

# 1. Overview

Configurable Product Wholesale Display for Magento 2 displays all associated products in a grid table view to add multiple children products at once.

This extension absolutely deserves to be a brilliant solution for any Magento site for selling large quantity, like B2B websites.

## 2. How Does It Work?

### 2.1 In the frontend

Home > Hero Hoodie

# Hero Hoodie

From \$29.00 To \$54.00 IN STOCK  
SKU#: MH07

Color Black

Size	SKU	Availability	Unit Price	Subtotal	Qty
S	MH07-S-Black	94	\$51.00 <del>\$54.00</del>	\$255.00	5
M	MH07-M-Black	96			
L	MH07-L-Black	92	\$40.00 <del>\$54.00</del>	\$400.00	10
		36			Total Qty 36
				Total	\$1,539.00

Buy 3 for \$50.00 each and save 4%  
Buy 6 for \$45.00 each and save 14%  
Buy 10 for \$40.00 each and save 24%

- Show Price Range for configurable products.
- Show associated products in a grid table with custom options, for example, color and size
- Show SKU, Availability, Unit Price, Tier Price, and Subtotal in this grid table. Especially, Tier Price is shown in tooltips when hovering.
- Work well with Color swatch function of Magento default with clickable options.

- Support all type of custom options.

## 2.2 In the backend

Go through **Stores ⇒ Configuration ⇒ BSSCommerce ⇒ Configurable Product Wholesale Display**.

### General

**Enabled** [store view]  Version 1.2.6

**Display Attributes** [store view]

Sku
Availability
Unit Price
Subtotal
Tier Price
Excluding Tax Price

Exclude Tax option is applied only when product price is set displayed with Including and Excluding Tax

**Display Stock Number** [store view]

**Advanced Tier Price** [store view]

**Price Range** [store view]

**Ajax Load** [store view]

- **Enabled:** choose Yes to enable the extension.
- **Display Attributes:** choose attributes to show in the grid table as wished.
- **Display StockNumber:** choose **Yes** to show the number of stock in the grid table. Choose **No**, it will show stock status: In stock or Out of stock.
- **Advanced TierPrice:**

+ Choose **Yes** then the total amount is based on tier price of the total quantity of children products added to cart.

This feature is only applied if all added children products having the same tier prices.

For example, the tier price of buying 1-9 Black-S shirt, 1-9 Gray-S shirt is similarly \$45. Tier price of buying 10-more for every children product is \$40. If you buy 3 Black-S shirts and 7 Black-XL shirts, tier price is now \$40/shirt. The total amount is now \$400.

+ Choose **No**: total quantity will take the default tier price. The total amount is calculated by tier prices of each children product multiply to the total quantity of each chosen children product.

For the above example, when using Magento default tier price calculation, the total amount is determined as \$450 because it is calculated based on each tier price of each children product (Tier price is equal to \$45/shirt)

- **PriceRange**: choose **Yes** if you want to display Price Range for the configurable product above the table.
- **Ajax Load**: choose Yes to load wholesale display table by using Ajax

*\*Note:*

For version 1.1.1, there is another configuration in the product setting, called BSS Configurable Product Wholesale Ajax Load as below. The extension takes priority to the configuration for each product over the general setting.

The screenshot shows the configuration interface for the 'Hero Hoodie' product. It includes several settings:

- Sale [global]**: A toggle switch set to 'No'.
- Format [global]**: A dropdown menu.
- Bss Configurable Product Wholesale Ajax Load [store view]**: A dropdown menu with options 'Yes', 'No', and 'Use config'. The 'Yes' option is selected and highlighted in blue.
- Content**: A section with a pencil icon for editing.

Also, choose groups to enable Configurable Product Wholesale Display

Hide Price on Table for Customer Groups

## 2.3. Choose the order of attributes

The order of custom attributes shown in configurable product wholesale display is based on the order of selected attributes when you create the configurable product.

For example, you create the Hero Hoodie with two custom options: size and color. Here you see the size is arranged above the color:

## Step 2: Attribute Values

Select values from each attribute to include in this product. Each unique combination of values creates a unique product SKU.

**Size (20 Options)** [Select All](#) | [Deselect All](#)

<input checked="" type="checkbox"/> S	<input checked="" type="checkbox"/> XS	<input type="checkbox"/> 65 cm
<input type="checkbox"/> 6 foot	<input type="checkbox"/> 75 cm	<input checked="" type="checkbox"/> M
<input checked="" type="checkbox"/> XL	<input checked="" type="checkbox"/> L	<input type="checkbox"/> 8 foot

**Color (12 Options)** [Select All](#) | [Deselect All](#)

<input checked="" type="checkbox"/> Black	<input type="checkbox"/> Blue	<input type="checkbox"/> Brown
<input checked="" type="checkbox"/> Gray	<input checked="" type="checkbox"/> Green	<input type="checkbox"/> Lavender
<input type="checkbox"/> Red	<input type="checkbox"/> White	<input type="checkbox"/> Yellow

Hence, in the product page, size options are above the color options.
