

## **Installation:**

---

File upload to your Magento installation

---

Step 1: Download/purchase the extension.

Step 2: Unzip the file into a temporary directory.

Step 3: Upload it to your Magento installation root directory.

## **SSH Installation (requires SSH access to your webserver)**

---

1. In terminal, switch to your Magento 2 root directory using the below command:

Command: `cd /CURRENT_PATH_TO_YOUR_MAGENTO2`

Where "CURRENT\_PATH\_TO\_YOUR\_MAGENTO2" is the path to your Magento 2 folder in your server.

2. Run the below Magento 2 upgrade command:

Command: `php bin/magento setup:upgrade`

3. Run the below single-tenant compiler command:

Command: `php bin/magento setup:di:compile`

4. Deploy the below static view files command:

Command: `php bin/magento setup:static-content:deploy`

5. Clear Your Magento Cache:

Command: `php bin/magento cache:clean`

6. Run the below Re-index command:

Command: `php bin/magento indexer:reindex`

7. Set the permissions to your Var directory and Pub directory:

Command: `sudo chmod -R 777 var pub`
