1. Grouped Product with Custom Options for Magento 2 Overview

Grouped Product is an amazing type of product that supports showing multiple products for order on a single page. However, as you know, the default of Magento only allows admin to add simple products without custom options to a grouped product. Whereas, with Grouped Product with Custom Options for Magento 2, supports adding simple products with custom options and configurable products to a grouped product, which makes customers purchase grouped product conveniently when having more choices to select their wanted attributes of products.

2. How Does Grouped Product with Custom Options for Magento 2 Work?

2.1. In the frontend

Here is the frontend of Magento 2 Grouped Product with Custom Options extension:

The screenshot displays the 'Street Set for Men' product page. The main image shows an orange t-shirt, brown pants, and blue sneakers. The product details on the right include the title 'Street Set for Men', 'IN STOCK' status, and SKU. Below the title, there are three grouped items:

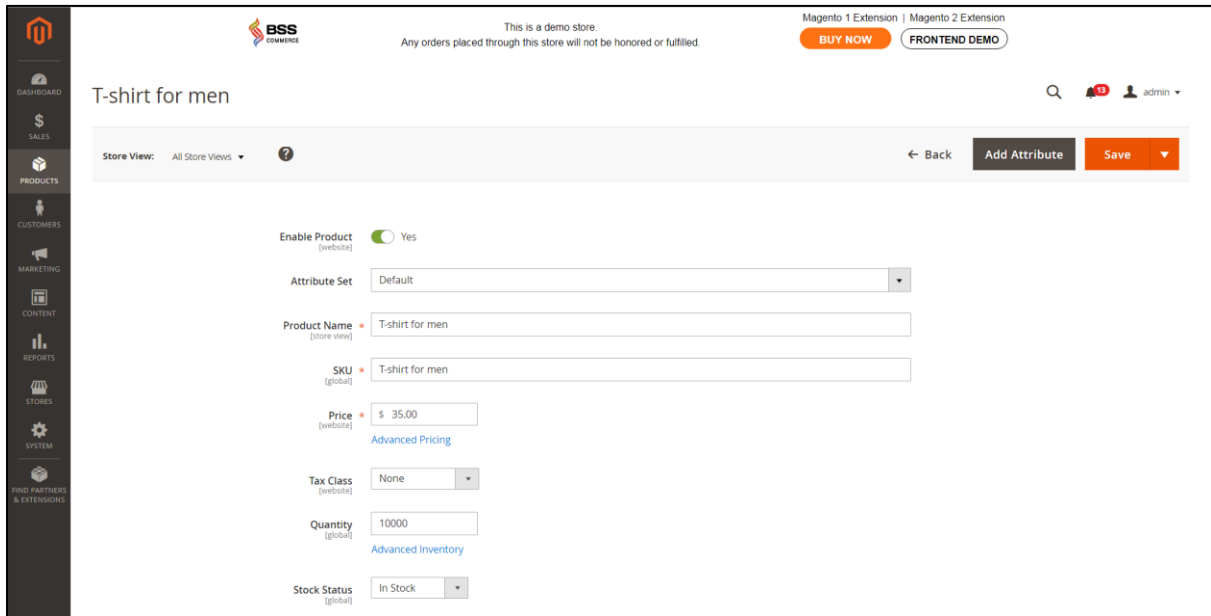

- Sweater CP**: \$50.00, Color: Orange, Size: M. A callout box points to this item with the text 'Show configurable product in the grouped product page'.
- Basic Long Pants**: \$40.00. Custom options include 'Choose a color *' (dropdown), 'Choose a size *' (dropdown), and 'Type of Pocket *' (radio buttons for Western Pocket + \$3.00, One-Quarter Pocket + \$2.00, and One-Eight Pocket + \$2.00). A callout box points to these options with the text 'Show custom options of simple product'.
- Men's shoes**: \$30.00, Choose a size * (dropdown).

At the bottom of the grouped items, there is an 'Add to Cart' button and links for 'ADD TO WISH LIST', 'ADD TO COMPARE', and 'EMAIL'.

