

USER GUIDE

1. Purchase language pack
2. Install language pack
3. Configure language pack

Purchase language pack

You can purchase language pack in Magento official store or AT Connect.

Installation

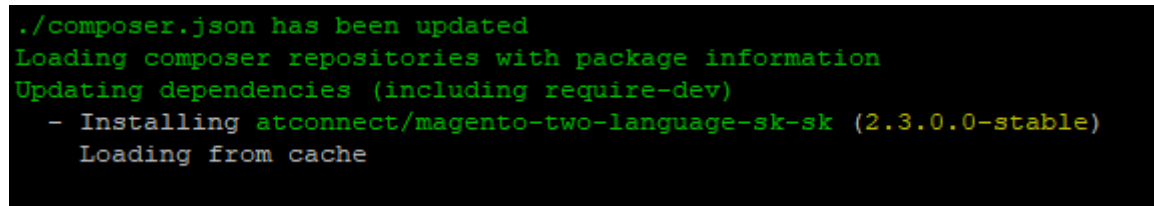

Purchased through Magento store

If you purchase language pack through the Magento official store, the installation should be processed using standard magento installation in your magento.

Purchased through AT Connect

If you purchased language pack through the AT Connect, please use composer to install it:

```
composer config repositories.atconnect composer https://connect20.aveo-trade.cz
composer require atconnect/magento-two-language-sk-sk:2.*
```

```
./composer.json has been updated
Loading composer repositories with package information
Updating dependencies (including require-dev)
 - Installing atconnect/magento-two-language-sk-sk (2.3.0.0-stable)
   Loading from cache
```

Configure language pack

Change user settings

1. Log in to your magento administration area.
2. Go to account settings.
3. Select the language for the language pack.

Change language of storefront

1. Log in to your magento administration area.
2. Go to store configurations.
3. Go to locale configuration and set up the language.

We recommend using command line:

```
php bin/magento config:set general/locale/code sk_SK
php bin/magento config:set general/region/state_required SK
```
