

Customization Instructions

If you want to style Quick Search further, copy
./skin/frontend/base/default/css/apptrian_quicksearch.css
to

./skin/frontend/your_design_package/your_theme/css/apptrian_quicksearch.css
and add your CSS styles.

Read comments in the CSS file and you will be able to make most of the changes in a very succinct way.

You can change Quick Search ajax loader animated gif by creating directory
./skin/frontend/your_design_package/your_theme/images/apptrian/quicksearch/
and then copy your ajax loader gif inside it. The filename must be ajax-loader.gif.

If you do not know how to style with CSS or you wish a professional to do it for you, we offer additional CSS Custom Style service for a small fee.