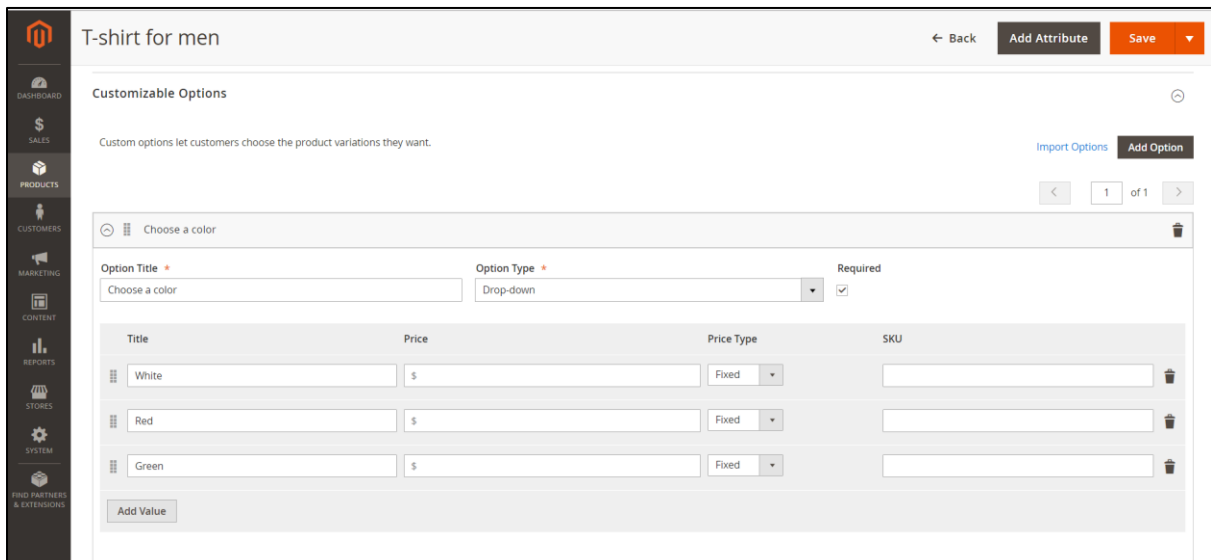

2.2. In the backend

2.2.1. How to create simple product with custom options

- Go to **Product** → **Catalog**
- Click **Add Product**, then choose Simple product
- Fill in all blanks as you create a Simple product

- Then scrolling down to **Customizable Options** configuration, click Add Option:

- **Save** the product. Now you have a simple product with custom options

2.2.2. How to add associated products to a grouped product

- Go to **Product** → **Catalog**
- Choose a grouped product you need to add associated items.
- At **Grouped Products** tab, click **Add Products to Group**, then select simple products with custom options and configurable products you want.
- Next, choose **Add Selected Products**.

The screenshot shows the 'Add Products to Group' dialog in the Magento 2 admin interface. The dialog has a sidebar with navigation options like Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, and System. The main area displays a table of products with the following data:

ID	Thumbnail	Name	Type	SKU	Quantity	Price
2058		Sweater CP	Configurable Product	Sweater CP	0.0000	
2060		Basic Long Pants	Simple Product	Basic Long Pants	10000.0000	\$40.00
2061		Men's shoes	Simple Product	Men's shoes	1000.0000	\$30.00

The dialog also includes a 'Filters' button, a 'Default View' dropdown, a 'Columns' dropdown, a 'Clear all' link, and a pagination control showing '3 records found (3 selected)' and '20 per page'.

- **Save.**

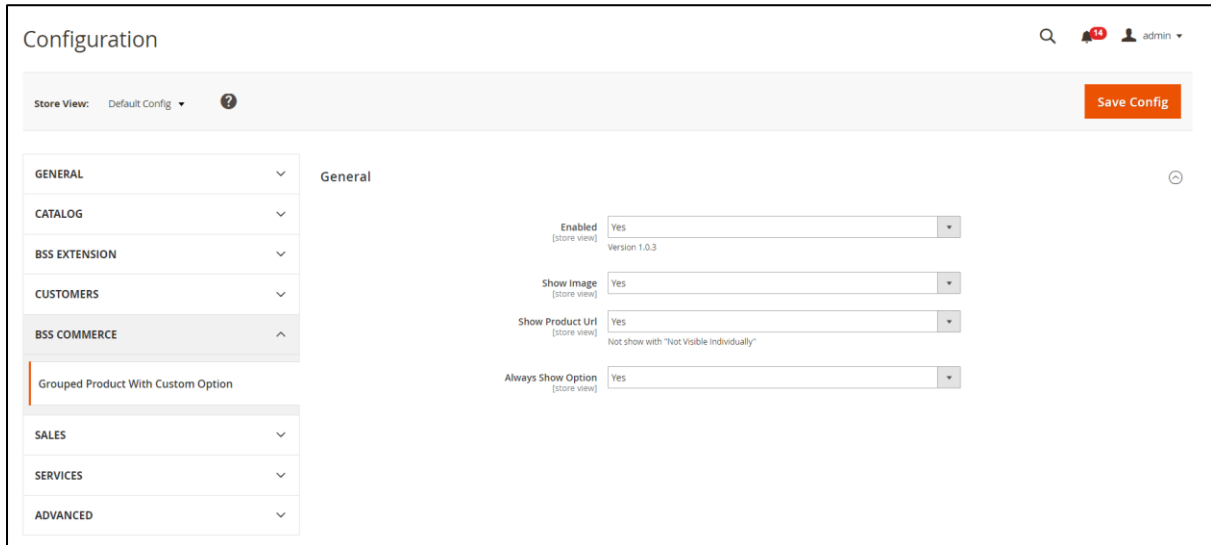

2.2.3. Make configuration for module

Now you enable this module as follow: Go to **Stores** → **Configuration**

- **Enabled:**
 - Choose **Yes** to enable the module.
 - Choose **No** you still can add associated items to grouped products; however, in the frontend, they will be shown as unavailable.
- **Show Image:**
 - Choose **Yes** if you want to show image of simple product with custom options.
 - If you do not want that, choose **No**.
- **Show Product URL:**
 - Choose **Yes** if you want to link to product page of associated product

with custom options.

- Choose **No** if you do not want.
- **Always Show Option:** Choose **Yes** to show product options always (not only when users changes quantity to positive number).
