

User guide

Extension connections

After installation, go to Magento admin and input the configurations in **Bluestone PIM > Configurations**.

- **API Endpoints**
- **Authorization**

Please contact magentosupport@bluestonepim.com, to request this information.

Categories

After setting up the connections to Bluestone PIM, you will be able to select a category to sync. Go to **Bluestone PIM > Configurations**. Navigate to Sync Category. You can select a category to sync.

Sync

To sync product data, go to **Bluestone PIM > Dashboard**. Click the **Sync with Bluestone PIM** button

Important notes

- When initializing a sync with Bluestone PIM, the actual starting time of the operation will depend on your Magento cron settings. Please set the cron to run as often as every minute to ensure the sync starts promptly.
- If you're experiencing problems, please ensure you have the correct settings in the extension configuration for both API Endpoint URL and Authentication Key.
