Extended Product Grid with Editor for Magento 2

Get the advanced product grid in your Magento 2 store. Add columns, edit data right in the cells, and even manage the product inventory in one handy extension. Moreover, you can create templates to save the desired grid layouts and switch between them according to your needs. Also, the module provides flexible settings to utilize its potential in the most convenient way.

- Edit product data right on the grid
- Activate additional product attributes
- Add product grid templates
- Manage product inventory by adding or deducting items
- Customize filters to easily find information

General Settings

To configure general extension settings please go to **Stores → Configuration → Product Grid**

In the General Settings section you will find three options to configure. They are:

- Editing Mode;
- Additional Grid Columns;
- Quantity Based Availability.

Editing Settings

Editing Mode [global] 
Single Cell - data is being saved right after any cell is edited. Multi Cell - Save button should be clicked after data in multiple cells has been edited.

Additional Grid Columns

Products Qty [global]
Related to: related product, up-sells, cross-sells

Qty Sold From [global] 

Qty Sold To [global] 

Qty Sold Orders [global]
Pending
Processing
Suspected Fraud
Complete
Closed
Canceled
On Hold

Quantity Based Availability

Quantity Based Availability [global] 
When set to yes, availability will automatically change to 'In stock' when quantity is positive and to 'Out of stock' when quantity is zero or negative. When set to 'No', availability status will not be updated automatically.

Now, let's find out their functionality.

Editing Mode — allows you to choose how you will edit the product grid:

- **Single Cell** — saves your modifications for each cell independently;
- **Multi Cell** — lets you configure multiple cells and then save them in a bulk.

Products Qty — specify the number of related products, up-sells, cross-sells to be displayed on the grid.

Qty Sold From — specify the date to count the 'Qty Sold' from.

Qty Sold To — specify the date to count the 'Qty Sold' to.

Qty Sold Orders — select order statuses to include orders in the 'Qty Sold' column.

Quantity Based Availability — set to 'Yes' to change the product availability to 'In Stock' when

