

# Mobile Email Authenticator User Guide

## **About This Extension:**

Mobile Email Authenticator in onepage checkout provides real-time email verification on the e-mail input field. Help your customers complete and verify their address records, which decreases online form drop off and cart abandonment rates, increases purchase completion and improves the overall customer experience.

The extension is easy to install and use. The customer store pickup Extension is lightweight, completes the task with minimum obstruction.

## **Features:**

- Increases address capture speed by up to 100%
- User friendly, intuitive search functionality
- Fast Implementation
- Improved customer service at checkout
- Requires no manual configuration.
- Easy installation.
- Meets Magento programming guidelines.
- 100% open source.
- Free support.
- Free bug fixes.
- Free updates (within the same major version branch).

## **Installation:**

It is recommended creating a backup of your site before installing any new extension, especially if it is a live site. If you are looking to install extension using a product key, you can install this extension through Magento Connect by going into the marketplace and obtaining your product key.

After purchase you can get the key that you need to insert into your Magento Connect area. Then click Install and then Proceed. Next, continue by visiting System-> Magento connect->Magento connect manager in your admin panel. Login with the same credentials you use to access your admin panel. Magento will show all stages of the process on one screen, and ask you to either enter a license key or upload the extension files. There will be no need to clear cache or create backups- this will be done automatically by Magento connect.

## Settings

Put store on the maintenance mode while installing/upgrading/backup creation

Create Backup
