### 1. Wholesale Fast Order for Magento 2 Overview

Wholesale Fast Order For Magento 2 extension can assist customers in purchasing a large number of multiple products and adding all of them to cart at once instead of spending lots of time to order each. Therefore, with this Magento 2 extension developed by BSS Commerce, online wholesaler customers will be no longer delayed even one second while purchasing.

### 2. How Does Wholesale Fast Order for Magento 2 work?

#### 2.1. In the frontend

Wholesale Fast Order For Magento 2 extension optimizes order process and decreases buying time. Accordingly, there is a **Fast Order form** in the storefront for customers to search, select, and add multiple products to the shopping cart without reloading product page by product page.

To check wonderful features of our Magento 2 Wholesale Fast Order begin, please navigate to the steps:

#### **Step 1: Go to Magento 2 quick order form**

Select either of these two ways:

- Click “**Fast Order**” shortcut in the sidebar of the website. (The display of this shortcut is based on the backend configuration.)
- Access directly Fast Order CMS Page.

The screenshot displays the 'Wholesale Fast Order' page. At the top, there is a navigation bar with 'Fast Order' highlighted. Below it, a search bar contains 'MH', and a dropdown menu shows two product suggestions: 'Chaz Kangaroo Hoodie' (SKU#: MH01, \$52.00) and 'Teton Pullover Hoodie' (SKU#: MH02, \$70.00). A table below the search bar shows the current cart items: 'Crown Summit Backpack' (Qty: 1, Subtotal: \$38.00) and 'Chaz Kangaroo Hoodie' (Qty: 1, Subtotal: \$52.00). The 'Add lines' button is highlighted with a callout that says 'Click to add more line in CMS page'.

As can be seen from the form, there are various fields to fill in, making the shopping experience as fast as possible.

## Step 2: Choose products to add to cart

- In **Search box**, type some characters of product name or SKU.

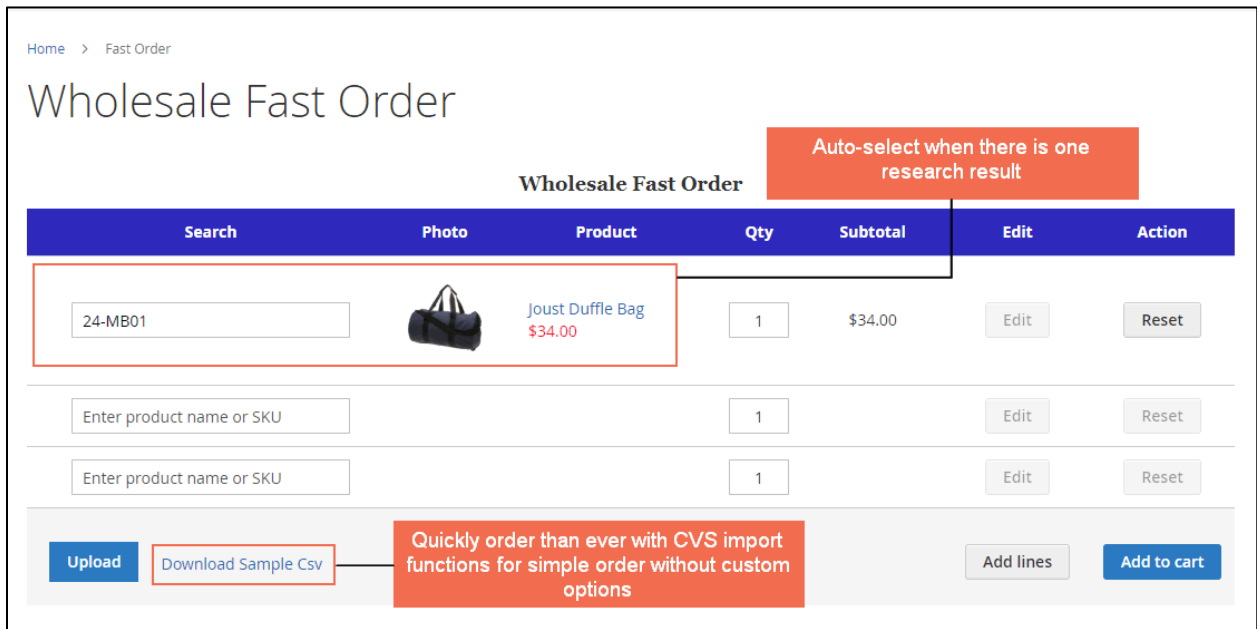

The smart autosuggestion function of Magento 2 Wholesale Fast Order extension will quickly display the possible results. Just click on the product you want to add to cart. Even better, if there is one and only product name or SKU matched, it will be auto selected.

