## Cross-sell Cart Popup

---

Prepared by: Marek Milewski

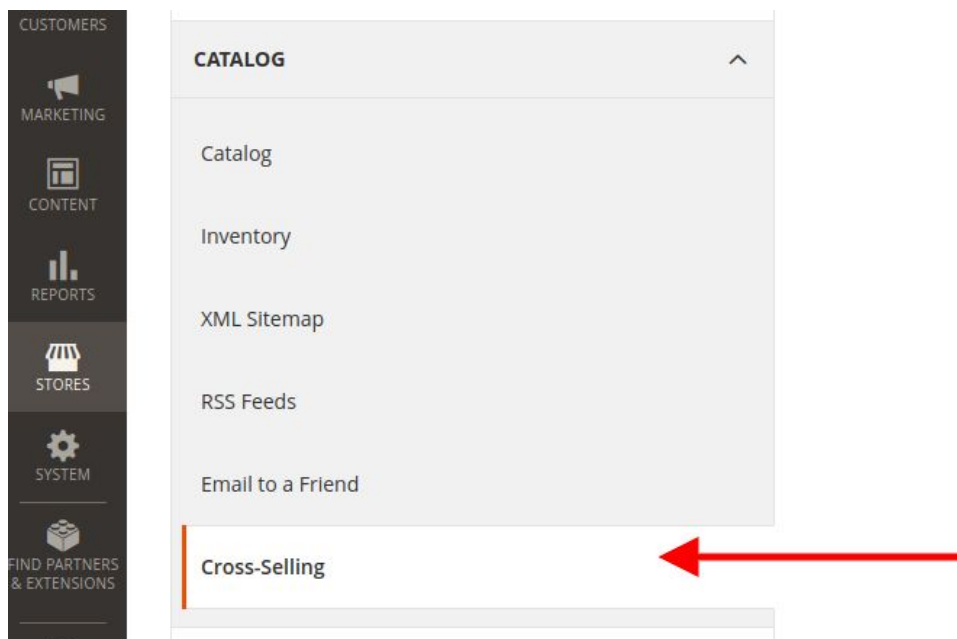

# Cross-sell Cart Popup for Magento2

## Module overview

The module allows you to display a popup after adding a product to the basket. Depending on the configuration set, the recommended products are displayed in the popup, as well as the missing value for free delivery.

## Configuration

After module has been installed, you should it setup. For this purpose, go to **Stores -> Configuration -> Catalog** and select menu "Cross-Selling"

We can choose from the following options:

<b>Module Enable</b> <small>[store view]</small>	Yes
<b>Show Free Shipping</b> <small>[store view]</small>	Yes
<b>Items Count</b> <small>[store view]</small>	8
<b>Free Shipping Rule</b> <small>[store view]</small>	Fixed
<small>Note: Fixed amount, or calculated based on cart rules.</small>	
<b>Amount</b> <small>[store view]</small>	1200

**Module Enable** – enables or disables the module

**Show Free Shipping** – show free delivery information

**Items Count**– number of products displayed in the popup

**Free Shipping Rule** – rule of free delivery

**Amount** – the amount of free delivery when choosing a fixed free delivery rule

## Action:

After saving the module configuration, and adding the product to the basket in the store, a popup is displayed.

## Important:

The products displayed in the popup come from the same category as the previously added product to the cart. If there is not enough products in category, number of displayed products will not reflect amount you have given in configuration.

## Produkt został dodany do koszyka

Warto połączyć z:

Spódnica z zakładką

39,99 zł

Sukienka tuba z golfem i wycięciem na dekolcie

79,99 zł

Do darmowej dostawy brakuje 1 134,97 zł

0,00 zł

1 200,00 zł
