Installation Guide

After finishing purchasing process, we will immediately send you an email containing the link to download this extension.

(Please turn off Merge-JS before installing the module. Only Turn on Merge-JS when finishing the installation).

I. Install a new module   (#i-install-a-new-module)

1. Install the Import/Export Core module   (#1-install-the-import-export-core-module)

To install Magento 2 Import Export Product Attribute extension, it is required to install our Import Export Core module. Only when this Core module is installed, can the Import Export Product Attribute extension works well.

Please follow these steps:

Step 1. Download the Core module

Step 2. Create a directory:

[Magento root folder]/app/code/Bss/ImportExportCore

Step 3. Unzip the source code of the extension to the directory created in Step 2.

Step 4. Go to Magento 2 root directory and run the following commands:

1. php bin/magento setup:upgrade
2. php bin/magento setup:di:compile
3. php bin/magento setup:static-content:deploy
4. php bin/magento cache:clean

2. Install Magento 2 Import Export Product Attribute extension   (#2-install-magento-2-import-export-product-reviews-extension)

After you finish the Core module installation, you continue to install the Import Export Product Attribute extension.

Step 1:

Unzip the file.

Step 2:

Create another directory called **app/code/Bss/ProductAttributesImportExport/**. **ProductAttributesImportExport** is the module's internal identifier. You can find it in the "composer.json" file in the extension ZIP file you downloaded, look at the node "psr-4".

This is what you call the directory, and then you put the contents of the extension ZIP file in there.

Step 3:

Upload the directory **app/code/Bss/ProductAttributesImportExport/** into the root directory of your Magento installation. The root directory of Magento is the directory that contains the directories "app", "bin", "lib" and more. All directories should match the existing directory structure.

Step 4:

Go to Magento 2 root directory.

Run: php bin/magento setup:upgrade.

Step 5:

Run: php bin/magento setup:static-content:deploy.

Step 6:

Clear all Caches.

II. Upgrade the extension to the new version (#ii-upgrade-the-extension-to-the-new-version)

In case you have been using the Import Export Product Attribute extension and want to upgrade to the new module version (v1.1.6 or higher), please follow our instruction:

*Note: You need to back up the previous code if there is any customization.

Step 1:

Download the new extension version (including the Import Export Core module).

Step 2:

Delete the previous code in the directory: **[MagentoRoot]app/code/Bss/ProductAttributesImportExport/**

Step 3:

Unzip the source code of the new extension version to the directory.

Step 4:

Go to Magento 2 root directory and run the following commands:

1. php bin/magento setup:upgrade
2. php bin/magento setup:di:compile
3. php bin/magento setup:static-content:deploy
4. php bin/magento cache:clean

*Note
