Default)
Email template chosen based on theme fallback when "Default" option is selected

Enable Module — modify this option to enable or disable the module;

Email Sender for Admin 'Get a Quote' Reply Email — specify the email sender for admin's

replies;

Email Template for Admin 'Get a Quote' Reply Email — define the email template for admin's replies.

Frontend Options

Frontend Options

Hide Price Text
[store view]

Display the above text when price is hidden, e.g. 'Call for Price'

Custom CSS Styles for Hide Price Link
[store view]

Customize the CSS Styles for the Hide Price Link

Upload Image
[store view]

No file chosen

Show the uploaded image instead of price

Link Url
[store view]

Use text 'AmastyHidePricePopup' for opening Ajax Popup with a 'Get a Quote' form Insert the page URL to redirect customers to any page you need

Hide Price Text — fill in the text to display instead of price;

Custom CSS Styles for Hide Price Link — customize CSS styles when using a link instead of price;

Upload Image — select and upload an image to replace price;

Link URL — specify URL to redirect visitors to any address or use *AmastyHidePricePopup* to show the **Get a Quote** form.

Admin 'Get a Quote' Email Notifications

Email Template — define the email template for automatic replies.

Developer Options

Developer Options

These options need to be changed if you are using a custom Magento theme

Category Item Selector
[store view]

Category Item Selector — use this option to set the category item selector when a custom Magento theme is activated.

GDPR Consent

As the module provides customers with the ability to use a request form, it is important to comply with GDPR using the privacy policy consent.

GDPR Consent

Enabled
[store view]

 ▼

Consent Text
[store view]

I agree to the Privacy Policy to get a quote for product.

Expand the **GDPR Consent** section:

Enabled — choose Yes to enable the GDPR consent request;

Consent Text — specify the consent request text and the privacy policy link.

Please notice that the module doesn't equip your store with a privacy policy. You should create a new CMS-page and use the link to it in the **Consent Text** field.

Creating a New Rule

To create a new Magento 2 customer group rule, go to **Customers** → Customer Group Catalog → **Rules**. Here you can see all existing rules, filter them and perform mass delete action.

Use Date Range — enable this option to set the time range when the rule will be active;

Customer Groups

Customer Conditions

* Please mind these conditions are applied only for logged in customers

If **ALL** of these conditions are **TRUE**: ?

Created At is 2020-10-07 ❌

Customer Groups — select any of customer groups created in your Magento 2 store for which the rule will be applicable.

In the **Customer Conditions** you can create conditions that your customers should meet to have access to price, product or category pages, etc.

Combine various customer attributes to set customer conditions.

The conditions are applied only for logged in customers.

Compatibility with Amasty B2B Company Account

You can use [Company Accounts](#) while setting the conditions. If both extensions are installed, you will be able to choose specific company accounts in the conditions tree.

Hide Price

- No
- Yes
- Replace with text
- Replace to request form

Hide "Add to cart" button

Yes

Hide "Add to wishlist" button

No

Hide "Add to compare" button

No

Hide Price — enable this option to hide price from a certain group of customers. Also, you can:

- Replace with text — display custom text instead of price (you will need to select a replacement block for product and category pages);
- Replace to request form — display a link to the request form.

Hide "Add to cart" button — enable this option to hide the Add to cart button;

Hide “Add to wish list” button — enable this option to hide the Add to wish list button;

Hide “Add to compare” button — enable this option to hide the Add to compare button;

Allow Direct Links — enable this option to let customers access restricted product and category pages using direct links. Keep in mind, that this option is configured independently, e.g. even though the “Hide Product” option is set to No, you can fording direct links and vice versa, Thus, if you want to make a product available, set the “Allow Direct Links” regardless of the settings above.

If you disable this option then you configure:

Direct Links

Allow Direct Links

No

Action On Forbid

Redirect to CMS page

This action will be applied when requested category or product page will be forbidden by this rule

CMS page redirect to

Home Page

Customer will be redirected to this CMS page when he'try to access forbidden page

- Action on Forbid — choose to show the 404 page or redirect visitors;
- CMS-page to redirect to — when you want to redirect visitors, here you can set the destination address.

Please see the [extension settings](#) to modify the above options behavior.
