

Installation Instructions

- Log in to Magento Admin
- (Optional) Disable Magento Compiler if you are using it (System > Tools > Compilation)
- Go to System > Magento Connect > Magento Connect Manager
- Use "Direct package file upload" section and "Upload package file"
- Browse to the .tgz file
- Click "Upload" button
- Go back to Magento Admin
- Flush Magento Cache (System > Cache Management), **then log out from Magento Admin and log back in**
- (Optional) Enable Magento Compiler by clicking "Run Compilation Process" button (System > Tools > Compilation)
- If you do not have jQuery included in your theme, set (System > Configuration > Apptrian Extensions > Responsive Product Slider > General > Include jQuery) option to "Yes".
- Refresh Magento cache (System > Cache Management)

If you do not know how to install extension or you wish a professional to do it for you, we offer additional Installation Service for a small fee.

Configuration

Our extension works out of the box. However if your theme does not include jQuery library you need to enable it in our extension. To do this log to your Magento Admin and go to:

System > Configuration > Apptrian Extensions > Responsive Product Slider

Set **System > Configuration > Apptrian Extensions > Responsive Product Slider > General > Include jQuery** option to "Yes". Once again set this to "Yes" only if you did not already included jQuery library some other way. There is no need to include it twice or multiple times.

If you want to configure something differently you can.

All options are self explanatory and usually have tooltips for additional information.

After changing options make sure you refresh your Magento cache.
