For more details see the [Custom Stock Status](#) extension page.

Custom Stock Status Magento 2

The extension allows you to inform your shoppers about the current stock statuses of your products. You can use variables and quantity ranges, making clear and catchy statuses to engage your customers.

- Create multiple custom stock statuses
- Add statuses to products automatically or manually
- Show out of stock options of configurable items
- Upload special icons for stock statuses
- Display quantity based stock statuses

Add Custom Stock Status

To create new or edit the existing custom stock statuses, go to **Admin Panel** → **Stores** → **Attributes** → **Products**:

Product Attributes

Add New Attribute

custom_design_from	Active From	No	Yes	No	Store View
custom_design_to	Active To	No	Yes	No	Store View
custom_layout_update	Custom Layout Update	No	Yes	No	Store View
custom_stock_status	Custom Stock Status	No	No	No	Global
custom_stock_status_qty_based	Use Quantity Ranges Based Stock Status	No	Yes	No	Global

- Select *custom_stock_status* attribute;
- Navigate to the **Properties** tab → **Manage Options (values of your attribute)** section;
- Create the necessary options for the custom stock attribute.

- To display current product quantity in particular stock status, use *{qty}* variable, for example:
Hurry up! Only {qty} left in stock!
- Use *{qty_threshold}* variable to display the product quantity minus stock threshold (the number which triggers the out-of-stock status of a product).

Note that you can use any product attribute as a variable to provide a necessary message in a custom stock status. For instance, use **{special_price}** to inform customers about upcoming discounts.

Attribute Properties

Default label *

Catalog Input Type for Store Owner

Values Required

Manage Options (values of your attribute)

	Is Default	Default Store View	Admin	
<input checked="" type="radio"/>	<input checked="" type="radio"/>	<input type="text" value="HURRY UP! ONLY 5"/>	<input type="text" value="HURRY UP! ONLY 5"/>	<input type="button" value="Delete"/>
<input type="radio"/>	<input type="radio"/>	<input type="text" value="3 DAY SHIPPING!"/>	<input type="text" value="3 DAY SHIPPING!"/>	<input type="button" value="Delete"/>
<input type="radio"/>	<input type="radio"/>	<input type="text" value="Back in stock soon"/>	<input type="text" value="Back in stock soon"/>	<input type="button" value="Delete"/>
<input type="button" value="Add Option"/>				

Upload icons for Custom Stock Status

To upload the icons for statuses:

- Select *custom_stock_status*;
- In the **ATTRIBUTE INFORMATION** section;
- Switch to **Manage Icons** tab.
- Choose icons for custom stock statuses.
- Remember to save the attribute, otherwise icons won't be uploaded.

Manage Icons

Status Label	Upload icon image	Preview	Delete
HURRY UP! ONLY 5 LEFT!	<input type="button" value="Choose File"/> No file chosen		<input type="checkbox"/>
3 DAY SHIPPING!	<input type="button" value="Choose File"/> No file chosen		<input type="checkbox"/>
Back in stock soon	<input type="button" value="Choose File"/> No file chosen		<input type="checkbox"/>

ATTRIBUTE INFORMATION

Rules for quantity ranges

To specify the quantity rules, go to **Stores** → **Attributes** → **Product** and select the attribute *custom_stock_status_qty_rule*.

custom_stock_status_qty_rule

Attribute Properties

Default label *

Catalog Input Type for Store Owner ▼

Values Required ▼

Manage Options (values of your attribute)

	Is Default	Default Store View	Admin	
	<input checked="" type="radio"/>	<input type="text" value="first_rule"/>	<input type="text" value="first_rule"/>	<input type="button" value="Delete"/>
	<input type="radio"/>	<input type="text" value="second_rule"/>	<input type="text" value="second_rule"/>	<input type="button" value="Delete"/>
<input type="button" value="Add Option"/>				

In the *Properties* tab, in the *Manage Options (values of your attribute)* section, create one rule for each product group, for which you will use different levels of stock. E.g. *first_rule* for shirts and *second_rule* for phones.

Once you create the rules, go to *Quantity Range Statuses* and specify ranges for each of these rules.

Manage Quantity Ranges

Quantity From	Quantity To	Custom Stock Status	Stock Status Rule	Remove
1	5	HURRY UPI ONLY 5 LEFT!	first_rule	X
10	20	3 DAY SHIPPING	second_rule	X
-100	0	COMING SOON!	first_rule	X

Add New Range Status

To enable the stock status rules' column in the settings, go to Admin Panel > Stores > Configuration > Custom Stock Status and set to Yes the **Activate rules for Quantity Range Status** field.

Manage Quantity Ranges

- If you would like the statuses to be updated automatically, based on how many items of a product are left in the inventory, please create quantity ranges and assign the necessary statuses to the ranges.
- If you choose to use range based stock statuses when editing a product, the stock status will change automatically once the product quantity changes.
- You can also use Stock Status Rule column. With its help, you can specify different quantity levels for the same statuses for different groups of products. E.g. you can show the same status *Running out* for *Product A*, when it has quantity from 1 to 5; for *Product B*, when it has quantity from 1 to 100.

Use backorder rules to automatically assign particular stock statuses to the products.

Manage Quantity Ranges

Quantity From	Quantity To	Custom Stock Status	Stock Status Rule	Remove
-200	0	Back in stock soon	bags_rule	X
-20	0	Backorder	Allow Qty Below 0 (System Value - processed automatically)	X
-5	0	Back in stock soon	bags_rule watch_rule	X
0	50	FREE SHIPPING!	Allow Qty Below 0 (System Value - processed automatically) Allow Qty Below 0 and Notify Customer (System Value - processed automatically)	X

Add New Range Status

Apply quantity-based statuses

Go to **Admin Panel** → **Products** → **Catalog**. Select a product.

