

# User Guide

# What I can do after installation:

- [Basic concepts](#)
- [Create new Size Chart](#)
- [Attach a table to product category](#)

## Basic concepts

**Default dimension** (*Stores -> Configuration -> Averun -> Size Chart*). Choose default dimension - cm or inch. All sizes on user end will be showed in selected dimension by default. User can changed this value for your own session.

**Category of sizes** (*Content -> Size Chart -> Category*). Manage existing categories like Men, Girl, Boy, Baby, Body, Maternity or create new.

**Dimension** (*Content -> Size Chart -> Dimension*). There are two types: dimensions and regions. There are columns for chart size. Dimension will be used for show customer size such as Neck, Waist, Chest etc. Involved in determining the size of the user. Region is static text information such as XS, M, XL etc. Manage existing or add your own dimensions.

**Type** (*Content -> Size Chart -> Type*). Some grouped your products by type such as Top, Bottom, Dress, Swim, Suit, Outerwear, Shoes and Accessory. Manage existing or add your own types.

## Create New Size Chart

Go to *Content -> Size Chart -> Chart* and click **Add New Chart**. Fill all required fields. On next images can see what customer see on user end.

**Chart Edit**   ← Back   Delete   Save and Continue Edit   **Save**

5

There are two types of columns: dimensions and regions. Column with type Dimension must enter only as float value. For example: 10, 20.4 or 12.2-23.9. Please input all sizes in cm. Column with type Region can enter a string value. For example: X, XXL or 20-24. All Dimension fields will be used for calculating user sizes on user end.

- Men Shoes

*Product edit page*

## Attach a table to product category

Go to *Products* -> *Categories* and select category. Go to tab Content and choose attribute Chart:

