Easy Instagram Widget

# Easy Instagram Widget for Magento2

## Description

The module allows you to display photos from Instagram in the Magento 2 store. This extension allows you to place photos from Instagram on any page of the site using the Widget, which will help attract the attention of customers and provide a modern, look to stores.

## How it works

To add photos from instagram, go to Admin Panel **Stores -> Configuration -> Catalog -> Catalog -> Instagram downloader**

Then specify:

**Type** - photos of instagram user (User) or given hashtag (Tag)

**Source** - Depending on the Type, this is the username or hashtag

**Accepted** - All photos will be accepted

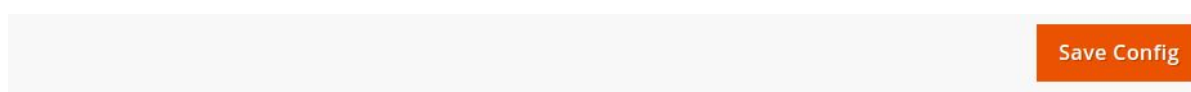

**Moderated** - WALL photos will be used

**Download** - Transferring photos from Instagram to Magento (you must first fill out all the fields and save the settings by clicking Save Config on the top right of the screen)

**Action** - Deleting items

**Enabled cron** - Cron allows you to download photos in an interval loop

**Cron Frequency** - download frequency

Instagram downloader (by Aurora)

Sources [global]	Type	Source	Accepted	Moderated	Download	Action
	Use ▼	tt	Yes ▼	Yes ▼	Get Photos	
	<input type="button" value="Add"/>					

This field allow to configure sources of instagram media items

Enabled cron [global] Yes ▼

If you enable cron media items will be downloaded in loop with interval

Cron frequency [global] Every 15 minutes ▼

In the tab **Catalog -> Instagram items** it is possible to select, edit and delete uploaded photos

12 records found 20 per page < 1 of 1 >