Custom Stock Status - select the appropriate status for the product at the General tab.

Custom Stock Status Qty Rule - select which quantity rule should apply to this product.

Custom Stock Status Settings

General

Go to **Stores** → **Configuration** → **Amasty Extensions** → **Custom Stock Status**, to specify general

extension settings.

Display Custom Stock Status for `Out of Stock` Items Only - It is possible to display custom stock statuses only for *out of stock* products.

Display Default Stock Status with Custom Status -

- Set to *Yes* - To display default stock status (in stock\out of stock) next to a custom stock status.
- Set to *No* - Not to display default stock status - only custom stock status.

Use Quantity Ranges Based Statuses Only - If you would like to use only automatic, range based statuses, set this option to *Yes*.

General

Display Custom Stock Status for `Out of Stock` Items Only	<input type="text" value="No"/>	▼
	If set to `No`, custom stock status will be visible both for `in stock` and `out of stock` items.	
Display Default Stock Status with Custom Status <small>[store view]</small>	<input type="text" value="No"/>	▼
Use Quantity Ranges Based Statuses Only	<input type="text" value="No"/>	▼
	If set to `No`, custom stock status set for product will show up if no range status found for particular product.	
Activate rules for Quantity Range Status	<input type="text" value="No"/>	▼

Display Icon Only (No Status Text) - To display only icons for stock statuses (without text), set this option to *Yes*.

Change Default Configurable Product Status - It's possible to change product statuses for configurable products.

Display Icon Only (No Status Text)	<input type="text" value="No"/>	▼
	Display only icon and no custom status text on the product view and product list pages.	
Enable `Back In Stock` Alert for Out of Stock Configurable Items	<input type="text" value="Yes"/>	▼
Show Out of Stock Configurable Attributes	<input type="text" value="Yes"/>	▼
	If set to `Yes`, out of stock configurations will be displayed in the drop-downs of configurable products with no possibility to purchase.	
Change Default Configurable Product Status	<input type="text" value="Yes"/>	▼

Display Settings

Choose whether to show custom stock statuses on:

- **Product list page;**
- **Shopping cart;**
- **Order Confirmation Email.**

Display Settings

Display Custom Stock Status On Product List Page	<input type="text" value="Yes"/>	▼
Show Custom Status In Order Confirmation Email	<input type="text" value="Yes"/>	▼
Display Custom Stock Status in Shopping Cart	<input type="text" value="Yes"/>	▼
	Will display custom stock status for items in shopping cart.	

Info Link

To place a link in a custom stock status, go to **Admin Panel → Stores → Configuration → Custom**

Stock Status → Info link.

Show Info Link - To enable the feature, set to Yes. A link will be displayed below the **Custom Stock Status**.

Info Link Text - Input an anchor text that will be displayed below a custom stock status.

CMS Page - Select a desired CMS page to direct customers to. A drop-down contains all the CMS pages, that you have in the web store.

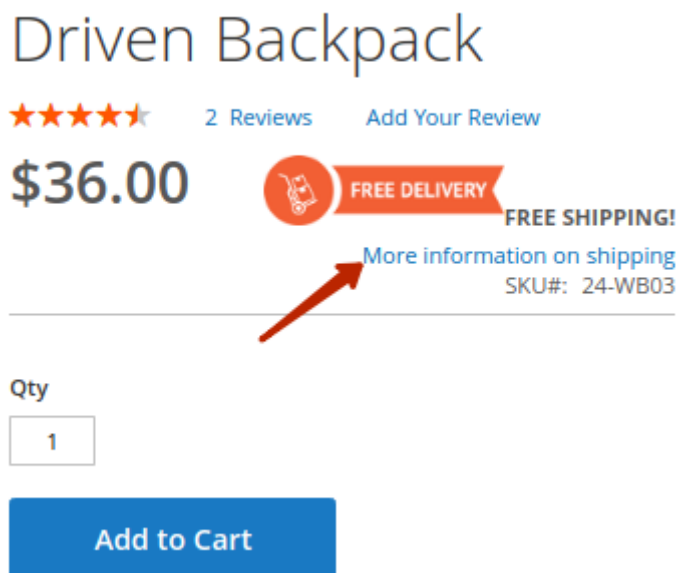

Info Link

Show Info Link [store view] ▼
The information link will lead to any CMS page and will be displayed below the Custom Stock Status

Info Link Text [store view]

CMS Page [store view] ▼

Info link on the frontend:

Expected Date

The Expected Date section allows you to display the date on product pages when a product will back in stock.

Expected Date

Use Expected Date
[store view] ▼

Expected Date Format
[store view] ▼

Hide Expired Expected Dates
[store view] ▼

Use Expected Date — switch this option to **Yes** to enable the expected date functionality;

Expected Date Format — choose the expected date format;

Hide Expired Expected Dates — enable this option to hide the expected dates when they expire.

When the expected date functionality is enabled, the new corresponding attribute is created. Also, the attribute will be automatically added to products.

‘Text field’ and ‘Date’ attributes in statuses

You can use any *Text field* and *Date* product attributes in custom stock statuses. To do this, add code of the attribute to the status like this:

```
Back in stock on {eta}
```

On front end, the code will be replaced with the attribute value for this product.

Manage Quantity Ranges

Quantity From	Quantity To	Custom Stock Status	Stock Status Rule	Remove
<input type="text" value="0"/>	<input type="text" value="1000"/>	<input type="text" value="Available {tomorrow}"/> ▼	<input type="text" value="rule_2"/> ▼	<input type="button" value="X"/>
