

Installation Guide

1. How to Install Magento 2 Pre-Order Extension? (#1-how-to-install-magento-2-pre-order-extension)

After finishing the purchasing process, we will immediately send you an email containing the link to download this extension.

(Please turn off Merge-JS before installing the module. Only Turn on Merge-JS when finishing the installation).

Step 1: (#step-1)

Unzip the file.

Step 2: (#step-2)

Create another directory called **app/code/Bss/PreOrder/**. **PreOrder** is the module's internal identifier. You can find it in the "composer.json" file in the extension ZIP file you downloaded, look at the node "psr-4".

This is what you call the directory, and then you put the contents of the extension ZIP file in there.

Step 3: (#step-3)

Upload the directory **app/code/Bss/PreOrder/** into the root directory of your Magento installation. The root directory of Magento is the directory that contains the directories "app", "bin", "lib" and more. All directories should match the existing directory structure.

Step 4: (#step-4)

Go to Magento 2 root directory.

Run: `php bin/magento setup:upgrade`.

Step 5: (#step5)

Run: `php bin/magento setup:static-content:deploy`.

Step 6: (#step-6)

Clear all Caches.

*Note

After purchasing this module, just add our skype account at *support.bsscommerce*,

BSS Support Team will help you to install this extension immediately. Further assistance is available via Email and Skype.

2. How to Uninstall Magento 2 Pre-order Extension Manually? (#2-how-to-uninstall-magento-2-pre-order-extension-manually)

In case you have followed all the above steps but the extension still doesn't work properly, you can delete the file or change the module's filename to keep your website function as normal.

Please follow:

Step 1: (#step-1-1)

Delete the attributes of extension on table eav_attribute in which the attribute code is preorder, message, or restock

MySQL » Server » magento23 » Select: eav_attribute

Select: eav_attribute

Select data Show structure Alter table New item

Select Search Sort Limit 50 Text length 100 Action Select

SELECT * FROM `eav_attribute` LIMIT 50 OFFSET 150 (0.000 s) Edit

	attribute_id	entity_type_id	attribute_code	attribute_model	backend_model	backend_type	backend_table	frontend_model
edit	151	4	collar	NULL	Magento\Eav\Model\Entity\Attribute\Backend\ArrayBackend	varchar	NULL	NULL
edit	152	4	pattern	NULL	Magento\Eav\Model\Entity\Attribute\Backend\ArrayBackend	varchar	NULL	NULL
edit	153	4	climate	NULL	Magento\Eav\Model\Entity\Attribute\Backend\ArrayBackend	varchar	NULL	NULL

<input type="checkbox"/> edit	Dotdigitalgroup_Email	3.0.1	3.0.1
<input type="checkbox"/> edit	Klarna_Core	5.0.0	5.0.0
<input type="checkbox"/> edit	Klarna_Kp	6.0.0	6.0.0
<input type="checkbox"/> edit	Klarna_Ordermanagement	5.0.2	5.0.2
<input type="checkbox"/> edit	Magento_Inventory	1.0.0	1.0.0
<input type="checkbox"/> edit	Magento_InventoryAdminUi	1.0.0	1.0.0
<input type="checkbox"/> edit	Magento_InventoryApi	1.0.0	1.0.0
<input type="checkbox"/> edit	Magento_InventoryBundleProduct	1.0.0	1.0.0
<input type="checkbox"/> edit	Magento_InventoryBundleProductAdminUi	1.0.0	1.0.0

Step 4: (#step-4-1)

Delete the folder code at app/code/Bss/PreOrder

Step 5: (#step-5)

Run these commands to apply all changes:

- + php bin/magento setup:upgrade
- + php bin/magento setup:static-content:deploy
- + php bin/magento cache:flush
