

IDEAL Basic / Lite

For Magento Commerce 2.x

Appmerce, 2017-11-01

There are two iDEAL Basic/Lite dashboards, one for testing and one for production. These are the test dashboards:

- Rabobank - https://idealtest.rabobank.nl/ideal/logon_rabo.do
- ING Bank - https://idealtest.secure-ing.com/ideal/logon_ing.do

Go to **Registration** (“Aanmelden”) > **Integration**

Integration

Generate a secret key. You will later copy this key to Magento. Set the confirmation method to **XML**.

Enter the **Confirmation URL**. This is the URL to your Magento shop ending in */idealbasic/push/notify*

For example: <https://www.magento.com/idealbasic/push/notify>

(Note the https:// or http:// -- it makes a difference.)

Your website must be accessible from the outside. It will not work behind a firewall or IP restriction, or .htpasswd file.

Leave the other URLs empty. Select **Submit** to save the settings.

Configuration

Go to **System > Configuration > Payment Mtehods > Appmerce iDEAL Basic & Lite**

You can choose your own order statuses for *pending*, *pending_payment*, and *processing* states.

Choose your **Acceptant Bank**, for example ING Bank or Rabobank.

For **Sub ID**, enter a value. Usually this is the value **0**. You can create separate Sub Ids for your shop in the iDEAL Dashboard.

Enter the **Secret Key** that you also entered in the iDEAL Dashboard.

Testing

Perform the test payments of 1, 2, 3, 4, 5 and 7 Euro. You may need to disable shipping and/or tax settings to make sure you order these exact amounts.

For example, create a Magento test product worth exactly 1 Euro. Set the module in **Test Mode** and perform the payments. It is normal that some tests will fail.

Back in the iDEAL Dashboard, you will now see green checkmarks behind each of the integration tests. You have now successfully installed iDEAL.

Production

After the testing has been completed, you must repeat the configuration for the production dashboard. Here are the URLs for the production environment:

- iDEAL Basic (Rabobank) - https://ideal.rabobank.nl/ideal/logon_rabo.do
- iDEAL Lite (ING Bank - https://ideal.secure-ing.com/ideal/logon_ing.do)

Activation

Once the bank has evaluated your test statuses, you may activate iDEAL by selecting **Activation**.
