

To install the module can be done in two ways. Via Magento Connect or manually.

Once the installation is done with any option, the cache must be removed.

MAGENTO CONNECT

To install the module using this tool, you must access the back-end. To start, you must click on System -> Magento Connect -> Magento Connection Manager. You must enter the credentials with which you accessed the backend

The screenshot shows the 'Magentoconnect MANAGER' interface. At the top, the logo 'Magentoconnect' is in orange and 'MANAGER' is in white on a dark background. Below the logo is a large white area containing a 'Log In' form. The form has a title 'Log In' and a message: 'Please re-enter your Magento Administration Credentials. Only administrators with full permissions will be able to log in.' There are two input fields: 'Username:' and 'Password:'. Below the password field is an orange 'Log In' button.

Once inside Magento Connect can be installed using the key if you have it or uploading the file you have downloaded.

Install New Extensions

- 1 Search for modules via [Magento Connect](#).
- 2 Paste extension key to install:

Direct package file upload

- 1 Download or build package file.
 - 2 Upload package file: Ningún archivo seleccionado
-

MANUALLY

For manual installation, you must unzip the file and copy and paste the files in the corresponding folders.