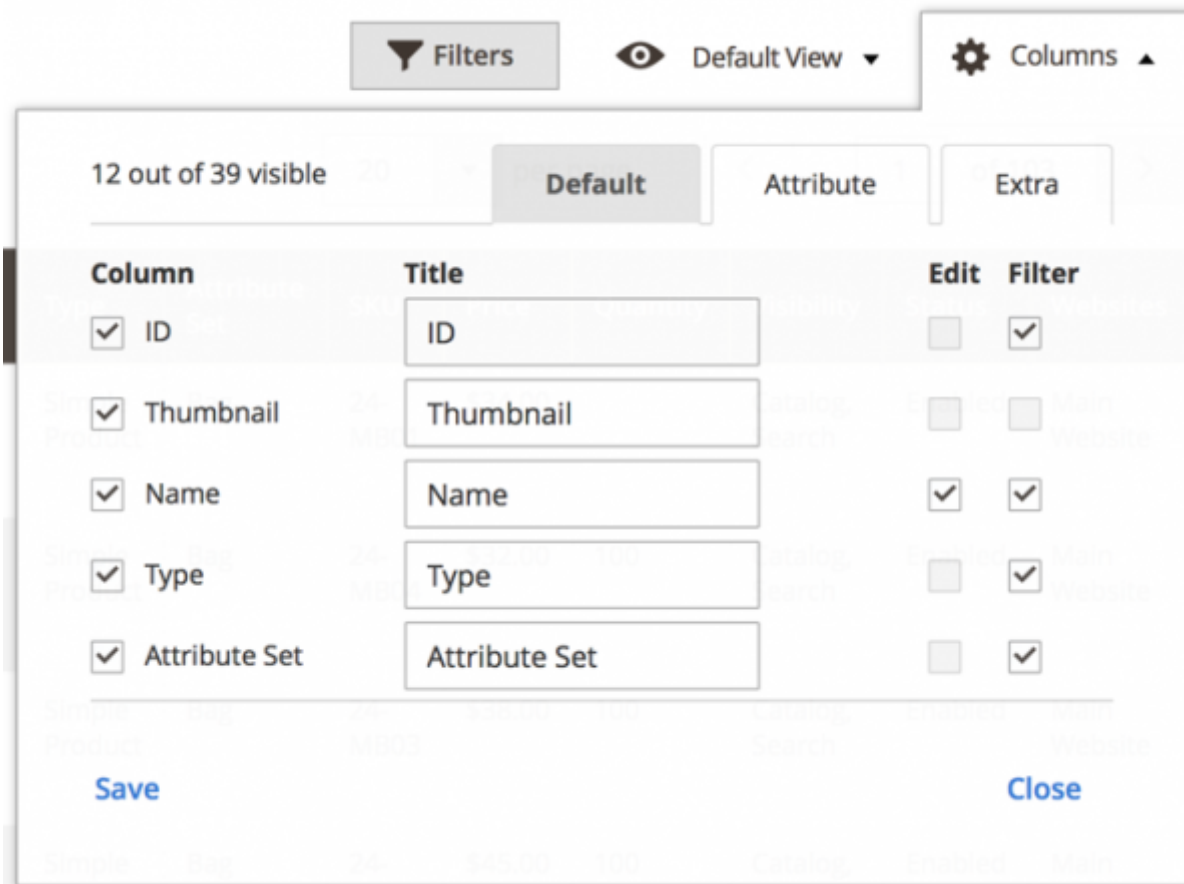

quantity is positive or set to 'No' to mark products as 'Out-of-Stock' when quantity is zero or negative.

After configuring the extension's general settings we can proceed to the product grid.

