

Amasty Extension

Installation Guide

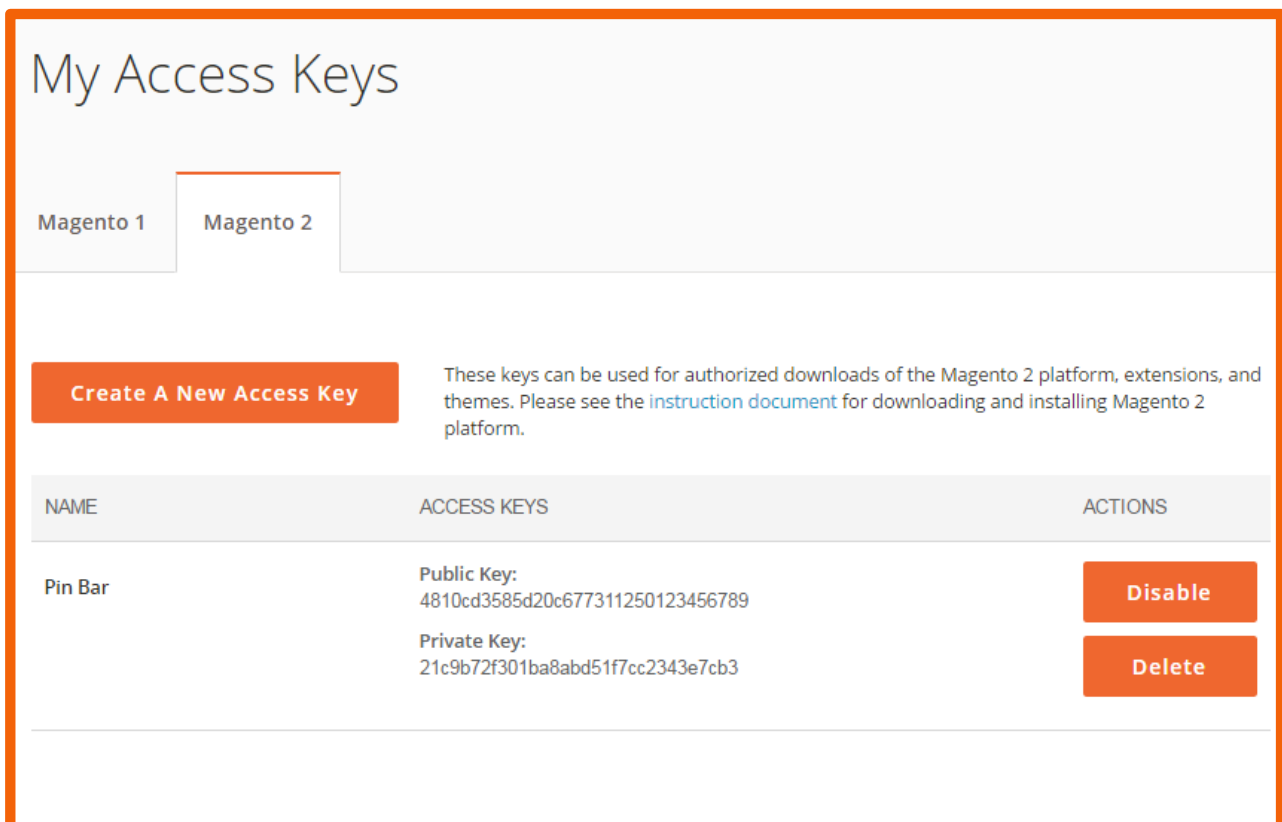

for Magento Marketplace

1. Purchase an extension on the Magento Marketplace.
2. Open the 'My Access Keys' page.

3. Click on the 'Create a New Access Key' button and the keys will be generated automatically.

4. Log in to your Magento website, go to System > Web Setup Wizard > press the System Configuration button and sign in using generated keys.

The screenshot shows the 'System config' page in the Magento admin interface. On the left is a dark sidebar with navigation icons: Home, Component Manager, System Upgrade, and System Config (highlighted). The main content area has a 'System config' header and a 'Save Config' button. Below is the 'Magento Marketplace' section with a sign-in prompt and two input fields for 'Public Access Key' (containing '5922cd3585d28c67787125') and 'Private Access Key' (masked with dots).

5. Click on the 'Component Manager'.

The screenshot shows the 'Setup Wizard' page in the Magento admin interface. The sidebar is the same as in the previous screenshot, with 'Component Manager' highlighted. The main content area has a 'Setup Wizard' header and a welcome message: 'Welcome to the Magento Setup Tool. Please choose a task below.' Three task cards are displayed: 'Component Manager' (with a brick icon and text 'I want to manage my packages and modules.'), 'System Upgrade' (with an upward arrow icon and text 'I want to upgrade my Magento Admin version.'), and 'System Configuration' (with a gear icon and text 'I want to change my Magento system configurations.').

6. Press the 'Sync' button and then install available extensions.

Error from Updater Application Cron Script:

Cron job has not been configured yet

For additional assistance, see [cron scripts help](#).

 **Check Component Dependency**

Component dependency is correct.

