

CONFIGURABLE PRODUCT WHOLESALE DISPLAY FOR MAGENTO 2 USER GUIDE

The screenshot shows the BSS Commerce M2 interface for a configurable product wholesale display. It features a color selection bar with four options (light blue, dark blue, orange, white). Below this is a table with columns for SIZE, AVAILABILITY, SUBTOTAL, and QTY. The table contains two rows: M (25, 5\$, 2) and L (20, 6\$, 1). An orange 'ADD TO CART' button is positioned below the table. The text 'Configurable Product Wholesale Display' is displayed at the bottom of the interface.

SIZE	AVAILABILITY	SUBTOTAL	QTY
M	25	5\$	2
L	20	6\$	1

1. Configurable Product Wholesale Display for Magento 2 Extension Overview

[Configurable Product Wholesale Display for Magento 2](#) displays all associated products in a grid table view which allows wholesale customers to order and add all chosen items to cart at once. This extension not only enhances display for configurable products, but helps customers simplify selecting items process as well. It absolutely deserves to be a brilliant solution for any Magento site for selling larger quantity.

2. How does Configurable Product Wholesale Display for Magento 2 Extension work?

2.1. Function of Configurable Product Wholesale Display for Magento 2

- Show associated products in a grid table with all options, so that customers just need to enter quantity and then add all chosen products to cart by one click.
- Show SKU, Availability, Unit Price, Tier Price and Subtotal in this grid table. Especially, the module supports showing Tier Price as Tooltips when hovering on it.
- Show Price Range for configurable products.
- Show selected quantity details based on options of the first attribute below the table.

The screenshot shows the 'Hero Hoodie' product page with several annotations:

- Show Price Range for configurable product:** Points to the price range 'From: \$40.00 To: \$54.00'.
- Show Unit Price with Special Price for each child product:** Points to the unit price '\$52.00' and the special price '\$54.00' in the table.
- Options of attributes on the grid table can be clickable:** Points to the 'S' size option in the table.
- Show quantity details as the first attribute below the table:** Points to the 'Total Qty 3' summary.
- Show Tier Price as Tooltips when hovering on children products:** Points to a tooltip showing volume discounts: 'Buy 3 for \$48.00 each and save 6%', 'Buy 7 for \$45.00 each and save 12%', and 'Buy 10 for \$42.00 each and save 18%'.

Size	Availability	Unit Price	Subtotal	Qty
XS	100	\$52.00 \$54.00	\$156.00	3
S	100	\$54.00	\$0.00	0
M	100			
L	100			
XL	100	\$51.00 \$54.00	\$0.00	0

Color: Black (selected), Grey, Green

Total Qty: 3

Total: \$156.00

Add to Cart

- Work well with Color swatch function of Magento default with clickable options. Customers can still click options to see images of children products.
- Work well with all type of custom options.

2.2. How to configure Configurable Product Wholesale Display for Magento 2 in the backend

Go through **System** → **Configuration** → **BSSCommerce** → **Configurable Product Wholesale Display**.

The screenshot shows the configuration interface for the 'Configurable Product Wholesale Display' module. The 'Enabled' dropdown is set to 'Yes'. The 'Display Attributes' section lists several attributes: Sku, Availability, Unit Price, Subtotal, and Tier Price. The 'Display Stock Number' dropdown is set to 'Yes'. The 'Advanced Tier Price' dropdown is set to 'No'. The 'Price Range' dropdown is set to 'Yes'. Red callout boxes provide additional instructions: 'Choose attributes to show in the grid table for laptops' points to the 'Display Attributes' list, and 'Support Advanced Tier Price so that total quantity will be calculated as all children products added to cart' points to the 'Advanced Tier Price' dropdown.

- **Enabled:** choose Yes to enable the extension.
- **Display Attributes:** choose attributes to show in the grid table for laptop as wish.
- **Display Stock Number:**
 - Choose **Yes** to show number of stock in the grid table.
 - Choose **No**, it will show stock status: In stock and Out of stock.
- **Advanced Tier Price:**
 - Choose **Yes:** total amount is based on tier price of total quantity of children products added to cart.

➔ **Note:**

- This feature is only applied for children products having same tier prices. That means: if a configurable product has 50 children products, all 50 children products need to have the same tier price.
- If there is at least 1 children product does not have tier price or have different tier price with others, this feature will not be applied

