

## 1. Introduction to Configurable Group Products for Magento 2.0

This extension helps to combine the functionality of Configurable and Group products. The process of creation of such a product looks completely like the creation of a Configurable product, although the last attribute is deployed on Frontend as a Group product.

This functionality is really useful in case your customers purchase several combinations of a product at once. The extension supports Tier pricing and allows to display the quantity for each combination on Frontend.

### Key features:

- The last attribute of a Configurable product can be deployed on Frontend as a Group product for some particular products;
- Several simple products that are part of a Configurable product can be added to cart at once;
- A possibility to display quantity for each simple product that is part of a Configurable product;
- A possibility to use Tier price;
- A possibility to display Tier price in the default way or as Tooltips;
- If a combination is out of stock, this selection gets inactive.

## 2. How to Configure

Navigate to **Stores => Configuration**. Open the section called “**BelVG extensions**”, find the “**Configurable Group**” extension in this section, and click to open its settings.

- **Enabled For Frontend** - select “**Yes**” to enable the extension for Frontend;
- **Tier Price into Tooltips** - if “**No**” is selected here, the Tier price is displayed in the default way. If “**Yes**” is selected here, tooltips are enabled;
- **Show Available Quantity** - Select “**Yes**” if you would like to display the quantity available for each simple product.

The screenshot shows the 'Extension configuration' page for the 'Configurable Group' extension. It is divided into two sections: 'General' and 'Settings'. The 'General' section includes a notice box with the BelVG logo and text stating the module was developed by www.BelVG.com, with links to docs and examples. Below this is the 'Enabled For Frontend' setting, which is set to 'Yes' and applies to the '[STORE VIEW]'. The 'Settings' section contains two settings: 'Tier Price into Tooltips' and 'Show Available Quantity', both set to 'Yes' and also applying to the '[STORE VIEW]'.

**Extension configuration**

**General**

This module was developed by [www.BelVG.com](http://www.BelVG.com).  
For docs & examples refer to the BelVG [web site](#).  
We have the largest selections of [extensions](#) and [themes](#) on Magento.

Enabled For Frontend Yes [STORE VIEW]

**Settings**

Tier Price into Tooltips Yes [STORE VIEW]

Show Available Quantity Yes [STORE VIEW]

Then create a Configurable product. Find “Configurable as Group” and select “Yes” to deploy the last attribute of the Configurable product as a Group product on Frontend.

The screenshot shows the Magento 2 product configuration interface. At the top, there is a 'Description' field with a rich text editor toolbar. Below it is a 'WYSIWYG Editor' button. The 'Configurable as Group' attribute is set to 'Yes', which is circled in red. A handwritten note with an arrow points to this attribute, stating: "Choose whether to show this configurable product as a bundle product". Below this are four attribute fields: 'Color', 'Size', 'Color', and 'Size', each with a dropdown menu and a '[GLOBAL]' label. The 'Configurations' section is visible below, with a 'Close' button. It contains a text block explaining configurable products and two buttons: 'Add Products Manually' and 'Edit Configurations'. Below this is a 'Current Variations' table with columns for Image, Name, SKU, Price, Quantity, Weight, Color, Size, and Actions.

Image	Name	SKU	Price	Quantity	Weight	Color	Size	Actions
	gkb-Blue-XS	gkb-Blue-XS	\$20.0000			Blue	XS	Select ▾
	gkb-Blue-S	gkb-Blue-S	\$20.0000			Blue	S	Select ▾

### 3. How to Use

On this example you can see a product that is a sports uniform. Usually it's purchased for the whole team at a time, so our extension is the perfect fit in this case.

Let's see how it makes customers' life easier. Customers can select a Color, then they will see Sizes available for this Color. They can enter the quantity for each Size. Customers can add several uniform sets to cart all at once and don't have to add each one of them separately.