*Note:*

A popup will be loaded and shown on selecting the item with custom options (including configurable product, grouped product, or simple product with custom option) to select desired options. One more time, Magento 2 Wholesale Fast Order frees shoppers from loading pages.

- What's more, Magento 2 Wholesale Fast Order extension also supports **CSV import** function. If customers have their own list of products and attributes, then they can upload it to the quick order form.

To do so, please follow:

- Download the Sample CSV file
- Input CSV file as format: SKU and quantity of products
- Click Upload button to upload this file

Afterward, some information of product will be shown such as **Photo**, **Product Name**, **Unit Price**. Customers feel no interruption during shopping since they do not need to load the mini shopping cart.

### Step 3: Choose other product attributes

- In **Quantity box**, enter the number of items. Then, the **Subtotal** will be immediately updated.
- To modify product attributes and other custom options, choose **Edit** button. Whereas, clicking **Reset** button means deleting the chosen product.
- Click **Add lines** button to expand the fast order form as wanted.

### Step 4: Add all to cart

On completing selecting products and their attributes, please select **Add to cart** button to add all to the shopping cart.

### Step 5: Check the mini cart and Proceed to Checkout.

## 2.2. In the backend

### 2.2.1. Fast Order CMS Page

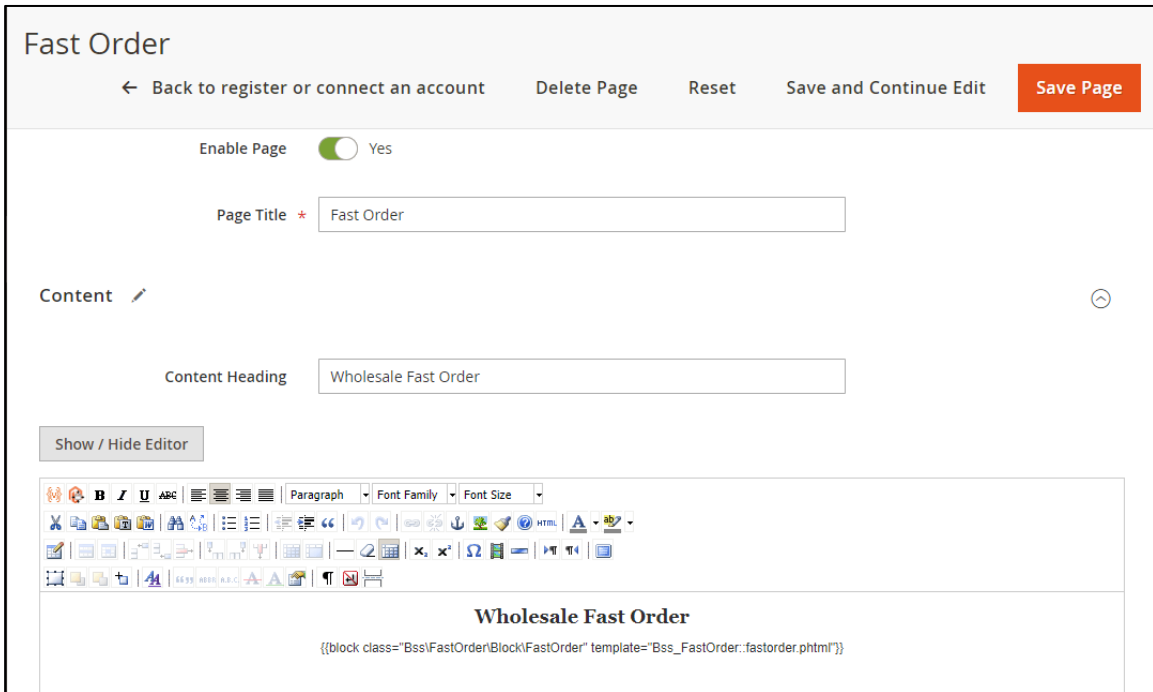

First off, you need to create the Fast Order CMS Page by navigating to **Content → Pages → Add New Page**.

Step-by-step guide to create CMS Page in Magento 2 is available [here](#) to refer to.