Custom Columns Selection

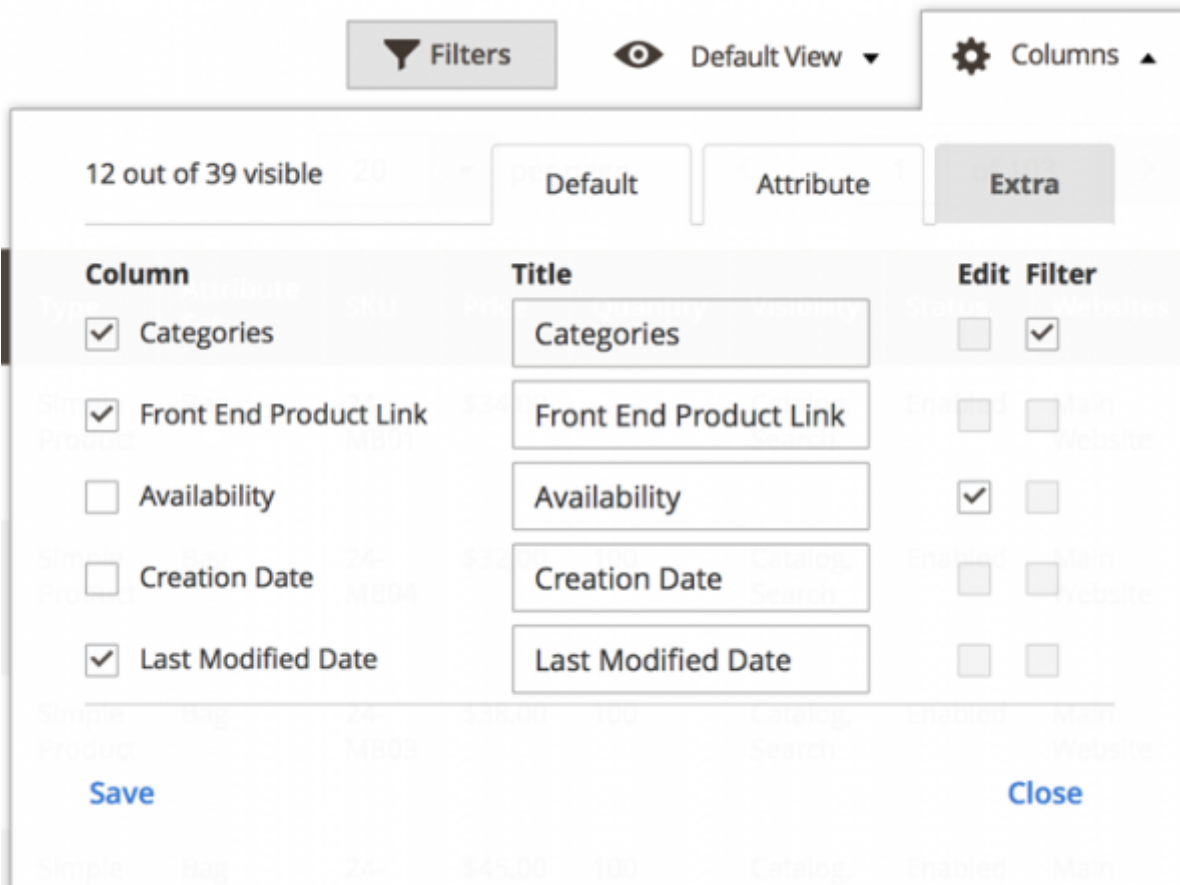

Navigate to your product grid that is located in **Products → Catalog**. From here you can customize the set of columns to use on the product grid.

- Click the **Columns** button to open the dropdown menu and configure columns;
- Select the **Default** tab;
- Tick the default columns that should be displayed;
- Hit the **Save** button.

Moreover, you can add custom columns to the product grid.

- Select the **Extra** tab;
- Tick the columns that you want to display;
- Hit the **Save** button.

Also, in this dropdown menu you can make columns editable right from the grid. Tick columns under the **Edit** text. Hit the **Save** button to proceed.

