

M2 Quiz v1.2.x+

Plugin User Guide

Once you have installed the extension, setting it up is really easy. Please follow this guide to create your first Quiz and any other you may want in the future.

To set this up, as everything else in Magento you need to login to the Admin section of your Magento Installation.

Once logged in, you will be able to see the Quiz Icon. Once clicking it you will have 2 options: All Quizzes & Customer Answers.

Quiz Edit

Title

Text *

CSS Class

Only Logged * No

Enable * Yes

- Add Title and Text, in our example “Just Once.” It will be displayed in the Quiz Step on the Frontend. Here you may enter HTML Tags as this is allowed.

- Status needs to be set to Enabled so the Quiz may be displayed in the front end.
Note that once you complete, you just need to click on “Save and Continue Edit”.

We couldn't find any records.					

Now you should be able to see the Quiz Splash Page on the frontend.

Create Questions.

Once you have created the Quiz you will need to create Questions.

Click on “Add New Question”.

The screenshot shows a dashboard sidebar on the left with icons for Dashboard, Sales, Catalog, Customers, Quiz, Marketing, Content, Reports, Stores, System, and Find Partners & Extensions. The main content area is titled 'New Quiz Question' and contains a form with the following fields:

- Title ***: A text input field.
- Input Type ***: A dropdown menu with 'Swatch' selected.
- Code**: A text input field.
- Dependency**: A dropdown menu with 'Select...' selected. Below it is the text: 'Select answers to display this question.'
- CSS Class**: A text input field.
- Sort**: A text input field.

At the top right of the form area, there are three buttons: 'Back', 'Save and Continue Edit', and 'Save'.

- Title: It's a Friday Night – Where would you like to Rock?
- Input Type: you may choose Swatch, Swatch Multiselect, Text, Textarea or Date
- Code: Shortcode for the answer. i.e: Question title: "What's Your Name" => Code: customer_name
- Dependency: Show next question based on the previous customer answer.
Choose one or multiple answers. If multiple answers are selected, the question will be shown for any of the marked answers (OR Logic). If the field is empty, the question will always be shown.

Dependency

Swatch

- a1
- a2
- a3

Swatch Multiple

- b1
- b2
- b3
- b4

Done

- CSS Class: Add a CSS class to the question to fine-grain styling.
- Sort: Order of the question in the full quiz. (integers only)
- Validation: Displays for questions with Input Type = 'Text' or 'Text Area'. Validation rules can be added here separated by 'space' i.e: (minlength="5" maxlength="25" validate-email="true")

Validation

```
validate-greater-than-zero="true" integer="true"
```

```
minlength="5" maxlength="25"  
min-words="3" max-words="20"  
validate-email="true"  
no-whitespace="true"  
validate-greater-than-zero="true"  
validate-zero-or-greater="true"  
validate-number="true" integer="true"  
validate-url="true"
```

Add Answers.

Once your Question is completed, please click on “Save and Continue Edit”, this will give you:

The screenshot shows the 'Edit Quiz Question' interface. A sidebar on the left contains navigation icons for Dashboard, Sales, Catalog, Customers, Quiz, Marketing, Content, Reports, Stores, System, and Find Partners & Extensions. The main content area has a title 'Edit Quiz Question' and a navigation bar with buttons: Back, Delete Question, Add New Answer, Save and Continue Edit, and a Save button. A yellow success message reads 'Edited Question Successfully.' Below this is the 'Question Information' section with fields for Title, Input Type, Code, Dependency, CSS Class, and Sort. The 'Answer' section shows a table with 0 records found.

Once in the page you need to fill in the required fields:

- Title will display as the Answer
- Value: Will show in the 'Customer Answers' section and replace answer ID as default value
- Advanced Search Attribute: Here you can enter any of your Advanced Catalog Search Options: <http://yourstore.local/catalogsearch/advanced>
- "Attribute" Search Options/Value: When choosing advanced search attributes, there will be a new field where you can select values for searching
- Image: you need to add any image of your choice to identify the answer.
- Color: Enter any Hexadecimal Color Code instead of the Image
- Sort: Choose the order of the answer.

Choose active Quiz under Stores > Configuration > BUILDTEAM > Quiz

The screenshot shows the Magento Configuration interface. On the left is a vertical sidebar with navigation icons for DASHBOARD, SALES, CATALOG, CUSTOMERS, QUIZ, MARKETING, CONTENT, REPORTS, and STORES. The main content area is titled 'Configuration' and shows the 'BUILDTEAM' section expanded to 'Quiz'. At the top of the configuration area, there is a 'Scope' dropdown set to 'Default Config' and a 'Save Config' button. Below this is a 'General' tab with three settings:

- Select Active Quiz in Pop-Up** (store view): A dropdown menu with 'Test Quiz' selected.
- Finished Quiz Cooldown for Same Customer in Pop-Up, days** (store view): A text input field containing '180'. Below it is a note: 'Set 0 if you want quiz to start for user on every session.'
- Open Quiz on Own Page** (store view): A dropdown menu with 'Yes' selected. Below it is a note: '/quiz/view/item/id/{id}/'

- **Select Active Quiz in Pop-Up:** Pick which Quiz will be shown on the homepage as a popup. Set to 'None' to disable popups.
- **Finished Quiz Cooldown for Same Customer in Pop-Up:** Enter value in days. By default if the Quiz was started, it will be shown every time the homepage loads. If cooldown time is set, after being started, the quiz won't show the number of days marked in this field.
- **Open Quiz on Own Page:** If you prefer to have the Quiz on a separate individual page, where it can be passed anytime, check this field. The Quiz URL will form the following way: <http://yourstore.local/quiz/view/item/id/1/> - where last digit is the ID of the Quiz. This way you can open multiple tabs with multiple Quizzes.

IMPORTANT: After editing quiz -> Flush Magento Cache.

Once you have collected multiple submissions from your users, you will be able to see the responses by clicking in QUIZ - > Customer Answers.

You can also import / export Quizzes from one store into another:
