

Magento 2 Integration

Supported Versions

Magento 2.1.0 or greater

Composer PHP Dependency Manager

1. Plugin Installation

- Open command prompt, go to `<MAGENTO_ROOT>` folder and run the following commands:

Shell

```
$ composer require boltpay/bolt-magento2
$ php bin/magento setup:upgrade
$ php bin/magento setup:static-content:deploy
$ php bin/magento cache:clean
```

2. Plugin configuration

Login to the store admin panel.

Navigate to `Stores` → `Configuration` → `Sales` → `Payment Methods` → `Bolt Pay` .

The essential settings are described below.

- `Enabled` dropdown enables / disables the Bolt Payment method.
Select **Yes** to enable it.
- Enter an appropriate `Title` such as ***Credit & Debit Cards***

API credentials

Docs ▾

For production, these will be found at:

<https://merchant.bolt.com>

For sandbox mode, use the following URL:

<https://merchant-sandbox.bolt.com>

- **API Key**

used for calling Bolt API from your back-end server

- **Signing Secret**

used for signature verification in checking the authenticity of webhook requests

- **Publishable Key - Multi Step**

used to open the Bolt Payment Popup typically on Shopping cart and product pages

- **Publishable Key - Payment Only**

used to open the Bolt Payment Popup typically on checkout pages

- **Sandbox Mode**

setting up testing vs. production execution environment

- **Automatic Capture Mode**

capturing funds configuration

YES - both authorization and capture are done in a single step

i **NO** - the funds are captured in a separate request, initiated either from the store admin panel or from the Bolt merchant dashboard

- **Replace Button Selectors**

comma separated list of CSS selectors matching the elements to be replaced with Bolt checkout buttons, or Bolt checkout buttons placed alongside them

i **Selector options**

no suffix - the default

inserts Bolt button in place of the element and removes the element

Docs ▾

3. Bolt Merchant Dashboard configuration

i Login to the Bolt Merchant Dashboard

Production: <https://merchant.bolt.com>

Sandbox: <https://merchant-sandbox.bolt.com>

- Navigate to `Settings` → `Keys and URLs`
- Scroll down to the `URL Configurations` section
- Set **Webhook** URL to: `[store_url]/rest/V1/bolt/boltpay/order/manage`
- Set **Shipping and Tax** URL to: `[store_url]/rest/V1/bolt/boltpay/shipping/methods`

Success!

Your Bolt Payment Plugin is now installed and configured.