 **PHP Version Check**

Your PHP version is . The required PHP version is . [Show detail](#)

 **PHP Settings Check ***

 **PHP Extensions Check**

missing PHP extensions. [Hide detail](#)

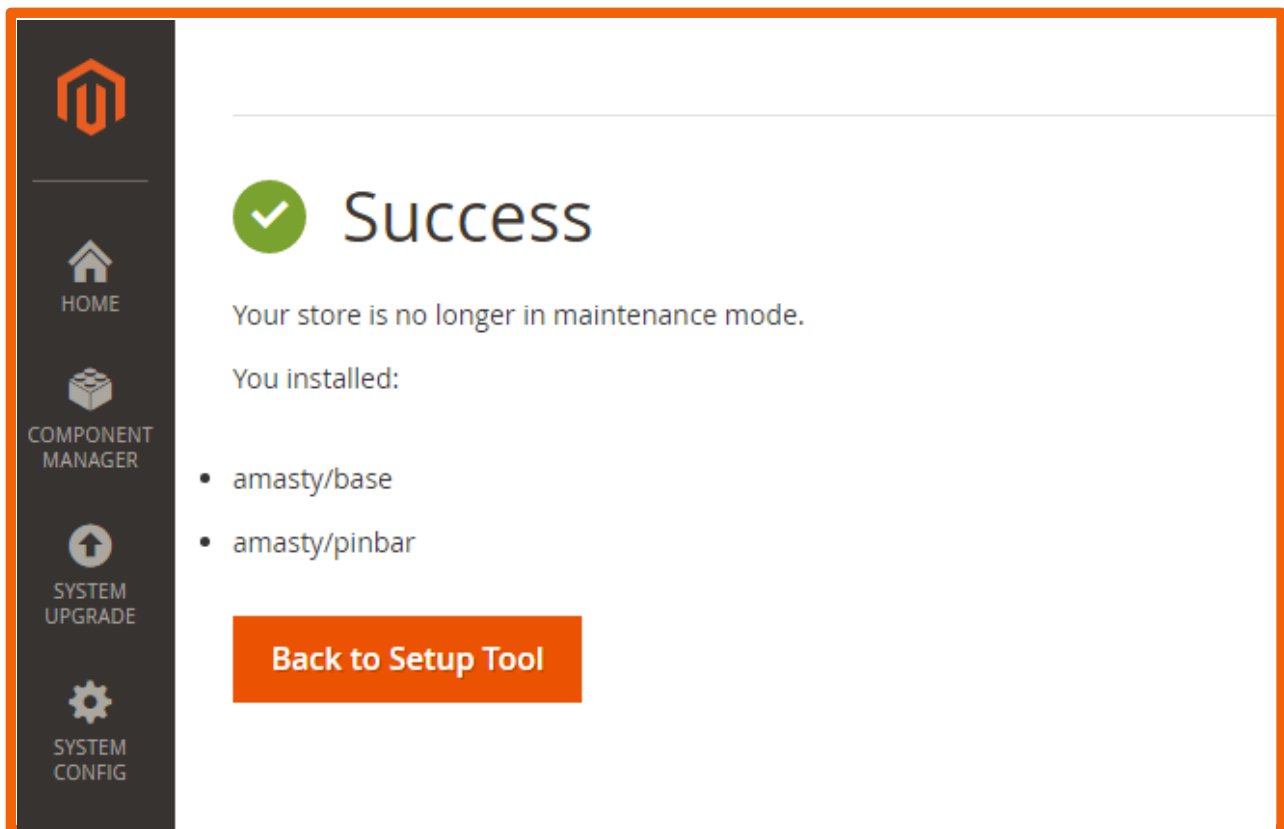

9. Create Backup.

The screenshot shows the 'New Purchases' dashboard. On the left is a dark sidebar with navigation icons: Home, Component Manager, System Upgrade, and System Config. The main content area has a progress bar at the top with three steps: '1 Readiness Check', '2 Create Backup', and '3 Component Install'. The 'Create Backup' step is currently active. Below the progress bar are 'Back' and 'Next' buttons. The main heading is 'Step 2: Create Backup'. Under 'Backup Options', there are three checked checkboxes: 'Code', 'Media', and 'Database'. A text block below says 'Let's check your disk space availability for taking selected backups, and then create the backups.' At the bottom is a large orange 'Create Backup' button.

10. Install the extension. The installation make take a couple of minutes.

The screenshot shows the 'New Purchases' dashboard. The sidebar is the same as in the previous screenshot. The progress bar at the top now shows '1 Readiness Check', '2 Create Backup', and '3 Component Install', with 'Component Install' being the active step. Only a 'Back' button is visible below the progress bar. The main heading is 'Step 3: Component Install'. A yellow warning box contains a red triangle icon and the text: 'We will take your store offline to protect shoppers during the duration of the install activity.' Below this, text indicates: 'We're ready to install amasty/base to 1.0.0.' and 'We're ready to install amasty/pinbar to 1.0.0.' At the bottom is a large orange 'Install' button.

11. After the installation is complete, you'll see the success page.

12. Now you can proceed with the extension settings.
