

Amasty

For more details see the [Automatic Related Products](#) extension page.

Automatic Related Products for Magento 2

Motivate customers to purchase more from you using special blocks with cross-sells, up-sells, or related products. Automatically promote products with smart algorithms for product relation and increase the average order value.

- Create attractive product offerings using smart relation algorithm
- Utilize various conditions to differentiate products display
- Show related items based on customers' views or purchases
- Exclude out-of-stock products from the display
- Use automatic relation results instead of manual configuration

General Settings

To configure the extension please go to **Stores → Configuration → Amasty Extensions → Automatic Related Products** and expand the **General** section.

The screenshot shows the Magento 2 Configuration interface. At the top, it says 'Configuration' with a user profile 'demouser'. Below that, there's a 'Store View: Default Config' dropdown and a 'Save Config' button. The main content area is divided into sections: 'AMASTY EXTENSIONS' (expanded), 'Extensions & Notifications', and 'Automatic Related Products' (selected). Under 'Automatic Related Products', the 'General' section is expanded, showing a 'Query Limit' field with the value '1000' and a note '[STORE VIEW] Limit of records in query for period.'. Below this, there are sections for 'Up-Sells', 'Cross-Sells', and 'Related Products', each with a dropdown arrow.

Query Limit — indicate the maximal number of queries (product views and purchases) for a specific time period basing on which the module will gather statistical data and display related, up-selling and cross-selling products.

In case you are using **Magento 2 Enterprise Edition** please make sure the built-in rules (**Marketing → Related Products Rules**) do not conflict with the conditions and rules enabled by this module.

Up-Sells Configuration

To configure the up-selling products expand the the **Up-Sells** section.

Up-Sells

Enabled	<input type="text" value="Yes"/>	[STORE VIEW]
Maximum Products Count	<input type="text" value="4"/>	[STORE VIEW]

Order Status — when the **Data Source** option is set to **Bought together**, you can specify the order status that needs to be considered when the system selects matching products;

Category Condition — specify whether auto-generated products will be selected from any category or from the same category with the chosen product;

Brand Condition — choose whether to select products of any brand or of the same brand with the chosen product;

Price Condition — price condition defines if auto-generated products can have any price or the price should be higher or lower.

Creating Rules for Products Relation

To create a new rule, please go to **Marketing** → **Related Product Rules**.

	ID	Name	Store View	Action
<input type="checkbox"/>	1	Related products for bags	All Store Views	Select
<input type="checkbox"/>	2	Rule for size	All Store Views	Select

On the **Related Product Rules** grid you can see all existing rules and modify or delete them. To create a new rule click the **Add New Rule** button.

Then, specify the rule name and choose stores where the rule should be applied. When done, set the conditions for automatic products relation. You can choose various product attributes and define their values.

Up-Sells

Enabled <small>[store view]</small>	Yes
Maximum Products Count <small>[store view]</small>	4
Manually Added Products <small>[store view]</small>	Replace Manually Added Products
Show In Stock Products Only <small>[store view]</small>	Yes
Product Attributes <small>[store view]</small>	Related products for bags
Data Source <small>[store view]</small>	Product Attributes

Next, you need to make the created rule active. Please go the extension settings: **Stores** → **Configuration** → **Amasty Extensions** → **Automatic Related Products**. Then, expand the up-sell, cross-sell, or related products section, select the **Product Attributes** value from the **Data Source**

dropdown menu. Finally, select the required rule from the newly appeared **Product Attributes** menu.
