

M2 Quiz v1.2.x+

Magento Quiz Plugin User Guide

Quiz Installation Guide

To install Quiz extension:

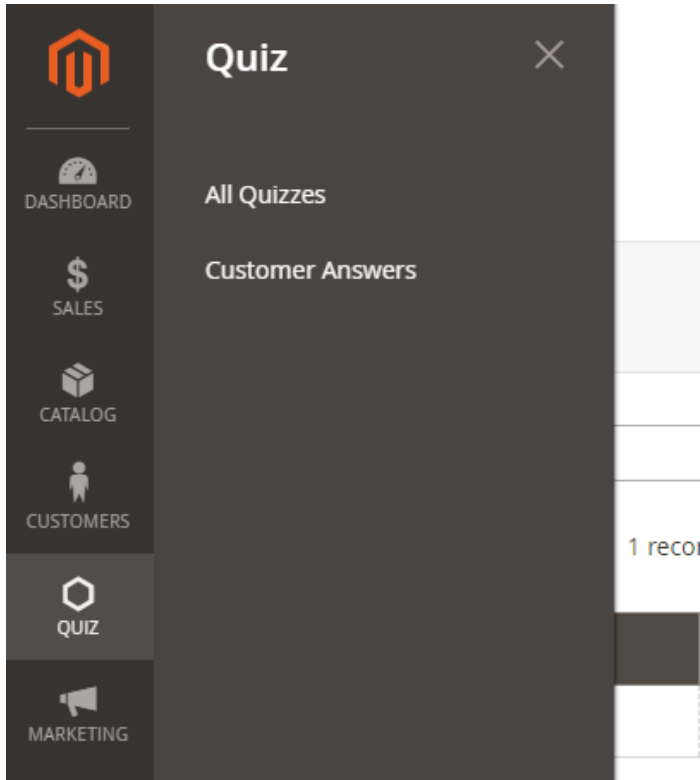

1. Extract files to <magento-installation-folder>/app/code folder. If it doesn't exist, create it.
2. Run ``php bin/magento setup:upgrade && php bin/magento setup:di:compile`` command

Quiz Setup Guide

Once you have installed the extension, setting it up is really easy. Please follow this guide to create your first Quiz and any other you may want in the future.

To set this up, as everything else in Magento you need to login to the Admin section of your Magento Installation.

Once logged in, you will be able to see the Quiz Icon. Once clicking it you will have 2 options: All Quizzes & Customer Answers.

A screenshot of the "All Quizzes" page. The left sidebar contains a navigation menu with icons and labels: DASHBOARD, SALES, CATALOG, CUSTOMERS, QUIZ (highlighted), MARKETING, and CONTENT. The main content area has a header "All Quizzes" with a search icon, a notification bell with "3", and a user profile "admin". Below the header is a light grey bar with an orange "Add New Quiz" button. A search bar with the placeholder "Search by keyword" and a magnifying glass icon is present. To the right of the search bar are "Filters", "Default View", and "Columns" dropdown menus. Below the search bar is an "Actions" dropdown menu and the text "1 records found". To the right of this is a pagination control showing "20 per page", navigation arrows, and "1 of 1". The main content is a table with the following data:

<input type="checkbox"/>	ID	Title	Created	Modified	Status	Action
<input type="checkbox"/>	1	Test Quiz	May 30, 2018 11:01:01 PM	May 30, 2018 11:02:18 PM	Enabled	Select

Add New Quiz

Click on "Add New Quiz" and fill in the fields:

← Back Add New Question Save and Continue Edit **Save**

Quiz Edit

Title

Text *

CSS Class

Only Logged * No

Enable * Yes

- Add Title and Text, in our example “Just Once.” It will be displayed in the Quiz Step on the Frontend. Here you may enter HTML Tags as this is allowed.
- Status needs to be set to Enabled so the Quiz may be displayed in the front end. Note that once you complete, you just need to click on “Save and Continue Edit”.

Edit Quiz. ← Back Add New Question Save and Continue Edit **Save**

✓ Quiz saved

Enable * Yes

Questions

0 records found 20 per page 1 of 1

ID	Title	Sort	Action	CSS Class	Multiple
We couldn't find any records.					

Now you should be able to see the Quiz Splash Page on the frontend.

Create Questions.

Once you have created the Quiz you will need to create Questions.

Click on “Add New Question”.

The screenshot shows the 'New Quiz Question' form. On the left is a vertical sidebar with icons and labels: DASHBOARD, SALES, CATALOG, CUSTOMERS, QUIZ, MARKETING, CONTENT, REPORTS, STORES, SYSTEM, and FIND PARTNERS & EXTENSIONS. The main form area has a title 'New Quiz Question' and a breadcrumb trail. Below the breadcrumb are three buttons: '← Back', 'Save and Continue Edit', and 'Save'. The form is titled 'Question Information' and contains the following fields:

- Title * (text input)
- Input Type * (dropdown menu, currently set to 'Swatch')
- Code (text input)
- Dependency (dropdown menu, currently set to 'Select...') with a sub-label 'Select answers to display this question.'
- CSS Class (text input)
- Sort (text input)

- Title: It's a Friday Night – Where would you like to Rock?
- Input Type: you may choose Swatch, Swatch Multiselect, Text, Textarea or Date
- Code: Shortcode for the answer. i.e: Question title: "What's Your Name" => Code: customer_name
- Dependency: Show next question based on the previous customer answer.
Choose one or multiple answers. If multiple answers are selected, the question will be shown for any of the marked answers (OR Logic). If the field is empty, the question will always be shown.