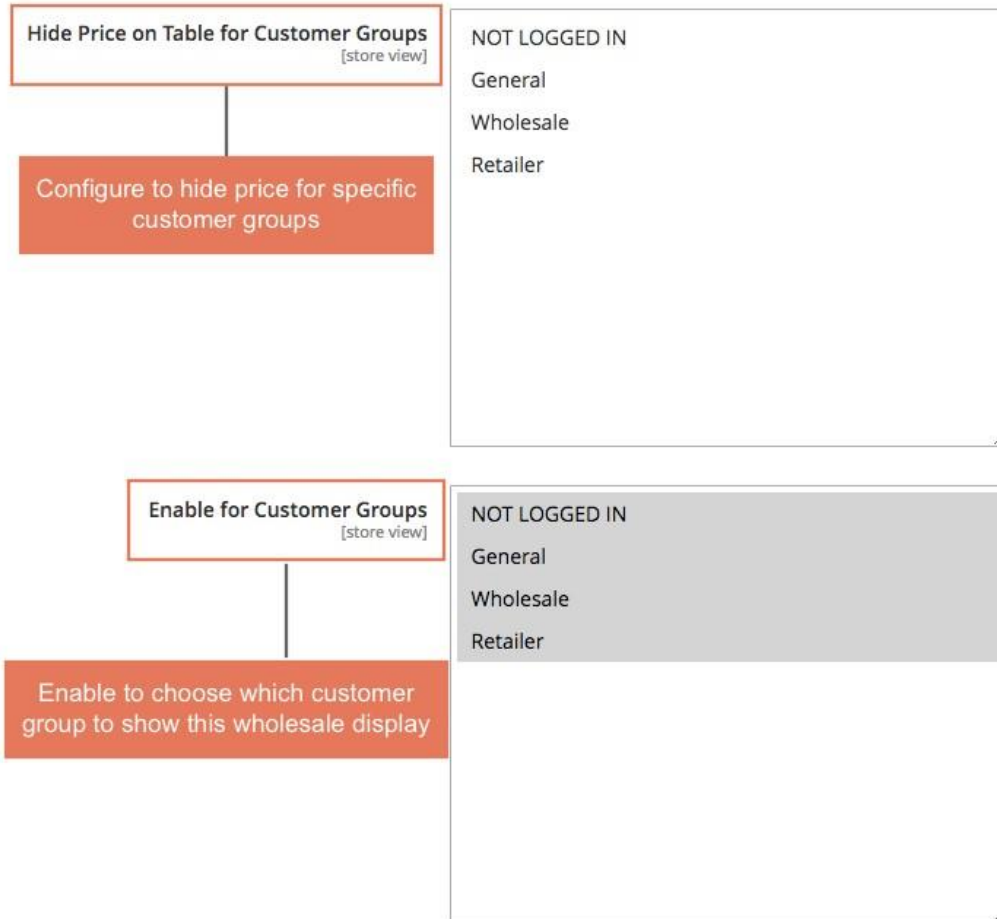

For example, tier price of buying 1-9 Black-S shirt, 1-9 Gray-S shirt is similarly \$45. Tier price of buying 10-more for every children products is \$40. Therefore, when you buy 3 Black-S shirts and 7 Black-XL shirts, tier price is now \$40/shirt. Total amount is now \$400.

- Choose **No**: total quantity will take default tier price, which means that total amount is calculated by tier prices of each children product multiply to total quantity of each chosen children product.

For the above example, when using Magento default tier price calculation, total amount is determined as \$450 because it is calculated based on each tier price of each children product (Tier price is equal to \$45/shirt)

- **Price Range:**

- Choose **Yes** if you want to display Price Range for configurable product above the table.
- If not, choose **No**.

- **Hide Price on Table for Customer Groups:** choose which customer group you want to hide price.
- **Enable for Customer Groups:** choose which customer group to show this wholesale display.

Choose color for background and text of Header Row of the table

Header Row Background Color [store view] C35519

Header Row Text Color [store view] FFFFFFFF

Enabled Mobile Display [store view] Yes
Choose 'yes' to enable display on mobile (less than 480px).

Display Mobile Attributes [store view]

Choose attributes to show in the grid table for mobile

Sku
Availability
Unit Price
Subtotal
Tier Price

- **Header Row Background Color:** choose color you want for Header Row Background
- **Header Row Text Color:** choose color for Header Row Text as wish
- **Enabled Mobile Display:** choose **Yes** to make it responsive on mobiles
- **Display Mobile Attributes:** choose attributes to show in the grid table view for mobiles

The screenshot shows the configuration interface for the Configurable Product Wholesale Display. It features two main sections:

- Enabled Tablet Display** [store view]: A dropdown menu currently set to "Yes". Below it, a note states: "Choose 'yes' to enable display on tablet (less than 1024px)."
- Display Tablet Attributes** [store view]: A list of attributes to be displayed in the grid table on tablets. The visible attributes are: Sku, Availability, Unit Price, Subtotal, and Tier Price. The "Unit Price", "Subtotal", and "Tier Price" rows are highlighted in grey.

A red callout box with the text "Choose attributes to show in the grid table for tablet" points to the attribute selection area.

- **Enabled Tablet Display:** choose **Yes** to make it responsive on tablets.
- **Display Tablet Attributes:** choose attributes you want to show in the grid table on tablets.
