

1. To install, please **log-in to your Magento Admin Panel**

The screenshot shows the Magento Admin Panel login interface. On the left is the Magento logo. The main heading is "Log in to Admin Panel". Below it are two input fields: "User Name:" and "Password:". A link for "Forgot your password?" is located below the User Name field. A "Login" button is positioned to the right of the Password field. At the bottom, a footer states: "Magento is a trademark of Magento Inc. Copyright © 2017 Magento Inc."

2. Go to System -> Tools -> Compilation and disable compilation if it enabled

The screenshot displays the "Compilation" page in the Magento Admin Panel. At the top right, there are two buttons: "Disable" and "Run Compilation Process". Below these is a table titled "Compilation State" with the following data:

Compilation State	
Compiler Status	Enabled
Compilation State	Compiled
Collected Files Count	7102

3. Go to System -> Magento Connect -> **Magento Connect Manager**

## Log In

Please re-enter your Magento Administration Credentials.  
Only administrators with full permissions will be able to log in.

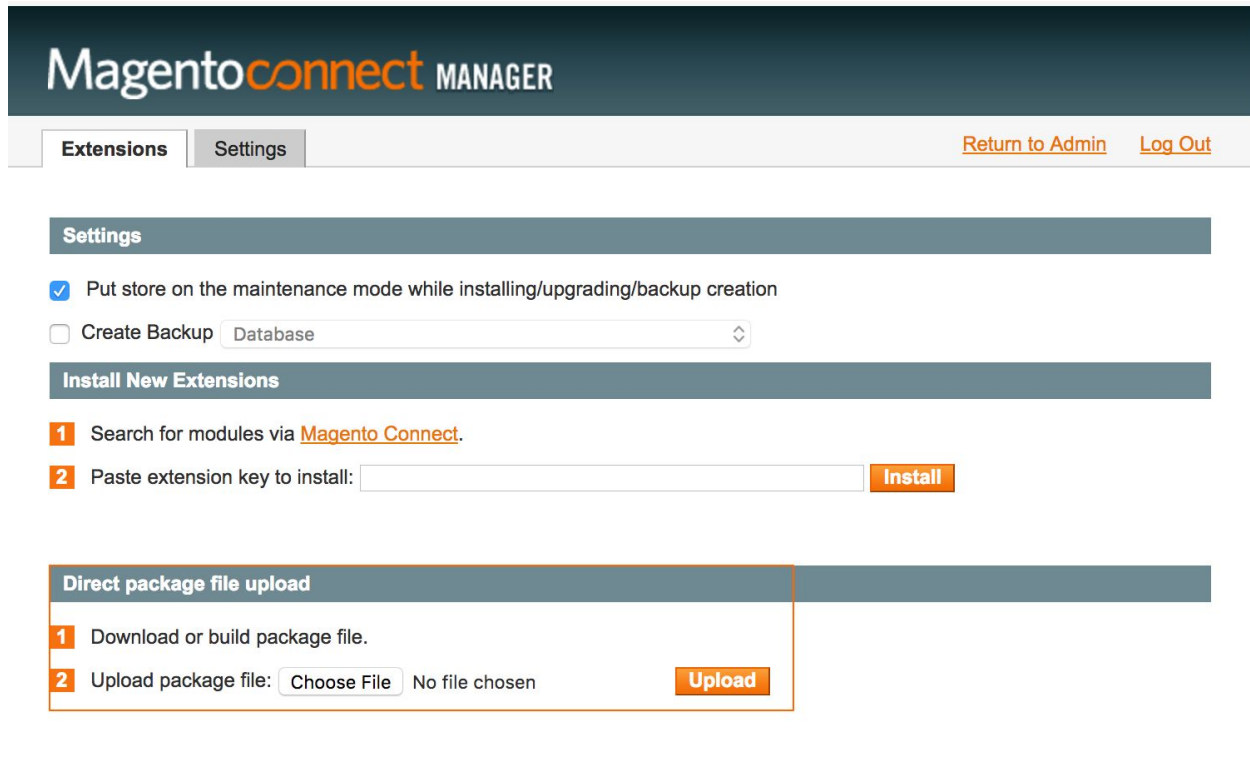

Username:

Password:

[Log In](#)

4. Enter your Magento **username** and **password** for the Magento Connect Manager

5. Under the **Direct package file upload** section, select the **Choose File** button

The screenshot displays the Magento Connect Manager interface. At the top, there is a dark header with the logo 'Magentoconnect MANAGER'. Below the header, there are two tabs: 'Extensions' and 'Settings'. In the top right corner, there are two links: 'Return to Admin' and 'Log Out'. The main content area is divided into several sections. The 'Settings' section is highlighted with a dark blue bar and contains two options: a checked checkbox for 'Put store on the maintenance mode while installing/upgrading/backup creation' and an unchecked checkbox for 'Create Backup' with a dropdown menu set to 'Database'. Below this is the 'Install New Extensions' section, which includes a numbered list: '1 Search for modules via [Magento Connect](#).' and '2 Paste extension key to install:' followed by an input field and an 'Install' button. The 'Direct package file upload' section is highlighted with a red box and contains a numbered list: '1 Download or build package file.' and '2 Upload package file:' followed by a 'Choose File' button, the text 'No file chosen', and an 'Upload' button.

6. Select the extension file and click **upload**

7. Click on the **Return to Admin** text link at the top of the page

8. Go to System -> Cache Management and select the **Flush Magento Cache** button

9. Finally, **log-out** and **log back into your Admin panel** to complete the installation process and apply new permissions