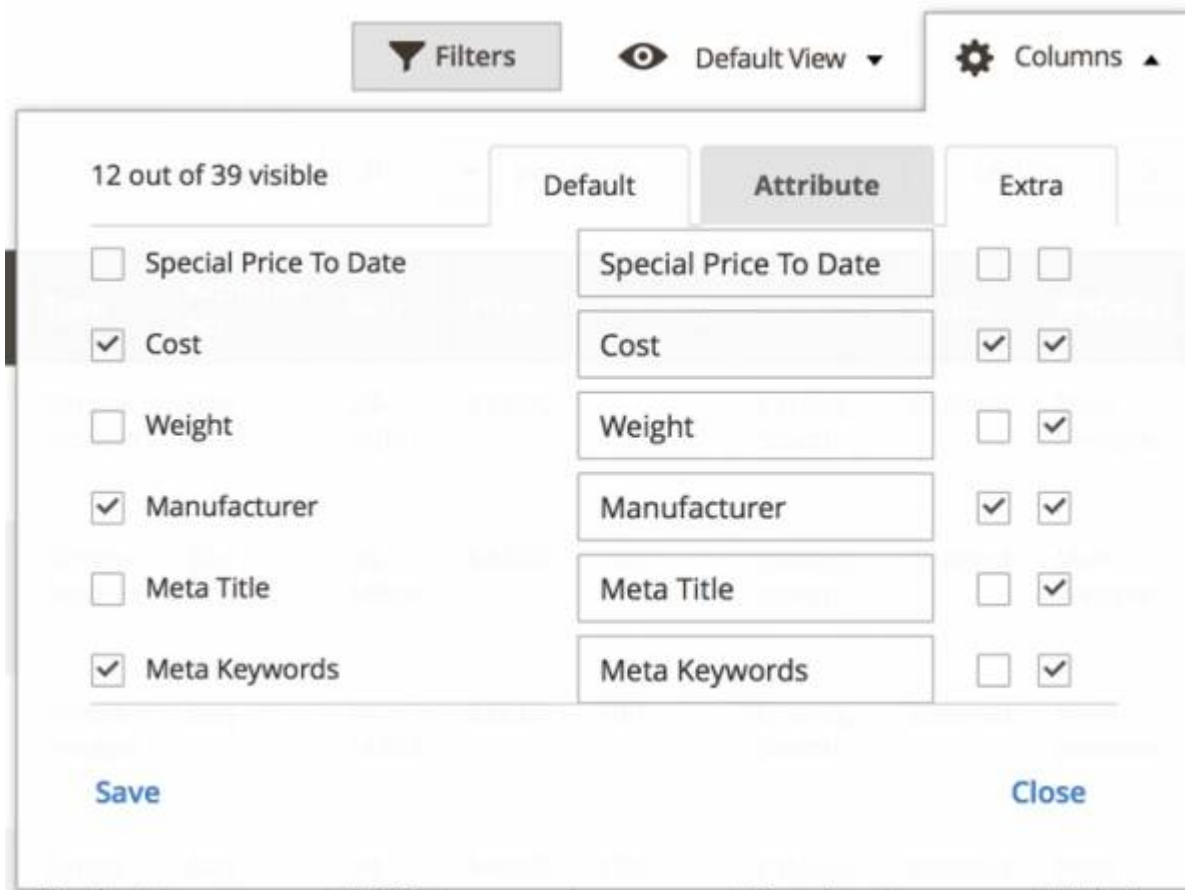

Editable columns will be marked with the special icon with a notepad.

You can drag-and-drop columns by holding their titles with a pointer and moving them left or right.

Additional Product Attributes

With the module, you can add extra product attributes to the grid.

- Click the **Columns** button to open the dropdown menu and configure columns;
- Select the **Attribute** tab;
- Tick attributes that should be displayed;
- Hit the **Save** button.

In the same dropdown menu you can tick columns and attributes to be available for filters. Flag them under the **Filter** text. Hit the **Save** button to proceed.

Moreover, you can make any product attribute accessible from the **Attribute** tab of the **Columns** menu.

Add to Column Options
Select "Yes" to add this attribute to the list of column options in the product grid.

Use in Filter Options
Select "Yes" to add this attribute to the list of filter options in the product grid.

Please go to **Stores** → **Product** and choose an attribute you want to add to the grid. Then, in the **Properties** tab expand the **Advanced Attribute Properties** section. Here you need to enable the **Add to Column** option. Also, to make an attribute available for filtering enable the **Use in Filter** option.

Custom Filters

Hit the **Filters** button to configure and apply custom filters. From this menu you will have the access to custom attributes that you enabled on the previous steps. Press the **Apply Filters** button to activate the configured terms.

The screenshot shows a configuration panel for filters. At the top, there are three buttons: 'Filters' (highlighted with a red box), 'Default View' (with an eye icon), and 'Columns' (with a gear icon). Below these are several filter fields arranged in a grid:

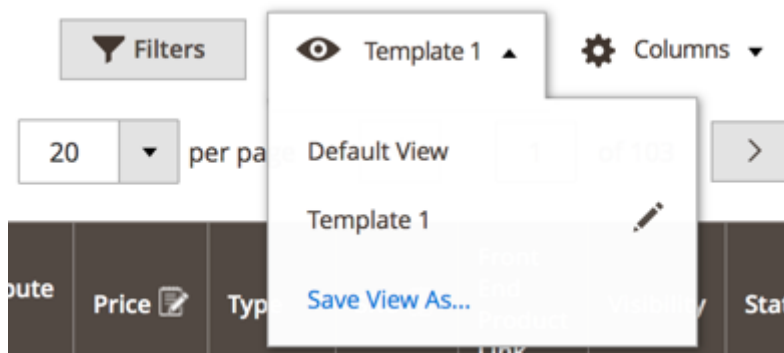

- ID**: from [] to []
- Price**: from [] to []
- Quantity**: from [] to []
- Store View**: All Store Views [v]
- Name**: []
- Type**: Simple Product [v]
- Attribute Set**: Bottom [v]
- SKU**: []
- Visibility**: [v]
- Status**: [v]
- Cost**: []
- Manufacturer**: [v]
- Meta Keywords**: keyword []
- Categories**: [v]

At the bottom right, there are two buttons: 'Cancel' and 'Apply Filters'.

