1. Bundle Option Image for Magento 2 Overview

Bundle Option Image for Magento 2 extension allows showing images of children products in Bundle products page. It supports all input types of bundle product options: drop-down, radio button, check box and multiple select. This is the ideal extension for Bundle product type.

2. How does Bundle Option Image for Magento 2 Work?

Please go to **Stores** → **Configuration** → **BSSCommerce** → **Bundle Option Image**

2.1. General

General Options

Enabled [store view] Yes Choose 'Yes' to enable module.

Class Options of Bundle Product [store view] input.bundle.option,select.bundle.option Use system value
Edit this field to add classes.

In **Enabled**: choose Yes to enable the extension, or No to disable it.

Note: The module works with only Bundle product.

In **Class Options of Bundle Product**: in case your website theme was customized, which makes this theme not have classes of bundle product options like default Magento 2, therefore, the module is not compatible with your website. In this situation, you can add classes to theme of your website:

+ Add class “input.bundle.option” to show product images in radio button option and checkbox option.

+ Add class “select.bundle.option” to show product images in drop-down option and multiple select option.

+ Add both 2 classes to show product images for all input types.

Note: if your website does not have theme customized and this module is completely compatible with your website, you needn't configure this section.

2.2. Image size setting

Image Size Settings

Image Width (px) Use system value
[store view]

Image Height (px) Use system value
[store view]

In **Option Image Width (px)**: set image width for displayed children products.

In **Option Image Height (px)**: set image height for displayed children products.

2.3. Configure images in sliders in Multiple select option

Multiple Select

Number of Images per Slider Use system value
[store view]
Number of images shown in a slider

Slide Speed Use system value
[store view]
Transition duration (in milliseconds) between two continuous slides. // ex = speed:400;

Auto Slider Use system value
[store view]

In **Number of items per slide**: set Number of child product images per slide in slider of Multiple Select option.

In **Slide Speed**: set the duration between the transfer of 2 continuous sliders (unit: milliseconds)

In **Auto Slider** (Yes/No): choose Yes to set the automation of showing sliders (sliders run each 5 seconds) in Multiple Select option, or No to not set it.

Note: After setting, you must save your configuration then flush cache to start using the module.
