I. Multiple Store View Pricing for Magento 2 Extension Overview

Multiple Store View Pricing for Magento 2 extension helps store owners to set up different prices for the same product in various store views of a store while Magento 2 default does not support this function. For example, you want to sell a table at £50 in English store view but in the French store view, the price you want customers to pay is €80. It all depends on demands of store owners as well as business strategies for each local target customers.

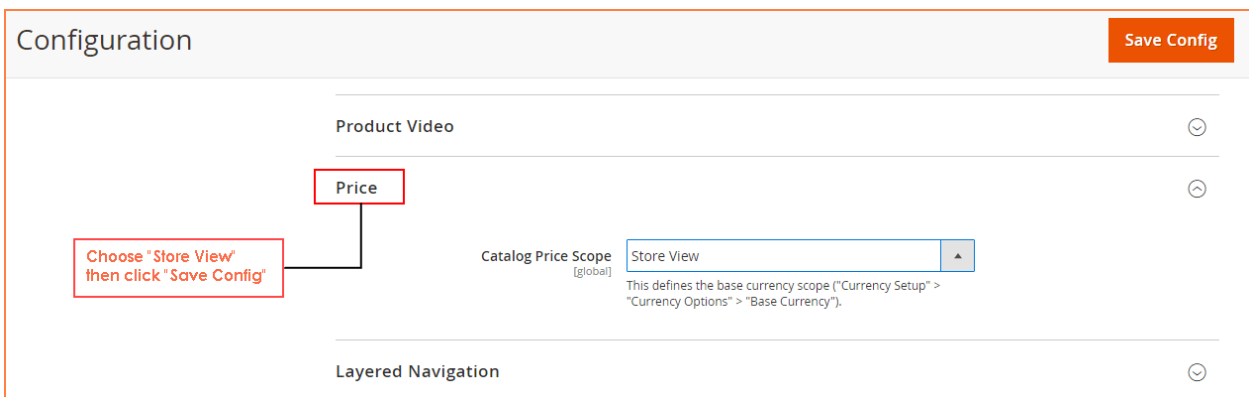

Moreover, this module also allows administrators to set up base currency for each store view so that customers can easily checkout with currency of store view. It can be said that this is really another very outstanding features of Multiple Store View Pricing for Magento 2 to make more convenient for both customers and store owners.

II. How does Multiple Store View Pricing for Magento 2 Extension work?

1. Enable Multiple Store View Pricing for Magento 2 Extension

You go to **Store->Configuration->Catalog**

Next, you continue to click **Catalog** section and among all sections shown up in the page, find **Price** section to start the customization.

In box **Catalog Price Scope**, there are 3 options for admin to choose: *Global*, *Website and Store View*. You choose *Store View* to enable the module.

Then you click **Save Config** and begin to customize prices of products in each store view of each store

2. Set up base currency for each store view

2.1. Set up base currency for English store view

In **Configuration**, you go to **General -> Currency Setup** to set up base currency for English store view

Choose **English** store view from **Store View** Section

The screenshot shows the Magento 2 Configuration interface for the 'Currency Setup' section. The 'Store View' dropdown is set to 'English'. The 'Base Currency' dropdown is set to 'British Pound Sterling'. The 'Default Display Currency' is also set to 'British Pound Sterling'. The 'Allowed Currencies' list includes various currencies such as Afghan Afghani, Albanian Lek, Algerian Dinar, Angolan Kwanza, Argentine Peso, Armenian Dram, Aruban Florin, Australian Dollar, Azerbaijani Manat, and Azerbaijani Manat (1993–2006). The 'Use Website' checkbox is unchecked for all three currency options. A 'Save Config' button is visible in the top right corner. Red boxes and arrows highlight the 'Store View' dropdown, the 'Base Currency' dropdown, and the 'Allowed Currencies' list.

In **Base Currency**: Choose **British Pound Sterling** as base currency and customers will use this one to checkout.

In **Default Display Currency**: you can choose **British Pound Sterling** or any other currency because this one is only displayed in the product or category page, not used in the checkout.

In **Allowed Currencies**: Choose **British Pound Sterling**

Then, click to **Save config** and start to set up price for a product in the English store view

2.2. Set up base currency for French store view

In **Configuration**, you go to **General -> Currency Setup** to set up base currency for French store view

Choose **French** store view from **Store View** Section

The screenshot shows the 'Currency Options' configuration page for the 'French' store view. The 'Store View' dropdown is set to 'French'. The 'Base Currency' is set to 'Euro', with a note explaining its use for online payment transactions. The 'Default Display Currency' is also set to 'Euro'. The 'Allowed Currencies' list includes various international currencies such as Afghan Afghani, Albanian Lek, Algerian Dinar, Angolan Kwanza, Argentine Peso, Armenian Dram, Aruban Florin, Australian Dollar, Azerbaijani Manat, and Azerbaijani Manat (1993-2006). There are checkboxes for 'Use Website' next to each currency type. A 'Save Config' button is located in the top right corner.

In **Base Currency**: Choose **Euro** as base currency and customers will use this one to checkout.

In **Default Display Currency**: you can choose **Euro** or any other currency because this one is only displayed in the product or category page, not used in the checkout.

In **Allowed Currencies**: Choose **Euro**

Then, click to **Save config** and start to set up price for a product in the French store view
