

# Installation Instructions

- Log in to Magento Admin
- (Optional) Disable Magento Compiler if you are using it (System > Tools > Compilation)
- Go to System > Magento Connect > Magento Connect Manager
- Use "Direct package file upload" section and "Upload package file"
- Browse to the .tgz file
- Click "Upload" button
- Go back to Magento Admin
- Flush Magento Cache (System > Cache Management), **then log out from Magento Admin and log back in**
- (Optional) Enable Magento Compiler by clicking "Run Compilation Process" button (System > Tools > Compilation)
- Go to (System > Configuration > Apptrian Extensions > Quick Search > General) and click "Refresh Search Index" button.
- If you do not have jQuery included in your theme, set (System > Configuration > Apptrian Extensions > Quick Search > General > Include jQuery) option to "Yes".
- Refresh Magento cache (System > Cache Management)

If you do not know how to install extension or you wish a professional to do it for you, we offer additional Installation Service for a small fee.

## Configuration

After you install extension you need to generate new search index. To do this log to your Magento Admin and go to:

**System > Configuration > Apptrian Extensions > Quick Search**

In **General** section

Click **Refresh Search Index** button. Wait patiently for request to finish. That is all you need to do.

If you want to configure something differently you can.

All options are self explanatory and usually have tooltips for additional information.

After changing options make sure you refresh your Magento cache.
