

BuildaTeam M2 – Quiz Extension Installation Instructions

There are multiple ways to install our extension to your Magento instance

Option 1 : **Composer**

Here you will see what steps you need to follow in order to install the best Quiz extension available for Magento 2.

- Run the following command in Magento 2 root folder
 - `composer require buildateam/m2-quiz`
 - `php bin/magento setup:upgrade`
 - `php bin/magento setup:static-content:deploy`

Option 2 : **Manual Install**

Here you will see what steps you need to follow in order to install the best Quiz extension available for Magento 2. After you purchased the module, the module will be provided so you can install it by Copying it to the path:

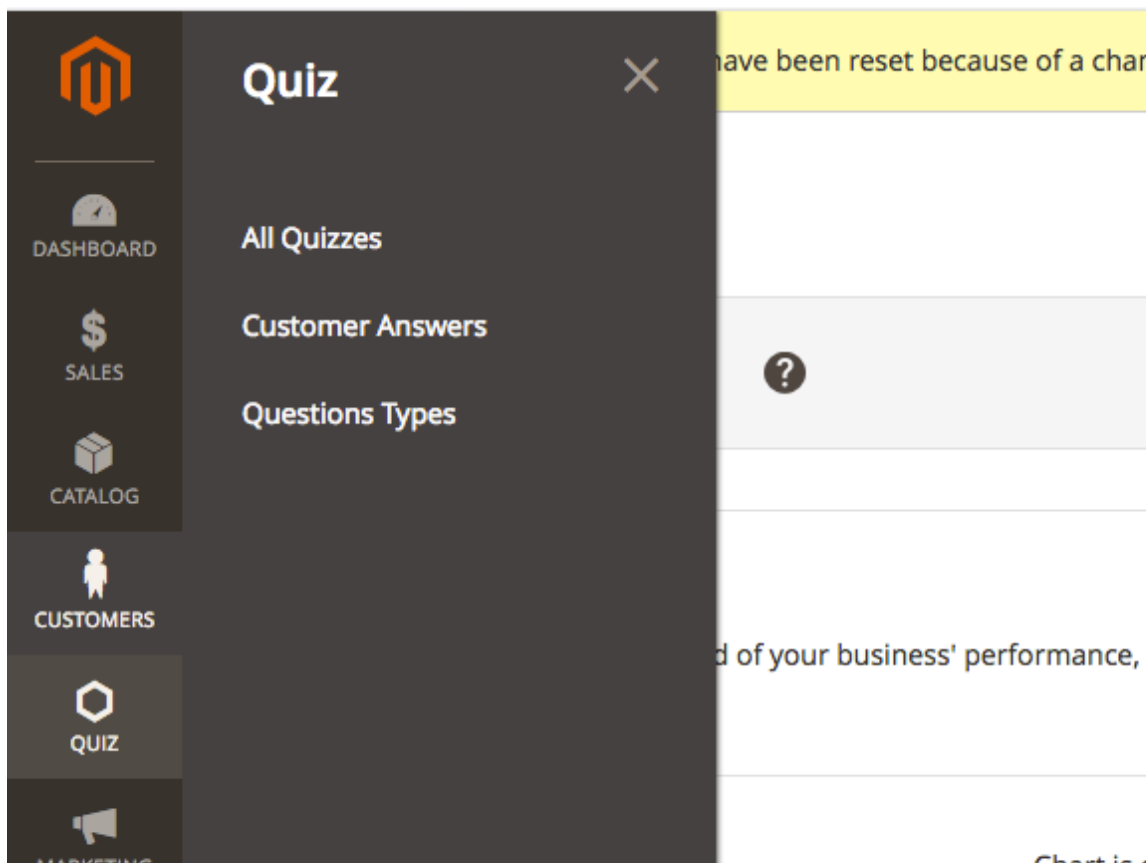

- `yourstore root / app / code /`
- then you execute: `php bin/magento setup:upgrade`
-

BuildaTeam M2 – Quiz Plugin User Guide

Once you have installed the extension, setting it up is really easy. Please follow this guide to create your first Quiz and any other you may want in the future.

To set this up, as everything else in Magento you need to login to the Admin section of your Magento Installation.

1st – Once logged in, you will be able to see the Quiz Icon. Once clicking it you will have three options: All Quizzes, Customer Answers and Questions Types.