Dependency

Swatch

- a1
- a2
- a3

Swatch Multiple

- b1
- b2
- b3
- b4

Done

- CSS Class: Add a CSS class to the question to fine-grain styling.
- Sort: Order of the question in the full quiz. (integers only)
- Validation: Displays for questions with Input Type = 'Text' or 'Text Area'. Validation rules can be added here separated by 'space' i.e: (minlength="5" maxlength="25" validate-email="true")

Validation

```
validate-greater-than-zero="true" integer="true"
```

```
minlength="5" maxlength="25"  
min-words="3" max-words="20"  
validate-email="true"  
no-whitespace="true"  
validate-greater-than-zero="true"  
validate-zero-or-greater="true"  
validate-number="true" integer="true"  
validate-url="true"
```

Add Answers.

Once your Question is completed, please click on “Save and Continue Edit”, this will give you:

The screenshot shows the 'Edit Quiz Question' interface. On the left is a dark sidebar with navigation icons for Dashboard, Sales, Catalog, Customers, Quiz, Marketing, Content, Reports, Stores, System, and Find Partners & Extensions. The main content area has a title 'Edit Quiz Question' and a navigation bar with buttons: Back, Delete Question, Add New Answer, Save and Continue Edit, and a red Save button. A yellow success message reads 'Edited Question Successfully.' Below is the 'Question Information' section with form fields: Title (It's a Friday Night - Where would you like to Rock?), Input Type (Swatch), Code (rock), Dependency (a1, a3), CSS Class, and Sort (5). At the bottom is an 'Answer' section with a table showing 0 records found.

0 records found 20 per page < 1 of 1 >

ID	Title	Value	Attribute	Color	Image	Sort	Action
We couldn't find any records.							

IMPORTANT: If you are creating a brand new first quiz question, there will be no dependencies to choose. So you can skip this part!

Add Answers – Click on “Add new Answer” so you can add a new answer to your Selected Question.

Once in the page you need to fill in the required fields:

- Title will display as the Answer
- Value: Will show in the 'Customer Answers' section and replace answer ID as default value
- Advanced Search Attribute: Here you can enter any of your Advanced Catalog Search Options: <http://yourstore.local/catalogsearch/advanced>
- "Attribute" Search Options/Value: When choosing advanced search attributes, there will be a new field where you can select values for searching
- Image: you need to add any image of your choice to identify the answer.
- Color: Enter any Hexadecimal Color Code instead of the Image
- Sort: Choose the order of the answer.

Choose active Quiz under Stores > Configuration > BUILDTEAM > Quiz

The screenshot shows the Magento Configuration interface. On the left is a vertical sidebar with navigation icons for Dashboard, Sales, Catalog, Customers, Quiz, Marketing, Content, Reports, and Stores. The main content area is titled 'Configuration' and shows the 'BUILDTEAM' section expanded to 'Quiz'. At the top right of the configuration area is a 'Save Config' button. Below the sidebar, a list of configuration sections is shown: GENERAL, CATALOG, SECURITY, CUSTOMERS, SALES, BUILDTEAM (expanded), and Quiz. The 'General' configuration section is active, showing three settings: 'Select Active Quiz in Pop-Up' (dropdown menu set to 'Test Quiz'), 'Finished Quiz Cooldown for Same Customer in Pop-Up, days' (text input set to '180'), and 'Open Quiz on Own Page' (dropdown menu set to 'Yes'). A URL pattern '/quiz/view/item/id/{id}/' is visible below the 'Open Quiz on Own Page' setting.

- Select Active Quiz in Pop-Up: Pick which Quiz will be shown on the homepage as a popup. Set to 'None' to disable popups.
- Finished Quiz Cooldown for Same Customer in Pop-Up: Enter value in days. By default if the Quiz was started, it will be shown every time the homepage loads. If cooldown time is set, after being started, the quiz won't show the number of days marked in this field.
- Open Quiz on Own Page: If you prefer to have the Quiz on a separate individual page, where it can be passed anytime, check this field. The Quiz URL will form the following way: <http://yourstore.local/quiz/view/item/id/1/> - where last digit is the ID of the Quiz. This way you can open multiple tabs with multiple Quizzes.

IMPORTANT: After editing quiz -> Flush Magento Cache.

Once you have collected multiple submissions from your users, you will be able to see the responses by clicking in QUIZ - > Customer Answers.

You can also import / export Quizzes from one store into another:
