For more details see the [Advanced Permissions for Magento 2](#) extension page.

Advanced Permissions for Magento 2

Provide limited access to your store management for different admin users. Benefit from advanced role permissions to let specific managers work with particular products, categories, product attributes, websites, and store views.

- Limit access by store view or website
- Control access to product and categories management
- Restrict access to product attributes
- Enable selective dashboard access
- Limit access to CMS pages

Creating Roles with Advanced Permissions

To create a new sub-admin role with advanced permissions please navigate to **Admin panel** → **System** → **Permissions** → **User Roles**. Then, hit the **Add New Role** button.

Role Information and Resources

The screenshot shows the 'Category Manager' role creation interface. At the top right, there is a search icon and a user profile icon labeled 'admin'. Below this is a navigation bar with buttons: '← Back', 'Delete Role', 'Reset', and a prominent orange 'Save Role' button. On the left, there is a sidebar with a 'ROLE INFORMATION' tab and a 'Role Info' sub-tab. The main content area is titled 'Role Information' and contains a form field for 'Role Name' with a red asterisk indicating it is required. The text 'Category Manager' is entered into this field.

1. Specify the **Role Name**;
2. Switch to the **Role Resources tab**;
3. Change the **Resource Access** option to **Custom**;
4. Specify the resources this role will have access to.

Choose Access Scope

Limit Access To Specified Websites

Websites

- Main Website

In this tab you can limit access to certain store views or websites. Modify the **Limit Access To** option to:

- Allow all stores;
- Limit certain websites;
- Limit certain store views.

For the websites and store views option you should specify the required ones.

Search [Reset Filter](#) 2046 records found 20 per page < 1

<input type="checkbox"/>	ID ↑	Name	Type	Attribute Set	Status	Visibility	SKU
<input type="checkbox"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
<input type="checkbox"/>	2046	Set of Sprite Yoga Straps	Grouped Product	Gear	Enabled	Catalog, Search	24-WG085_Gr
<input checked="" type="checkbox"/>	2045	Erika Running Short	Configurable Product	Bottom	Enabled	Catalog, Search	WSH12
<input checked="" type="checkbox"/>	2044	Erika Running Short-32-Red	Simple Product	Bottom	Enabled	Not Visible Individually	WSH12-32 Red
<input checked="" type="checkbox"/>	2043	Erika Running Short-32-Purple	Simple Product	Bottom	Enabled	Not Visible Individually	WSH12-32 Purple

Next, the **Products** tab enables you to provide access to all or only selected products. In second case you will need to flag the required product. Moreover, you can make products accessible only for their owners that is convenient for the multi-vendor stores.

Please see [this part](#) of the guide to know how to set product owners.

Advanced: Affected Entities

The screenshot displays the 'Advanced Permissions' configuration page. On the left is a sidebar titled 'ROLE INFORMATION' with a menu containing: 'Role Info', 'Role Resources', 'Role Users', 'Advanced: Scope' (with a pencil icon), 'Advanced: Categories' (with a pencil icon), 'Advanced: Products' (with a pencil icon), and 'Advanced: Affected Entities' (highlighted with an orange bar). The main content area is titled 'Affected Entities' and contains four rows of settings, each with a 'Limit Access To' label and a dropdown menu set to 'Yes':
1. 'Limit Access To Orders' with a dropdown set to 'Yes'.
2. 'Limit Access To Invoices And Transactions' with a dropdown set to 'Yes'.
3. 'Limit Access To Shipments' with a dropdown set to 'Yes'.
4. 'Limit Access To Credit Memos' with a dropdown set to 'Yes'.

In the **Affected Entities** tab you can limit user role access to the following parts of your store:

- Orders;
- Invoices and Transactions;
- Shipments;
- Credit Memos.

Select between the **Yes** or **No** options.

Specify account information and switch to the **User Role** tab. From here you can tick the desired radio-button to provide this user with certain administrative privileges. When done, hit the **Save User** button.

Return to the [previous steps](#) to know how to set up a user role with advanced permissions.

Changing Product Owner

To provide selective access to a certain product you can set up its owner.

1. Go to Products → Catalog;
2. Select the desired product;
3. Specify product owner in the drop-down menu.

Make sure that you [switched](#) the **Advanced: Products** option to **Own Product Only** option.

Find out how to install the Advanced Permissions extension via [Composer](#).