*Note:*

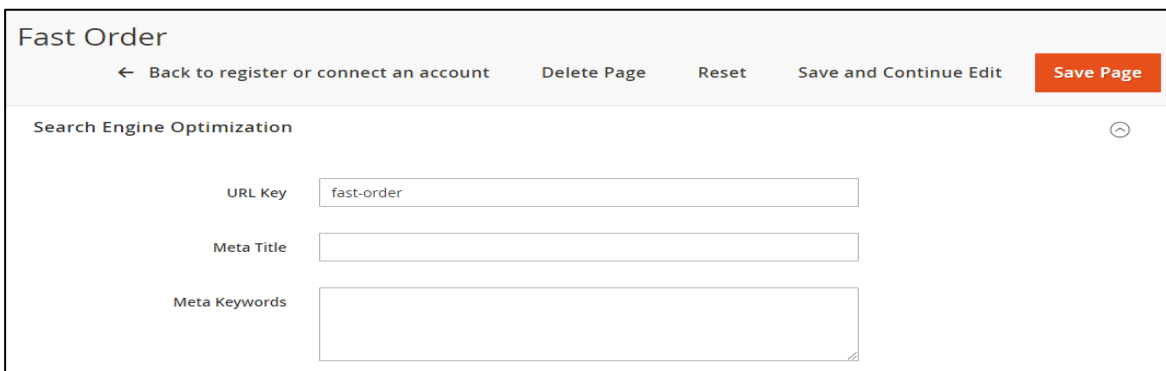

- To insert Fast Order form into the CMS page, please add the following code to the Content section.

```
{{block class="Bss\FastOrder\Block\FastOrder" template="Bss_FastOrder::fastorder.phtml"}}
```

- Expand **Search Engine Optimization** section.

In **URL Key**, there is an auto generated key. Copy the key to use in the fast order form configuration.

- Remember to **Save Page**.

### 2.2.2. Magento 2 Wholesale Fast Order Configuration

In Admin Panel, please go to **Stores** → **Configuration** → **BSS Commerce** → **Fast Order**.

The screenshot shows the configuration page for 'Fast Order' in the BSS Commerce extension. The page is titled 'General' and contains several settings:

- Enabled** [store view]: A dropdown menu set to 'Yes'. Below it, the text 'Version 1.2.0' is displayed.
- Number of lines \*** [store view]: A text input field containing '15'. Below it, the text 'Default lines shown.' is displayed.
- Enable search by SKU** [store view]: A dropdown menu set to 'Yes'. Below it, the text 'The autocomplete feature will search by NAME for default.' is displayed.
- Autocomplete minimum characters** [store view]: A text input field containing '1'. Below it, the text 'Minimum number of characters before displaying the autocomplete results.' is displayed.
- Max results to show** [store view]: A text input field containing '12'. Below it, the text 'Number of results in the autocomplete box.' is displayed.
- Head Background Color** [store view]: A color picker field showing a blue color with the hex code '2629BF'.
- Head Text Color** [store view]: A text input field containing 'FFFFFF'.
- Enabled Shortcut Top Link** [store view]: A dropdown menu set to 'Yes'.
- Shortcut Url Key** [store view]: A text input field containing 'fast-order'. Below it, the text 'Shortcut url key for fast order' is displayed.
- Enable for customer groups** [store view]: A multi-select dropdown menu with three options: 'NOT LOGGED IN', 'General', and 'Retailer'. 'General' and 'Retailer' are currently selected.

In **Enabled**: Choose *Yes* to enable the module or *No* to disable it.

In **Number of lines**: you set the number of lines of Fast Order shown in the CMS page.

In **Enabled search by SKU**:

- Choose *Yes* to enable customers to search by SKUs.
- Choose *No* and customers can only search by names as default.

In **Autocomplete minimum characters**: you set the minimum characters customers have to type in the search box so that the result can appear.

In **Max results to show**: you set the number of results displayed in the autocomplete box

In **Head Background Color** and **Head Text Color**: you can choose which color as you wish for your ordering table on the CMS Page to get more attention from your customers.

In **Enabled Shortcut Top Link**:

- Choose *Yes* to enable shortcut top link. Then there will be a **Shortcut Url Key** box for you paste the copied **URL Key** of the CMS Page.
- Choose *No* if you want to disable it.

In **Enable for customer groups**: you choose group for whom you want to enable Wholesale Fast Order function.
