Easy Labels Pro Module

Prepared by: Paweł Wasiluk

Easy Labels Pro for Magento2

Module overview

Make your products more attractive with catchy and flashy labels. Modul enables you to create and assign labels freely to products chosen by yourself. Strong point of module is that single product can have its own special label. Easy Labels Pro lets you choose color for label from over 16 million colors or give label you custom class.

How it works

After installing the module, first thing you have to do is to enable module in configuration, to do so go to: **Stores > Settings > Configuration > Aurora > Easy Labels PRO > Easy Labels Pro Module Configuration**. To add a label head to Admin Panel go to **Catalog > EasyLabels PRO > Manage PRO Labels**. Click on **Add New Label** button to create your own label.

Label – set name for label

Discount Label – changes your label into “-x%” which reflects discount percentage for product

CSS class – set styling for label

Font & Background color – when clicked, window will show up that lets you pick color without much effort (window may look different on your operating system)

Enable Label – turns on or off visibility of label

Enable in listing– turns on or off visibility of label for listing

Store View – a store/store view that this category should be visible in

Conditions

Conditions (don't add conditions if rule is applied to all products)

If **ALL** of these conditions are **TRUE** :

Attribute Set is **Default** 

Under form you can see conditions by which label will be assigned to products. It works as generic condition rules (catalog price rules).

When finished, your label will be visible in **Catalog > Manage Pro Labels** grid.

To see the added **label** head to your chosen product at your store. The labels will appear under product's name and will line up if there is more than one.