2nd – In order to setup your First Quiz, you need to setup the Question Types first, and so Please click on Questions Types. This option will allow you to add additional CSS classes to the Answer Options on the frontend and then customize the look and feel of your Quiz. The Code and Title could be anything that you may need, just choose so that these are identifiable with ease.

So just click on “Add Type”

Questions

Search Reset Filter 0 records found 20 per page 1 of 1

ID	Title	Type	Sort
----	-------	------	------

We couldn't find any records.

With this you should be able to see

4th - Once you have created the Quiz you will need to create a Question, for which you will need to click on “Add new Question”.

New Quiz Question ← Back Reset Save and Continue Edit **Save Quiz Question**

General Information

Title *

Type * Circle

Multiple * No

Sort

Here you need to fill in the fields, for example:

- For Title: It's a Friday Night – Where would you like to Rock?
- For Type: you may choose Square (these are the Question types you created at the start)
- For multiple you may choose Yes, this will allow your clients to select more than one answer.
- And Sort, which is for Order of the question, you may put 1.

Once your Question is completed, please click on “Save and Continue Edit”, this will give you:

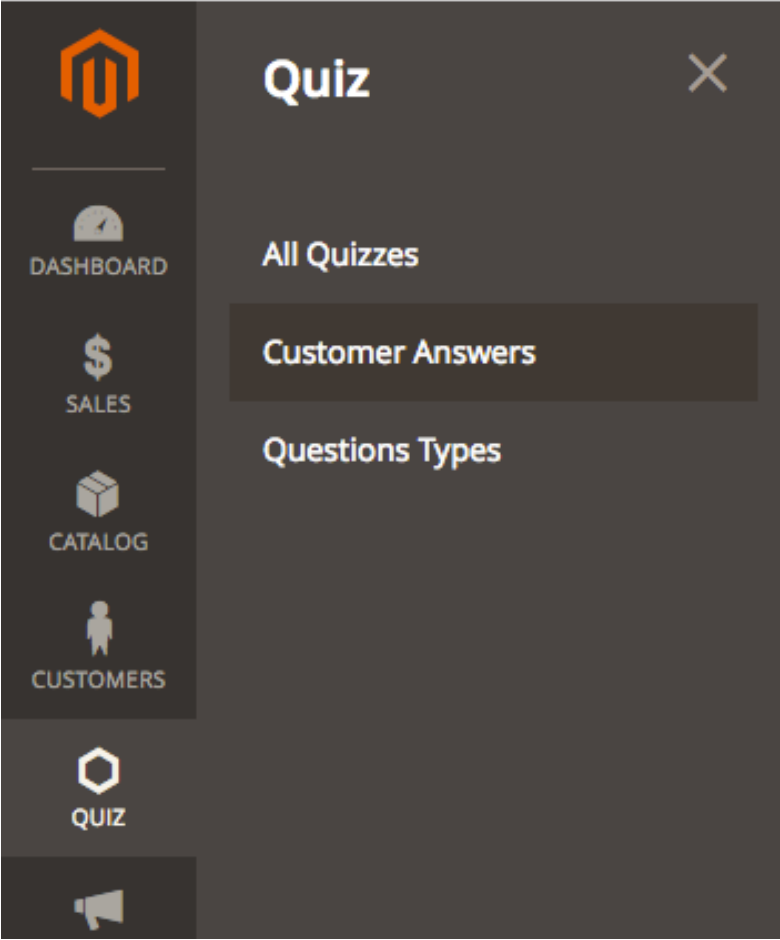

5th – Add Answers – Click on “Add new Answer” so you can add a new answer to your Selected Question. Once in the page you need to fill in the required fields:

- Title will display as the main question
- Image, you need to add any image of your choice to identify the answer.
- You need to enter the search criteria. Here you can enter any of your Advanced Catalog Search Options: <http://yourstore.local/catalogsearch/advanced>
- Color, you can enter any Hexadecimal Color Code
- Sort, you choose the order of the answer.

With this you have a complete Quiz finished and ready to be used.

Remember that only one Quiz, the most updated one, will be displayed to your clients.

Once you have collected multiple questions, you will be able to see the responses by clicking in QUIZ -> Customer Answers