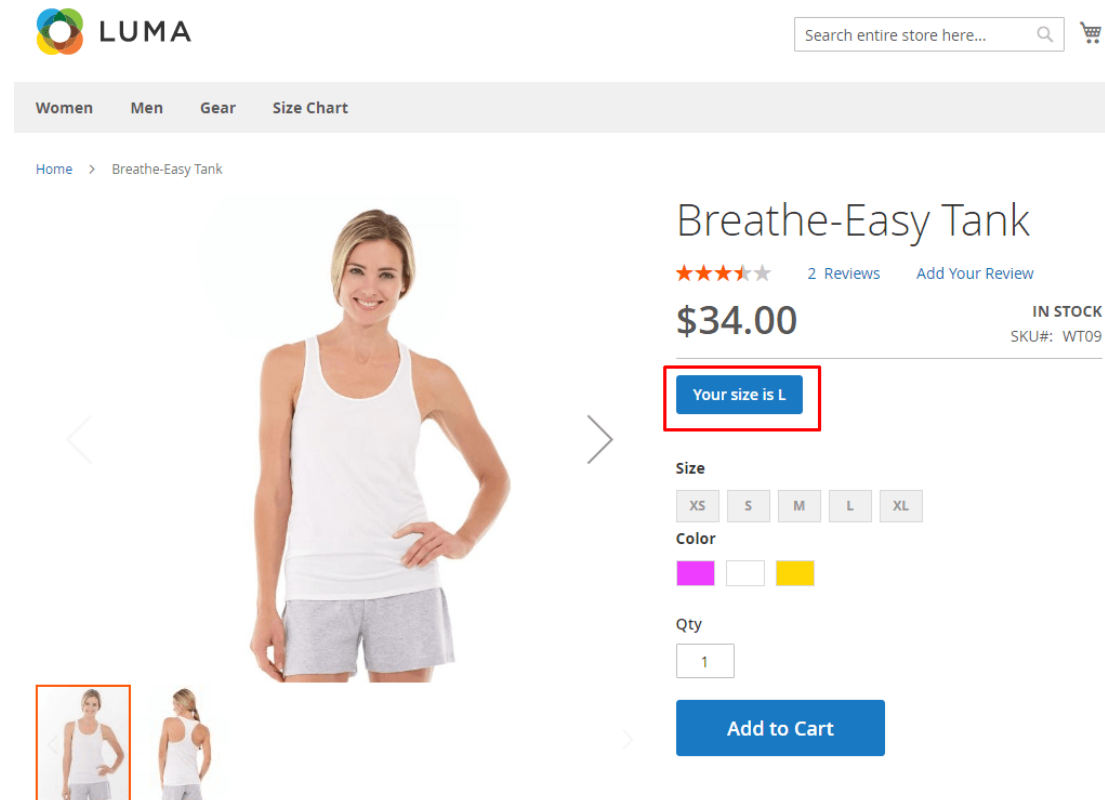

The screenshot shows the 'Category edit page' interface. At the top, the 'Category Name' field is set to 'Size Chart'. Below this, the 'Content' tab is active, showing a list of categories for the 'Size chart' attribute. The dropdown menu is open, displaying a list of categories including 'Women Tops', 'Men Tops', 'Girl Tops', 'Boy Tops', 'Women Bottoms', 'Men Bottoms', 'Girl Bottoms', 'Boy Bottoms', 'Women Dresses', 'Men Suit', 'Girl Dresses', 'Women Swim', 'Girl Swim', 'Women Outerwear', 'Men Outerwear', 'Girl Outerwear', 'Boy Outerwear', 'Women Shoes', and 'Men Shoes'. The 'Women Tops' option is highlighted in orange. Below the dropdown, the 'Size chart' field is visible, showing 'Women Tops' as the selected value. To the right of the dropdown, there is a rich text editor toolbar with options for font size, bold, italic, link, unlink, image, list, and HTML.

# How to show Size chart on our website?

To product page:

By default Size chart will be show on the product page. To view table in the popup need to click on the size button.

