

## CAPTURLY'S MAGENTO MODULE INSTALLATION GUIDE

# How to install Capturly on your Magento-based webshop?

Setting up Capturly for your Magento-based webshop takes only a couple of minutes. In order to get it up and run it, all you have to do is copy the tracking code and follow the steps below.

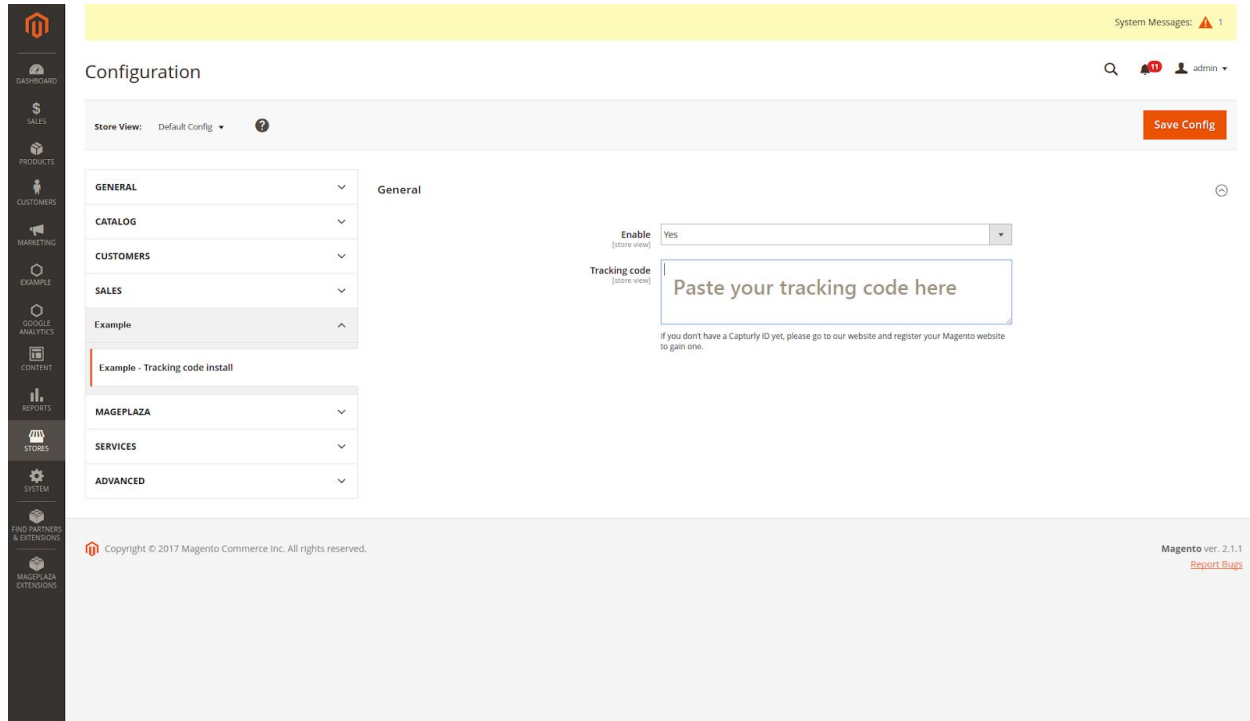

To obtain your tracking code **log in** to your Capturly account, and go to **Website Settings** on your website's dashboard page. **The Capturly tracking code should look like this:**

```
<script>
  function trq(){(trq.q=trq.q||[]).push(arguments);}
  trq('account', 'EXAMPLE');
  var _paq=_paq||[];
  _paq.push(['trackPageView']);
  _paq.push(['enableLinkTracking']);
  (function() {
    var u="//capturly.com/";
    _paq.push(['setTrackerUrl', u+'capturly-track.php']);
    _paq.push(['setSiteId', '986']);
    var d=document, g=d.createElement('script'), s=d.getElementsByTagName('script')[0];
    g.type='text/javascript'; g.async=true; g.defer=true; g.src=u+'capturly-track-js.js';
    s.parentNode.insertBefore(g,s);
  })();
</script>
```

**Note:** The code in the gray box above is for demonstration purposes only. Keep in mind that you will have a unique Capturly ID between the apostrophes instead of *EXAMPLE*.

**STEP 1:** Go to your **admin panel**, then select **STORES** submenu

**STEP 2:** Then under **Configuration** tab, choose your website from the menu

**STEP 3:** Simply paste the tracking code in the empty box on the right

**STEP 4:** Click on **Save Config** in the top-right corner of your screen

That's it, you're good to go. Now you have the opportunity to monitor incoming traffic on your Magento-based webshop and collect valuable, visualized data.

In case you don't have a Capturly account, you can obtain your **FREE** trial after [registering here](#). Start your journey today.
