

Billingmaker Payment Extension for Magento

With Billingmaker Payment you can easily integrate the payment method SEPA Direct Debit into your order process in the shop.

Please follow these steps to get started:

1. Register your Billingmaker Payment merchant account here <https://payment.billingmaker.com/register/>.
2. Install this extension via manual upload or the Magento Store.
3. Insert your merchant id in the plugin configuration:

The screenshot shows the Magento Admin Panel interface. The top navigation bar includes 'Magento Admin Panel', a search bar, and user information. The main menu on the left lists various configuration areas. The central panel is titled 'Zahlungsarten' (Payment Methods) and shows the configuration for 'Billingmaker Payment'. The 'Aktiviert' (Activated) checkbox is checked. The 'Handler ID' field contains the value '131' and is circled in yellow. Below the configuration fields, there is a section for 'Handler-Ort' (Handler Location) with a list of payment methods including PayPal, Kreditkarten, and others.

4. You can set up more details like the payment method title here.
5. If you like to have recurring payment or other payment method, please edit the source code of the extension, contact a programmer or our support team.
6. Here you can find a video tutorial: https://www.youtube.com/watch?v=nGGYZ_xa6pQ.
