[S'abonner](#)

In order to make the set-up of BeezUP easier for online stores using Magento 2, a free plugin developed in cooperation between BeezUP and Magento community is available within Magento 2 Marketplace.

Thanks to this plugin, in some clicks, you will be able to generate a compatible product feed for BeezUP.

SUMMARY :

1 - Setting up of the plugin

2 - Product feed configuration

3 - Product feed address

4 - Need some help ?

1 - Setting up of the plugin

- 1) To set up the BeezUP-Magento plugin, you just have (like every other module) to go to "System" / "Tools", choose "Web Setup Wizard" and then "Component Manager".
- 2) Then go to your store administration panel : "System/Magento Connect/Magento Connect Manager"
- 3) proceed to the module installation as "usual". If you are not familiar with the process, you can follow this [one](#).

2 - Product feed configuration

Several options are available to set up your product feed :

Catalog Feed

| | | |
|--|---|---|
| Enable <small>[store view]</small> | Yes | ▼ |
| | www.yoursite.com/beezip/catalog/xml www.yoursite.com/beezip/catalog/configurable | |
| Mode Debug <small>[store view]</small> | No | ▼ |
| | Limit the number of products | |
| Catalog prices | Tax excl. | ▼ |

[store view]

Prices set with tax, or without tax

VAT Rates

[store view]

Delivery Time if Product in Stock

[store view]

Enter eg 1-2 for 1 to 2 days

Delivery Time if Product out of Stock

[store view]

Enter eg 6-8 for 6 to 8 days

Filter out of stock products

[store view]

Specific Attributes

[store view]

- Product Name
- SKU
- Description
- Short Description
- Price
- Special Price
- Cost
- Weight
- Manufacturer
- Meta Title

Enable Html in descriptions

[store view]

| | | |
|--|------------------|---|
| Visibility [store view] | Not Apply Filter | ▼ |
| Category Logic [store view] | Deepest Branch | ▼ |
| Child Url Logic [store view] | Get parent url | ▼ |
| Cache Delay [store view] | None | ▼ |

Refresh time of the cache export file in hours

- Enabled : Yes/No, it is highly recommended to click "Yes".
- Debug Mode : Yes/No, click on "No" unless you wish to export only 10 products to make some tests.
- Catalog price : indicate if your products prices are VAT included or not in your Magento.
- VAT rates : input your home country VAT rate (only used if you put "Excl taxes" to just above "Catalogue price" option).
- Delivery Time if product in stock : input the delivery time following this logic : x-y, for x to y days. Example: 2-3 for 2 to 3 days.
- Delivery Time if product out of stock : do the same for out of stock products.
- Filter out of stock products : Yes/No : you can decide not to export products with a stock level at 0.
- Specific attributes : choose attributes to export (you can add multiple attributes with CTRL).
- Enable HTML in variations : allow to tolerate HTML in your products description fields (see following option)
- Visibility : allows to choose between different "visibility" products you want to export. By default "Catalog, Search, and both"
- Categories Logic : allows to choose between 2 different categories algorithm.
- Child Url Filter : allows to choose the type of URL to use for children products
- Cache delay : allows to save generated file (after a 1st call) in a cache folder for a duration you define.

Do not forget to save your configuration at the top right of the screen once everything is set up!

3 - Product feed address

This plugin generates only one different feed :

=> <http://www.storename.com/beezip/catalog/xml>

4 - Need some help ?

Feel free to send us a ticket on help@beezip.com by writing your issue precisely, and, if possible, your Magento admin access.
