```

Uninstallation

```
composer remove atconnect/magento-two-language-sk-sk
```

```
$ composer remove atconnect/magento-two-language-sk-sk
Loading composer repositories with package information
Updating dependencies (including require-dev)
- Removing atconnect/magento-two-language-sk-sk (2.3.3.0)
Removing Atconnect/MagentoTwoLanguageSkSk
Writing lock file
Generating autoload files
```

Configure language pack

Change user settings

1. Log in to your magento administration area.
2. Go to account settings.
3. Select the language for the language pack.

Change language of storefront

1. Log in to your magento administration area.
2. Go to store configurations.
3. Go to locale configuration and set up the language.

We recommend using command line:

```
php bin/magento config:set general/locale/code sk_SK
php bin/magento config:set general/region/state_required SK
```