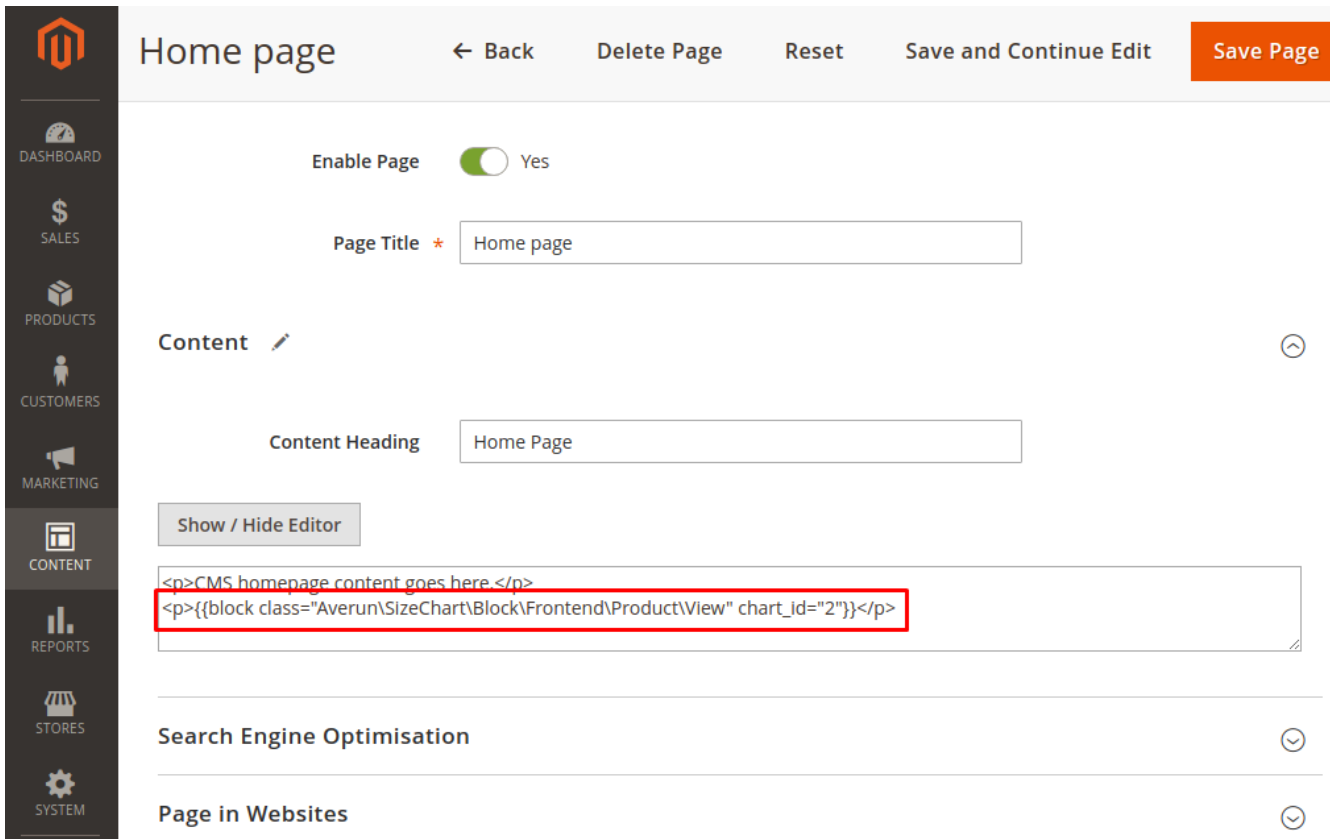

The screenshot shows the LUMA website interface. At the top left is the LUMA logo. A search bar contains the text "Search entire store here...". Below the search bar is a navigation menu with "Women", "Men", "Gear", and "Size Chart". The breadcrumb trail reads "Home > Breathe-Easy Tank". The main product image shows a woman wearing a white tank top and grey shorts. To the right of the image, the product title "Breathe-Easy Tank" is displayed, along with a 4-star rating, "2 Reviews", and "Add Your Review" link. The price is "\$34.00" and the status is "IN STOCK" with SKU# "WT09". A blue button labeled "Your size is L" is highlighted with a red box. Below this are size selection buttons for "XS", "S", "M", "L", and "XL". The "L" button is selected. Under "Color", there are three color swatches: purple, white, and yellow. The "Qty" field is set to "1". At the bottom is a blue "Add to Cart" button. In the bottom left corner, there are two small thumbnail images of the product, one of which is also highlighted with a red box.

## To CMS page:

You can insert Size Chart to custom place on the website in two variants: to custom CMS page from backend or in custom place via layout (\*.xml file) and template (\*.phtml file). See below how you can do it.

**Please note this part only for developers.**

1 Insert to content field in cms page block `{{block class="Averun\SizeChart\Block\Frontend\Product\View" chart_id="5"}}`, like this

The screenshot shows the CMS page editor for 'Home page'. The interface includes a top navigation bar with 'Home page', 'Back', 'Delete Page', 'Reset', 'Save and Continue Edit', and 'Save Page' buttons. A left sidebar contains navigation icons for Dashboard, Sales, Products, Customers, Marketing, Content, Reports, Stores, and System. The main content area has the following fields:

- Enable Page:** A toggle switch set to 'Yes'.
- Page Title:** A text input field containing 'Home page'.
- Content:** A section with a 'Content Heading' field containing 'Home Page' and a 'Show / Hide Editor' button.
- Content Field:** A text area containing the code `<p>CMS homepage content goes here.</p>` and `<p>{{block class="Averun\SizeChart\Block\Frontend\Product\View" chart_id="2"}}</p>`. The second line of code is highlighted with a red box.
- Search Engine Optimisation:** A section with a dropdown arrow.
- Page in Websites:** A section with a dropdown arrow.
