

1. Overview

Shopping Cart Price Rule per Store View for Magento 2 helps administrators to set up shopping cart price rule for store views, instead of the whole website as Magento default. Therefore, store owners can provide their local customers with particular promotions programs to encourage them to purchase more and enhance sales effectively.

2. How Does It Work?

After installing this module, you will select store views to set up cart price rules when you create new rules.

You go to **MARKETING** ⇒ **Cart Price Rules** ⇒ **Add New Rule**.

Rule Information

The screenshot shows the 'Add New Rule' form with the following fields and values:

- Rule Name ***: 20% OFF for orders including 3 or more products
- Description**: 20% OFF for orders including 3 or more products
- Active ***: Yes
- Store View ***: A dropdown menu with a question mark icon. The menu is open, showing options: English, French, Italy, **Main Website Store**, English (highlighted), and French.
- Customer Groups ***: A dropdown menu with options: NOT LOGGED IN, General, Wholesale, and Retailer.

You fill in the necessary information in sections of **Rule information**. Especially, in **Store View** section, you will select store views to set up this rule and apply in the frontend. You can select multiple store view to carry out setup at one time.

Take 2 following examples to see how Shopping Cart Price Rule per Store View for Magento 2 can function in details.

- **Example 1: Set up a rule “20% OFF for orders including 3 or more products” for English store view.**

In Rule Information:

- + Fill in Rule name and Description.
- + Set Yes for Active.
- + Select English of Main Website Store in Store View section.
- + Select customer groups to apply.
