## 1. One Step Checkout for Magento 2 Overview

[One Step Checkout for Magento 2](#) extension helps customers to checkout simply and quickly by displaying all elements in 1 page only. They do not need to experience two parts (Shipping Address and Reviews & Payments) as in default Magento 2, but fill all information in one place conveniently. Therefore, the checkout process becomes more user friendly, which can reduce abandonment rate and bring higher conversion rate for online stores.

## 2. How Does One Step Checkout for Magento 2 Work?

Please go to **Store → Configuration → BSSCOMMERCE → One Step Checkout**.

### 2.1. In General

The screenshot shows the 'General' configuration section for the 'One Step Checkout' extension. It includes the following fields and values:

- Enable** [store view]: Yes (dropdown menu)
- Title** [store view]: One Step Checkout (text input)
- Router Name** [store view]: onestepcheckout.html (text input). Below this field is an example: Example: onestepcheckout.html -> http://example.com/onestepcheckout.html
- Auto Check Newsletter Sign up Box** [store view]: No (dropdown menu)

In **Enable**:

- Choose Yes to enable Magento 2 One Step Checkout extension.
- Choose No to disable this module.

In **Title**: Write your wanted title for the checkout page.

In **Router Name**: Choose an url name for your checkout page.

In **Auto Check Newsletter Sing up Box**: Choose Ys to automaticall tick the Newsletter Sign up box or choose No to uncheck.

## 2.2. In Fields Display

**Fields Display**

Show Delivery Date [store view]

Show Delivery Comment [store view]

Show Order Comment [store view]

Show Subscribe Newsletter [store view]

Show Gift Message on Order Level [store view]   
This config is applied only when the corresponding default config is enabled.

Show Discount Code [store view]

### In Show Delivery Date:

- Choose Yes to display Order delivery date in the Shipping method section that allows customers to choose their own suitable dates and times to receive orders.
- Choose No to disable this function.

### In Show Delivery Comment:

- Choose Yes to display a Delivery comment box in the Shipping method section.
- Choose No to hide it.

### In Show Order Comment:

- Choose Yes to show a text box for customers to leave their comments for orders.

- Choose No to exclude this box from the checkout page

**In Show Subscribe Newsletter:**

- Choose Yes to allow customers to subscribe newsletter in the checkout page.
- Choose No to disable this option.

**In Show Gift Message on Order Level:**

- Choose Yes to allow customers to send a gift message to other people.
- Choose No to disable this function.

**\*Note:** This function is only applied when the corresponding default configuration is enabled. Go to **Store → Configuration → Sales → Sales → Gift Options** and set **Enable** for **Allow Gift Message on Order Level**.

**Gift Options**

Allow Gift Messages on Order Level [website] Yes  Use system value

Allow Gift Messages for Order Items [website] No  Use system value

**In Show Discount Code:**

- Choose Yes to display a discount code box for entering coupon codes.
- Choose No to hide it.

### 2.3. In Suggesting Address by Google

**Suggesting Address By Google**

Enable suggesting address by Google [store view] Yes   
 When you set to Yes, the extension will allow auto completeting customer address.

Google API Key \* [store view] AlzaSyDknRjUNLssePzOzje4ixF0avQXRhTFlvg  
 Click [here](#) to get API key

Suggesting Address from Applicable Countries [store view] All Allowed Countries

Suggesting Address from Specific Countries [store view]

- Afghanistan
- Åland Islands
- Albania
- Algeria
- American Samoa
- Andorra
- Angola
- Anguilla
- Antarctica
- Antigua & Barbuda

The maximum number of selected countries is 5.

#### In Enable Suggesting Address by Google:

- Choose Yes to allow auto suggesting shipping address when customers type some letters.
- Choose No to disable this function

In **Google API Key**: Fill in your API Key.

In case you haven't yet had an API Key, please click the link after this configuration to get it.

In **Suggesting Address from Applicable Countries**: This configuration determines which countries to apply auto suggesting customer address. There are 2 options to select:

- If you choose **All Allowed Countries**: auto suggesting address function is applied for every country.

- If you choose **Specific Countries**: there is a list of countries in **Suggesting Address from Specific Countries** and a maximum number of countries you can select is 5. Moreover, when you choose this option, Google just auto suggests city name and country, not street name. This is the default function of Google auto suggest.

## 2.4. In Custom Style

The screenshot shows the 'Custom Style' configuration panel. It contains three settings:

- Checkout Step Number Color** [store view]: A text input field containing the hex color code 'FFFFFF'.
- Checkout Step Background Color** [store view]: A color picker showing a purple color with the hex code '6D268A'.
- Custom Code** [store view]: A text area containing the following CSS code:

```
.authentication-wrapper button{padding: 15px;background: #6D268A;color: #fff;}
.authentication-wrapper button:hover{
```

In **Checkout Step Number Color**: you choose color for the checkout number steps.

In **Checkout Step Background Color**: Choose color for background of checkout number steps.

In **Custom Code**: you can add more code to customize about background color for the checkout page, "Sign in" button or text color and so on.

## 2.5. Some Notes about Magento 2 One Step Checkout Extension

- Notes about custom code

+ Change background of the checkout page, you need to add more code:

```
body { background-color: #333333;
}
```

(#333333 is the color code which is corresponding to Black).

+ Change text color of the checkout page, you need to add more code:

```
body { color: #ffffff;
}
```

(#ffffff is the color code which is corresponding to White).

+ Change **Sign in** to a button, you add more code:

```
.authentication-wrapper button{  
  
    padding: 15px;  
  
    background: #6D268A;  
  
    color: #fff;  
  
}  
  
.authentication-wrapper button:hover{  
  
    text-decoration: unset;  
  
    background: #FF0000;  
  
    color: #fff;  
  
}
```

- **Note about configuring payment method**

You need to configure all payment methods that default Magento supports.