Creating and Managing Templates

When you finished configuring the grid's columns, product attributes, and filters, you can save the current stat of the grid as a template.

- Hit the **Default** View button;
- Choose the **Save View As** option to create a template;
- Then, you can switch between the created templates from this menu.

Editing Product Information on the Grid

Using the Extended Product Grid with Editor for Magento 2 extension you can modify products data right on the grid. See previous steps to make columns editable.

You can edit data in columns that are marked with a special symbol. Just click the required cell to edit data. Make changes in all cells and hit the **Save Edits** button to apply changes. Note, that the module verifies the data you filled in. Data in the unsuitable formats will not be saved and you will be notified and asked to fill the field in correctly.

The screenshot shows a table with columns: ID, Thumbnail, Name, Price, Type, Attribute Set, SKU, Quantity, Visibility, Status, and Web. Three rows of product data are visible. The 'Quantity' column for the second row is highlighted with an input field containing '100+50'. At the top right of the table are 'Cancel' and 'Save Edits' buttons.

<input type="checkbox"/>	ID ↓	Thumbnail	Name	Price	Type	Attribute Set	SKU	Quantity	Visibility	Status	Web
<input type="checkbox"/>	1		Joust Duffle	\$34.00	Simple Product	Bag	24-MB01		Catalog, Search	Enabled	Mair Web
<input type="checkbox"/>	2		Strive Shoulder Pack	\$32.00	Simple Product	Bag	24-MB04	100+50	Catalog, Search	Enabled	Mair Web
<input type="checkbox"/>	3		Crown Summit Backpack	250	Simple Product	Bag	24-MB03	100	Catalog, Search	Enabled	Mair Web

When you use the 'Single cell' editing mode please click any spot outside the field to save the data.

Inventory Management

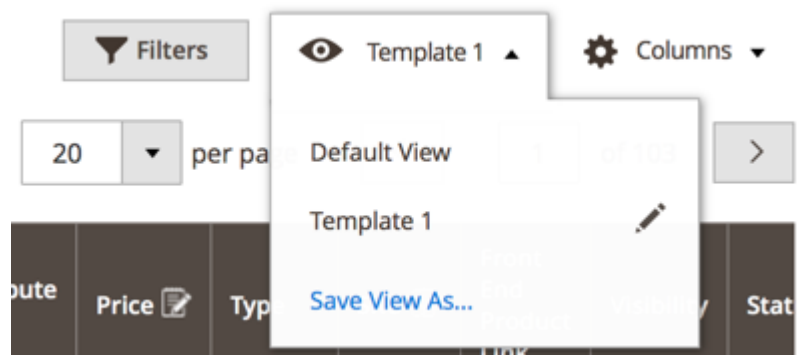

You are able to modify product quantity on the grid:

- Make the appropriate column editable;
- Specify the desired value to increase or decrease quantity;
- Alternatively, you can add or deduct product quantity;
- The extension will make the required calculations;
- Save changes.

		Cancel		Save Edits							
<input type="checkbox"/>	ID ↓	Thumbnail	Name	Quantity	Price	Type	Attribute Set	SKU	Front End Product Link	Visibility	Stat
<input type="checkbox"/>	1		Joust Duffle Bag	25+75	\$34.00	Simple Product	Bag	24-MB01		Catalog, Search	Enat
<input type="checkbox"/>	2		Strive Shoulder Pack	100+50	\$32.00	Simple Product	Bag	24-MB04		Catalog, Search	Enat
<input type="checkbox"/>	3		Crown Summit Backpack	100-80	\$38.00	Simple Product	Bag	24-MB03		Catalog, Search	Enat

Frontend Product Links

The extension allows you to add quick product frontend links to check all the changes right in the store and product pages.

To add frontend links do the following:

- Click the **Columns** button;
- Navigate to the **Extra** tab;
- Flag the **Front End Product Link** column;
- Hit the **Save** button.

Now, you will have direct product links on the grid.

Find out how to install the **Extended Product Grid with Editor** extension for Magento 2 via [Composer](#).
