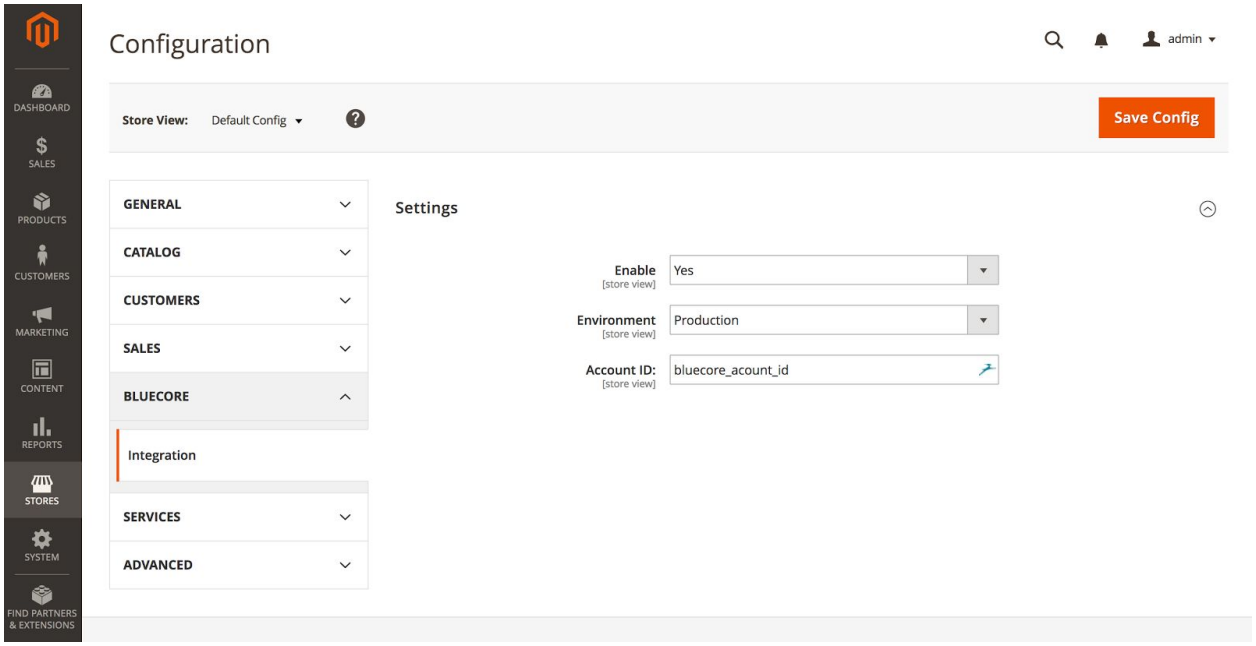
Integrate with Magento 2

To configure your Bluecore Magento 2 extension:

1. Navigate to **Magento Admin > Stores > Configuration > Bluecore**.



2. Configure the **settings**:
    - **Enable** - **Enable** or **Disable** all tracking functionality.
    - **Environment** - Set the current Magento server to **Development** or **Production**.
    - **Account ID** - Namespace for this site provided by Bluecore.
3. Click **Save Config**.
4. Once installed, navigate to **Bluecore > Data > Integrations.** The Installed Integrations display.
5. Click **New Integration > Marketplace**. The App Marketplace displays.
6. Navigate to the Magento 2 app by searching for it. Once found, click **Install**.
7. Click **Connect** to activate the account.
8. Click **Save**.
