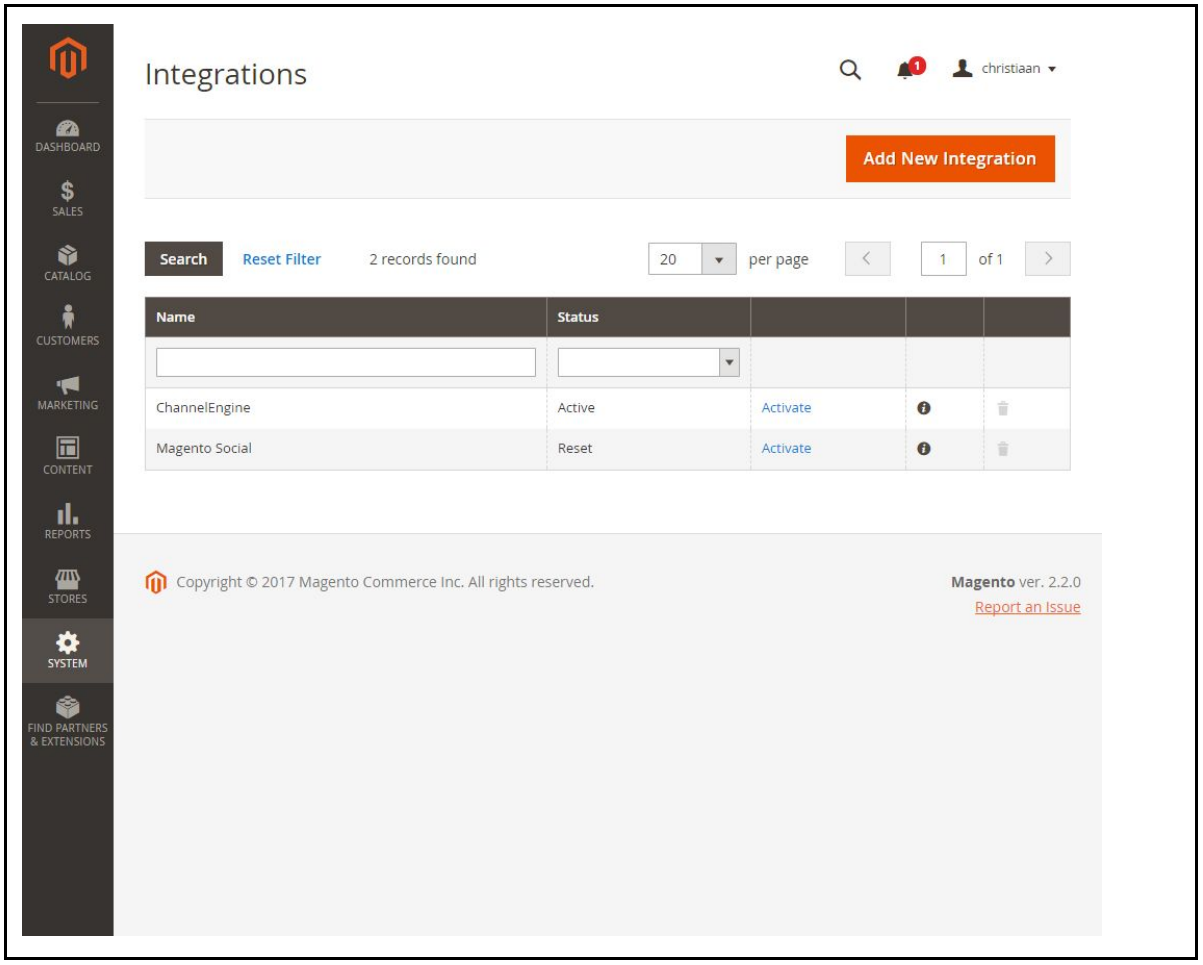
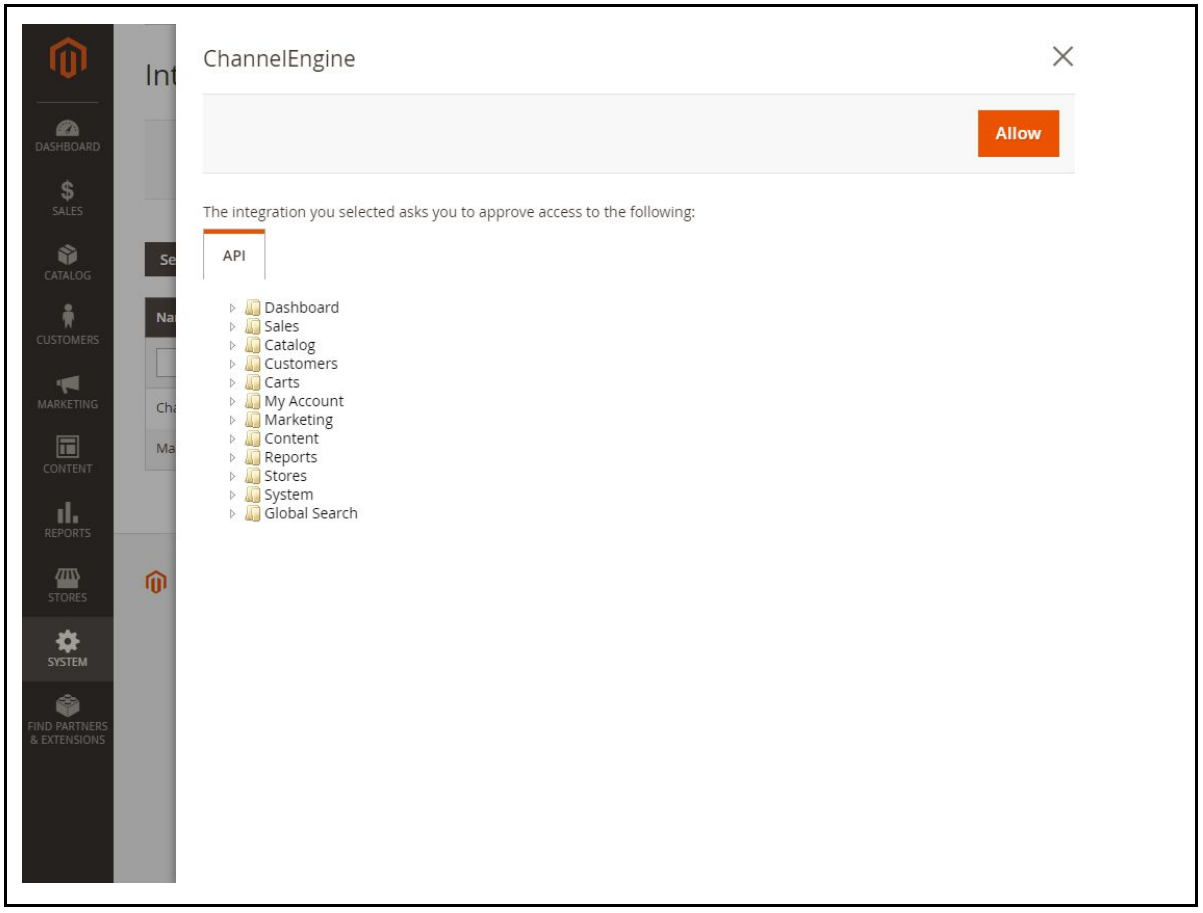
ChannelEngine Magento 2

Our magento 2 module uses the new Magento 2 integrations feature. This will make integrating with ChannelEngine both easy and fast.

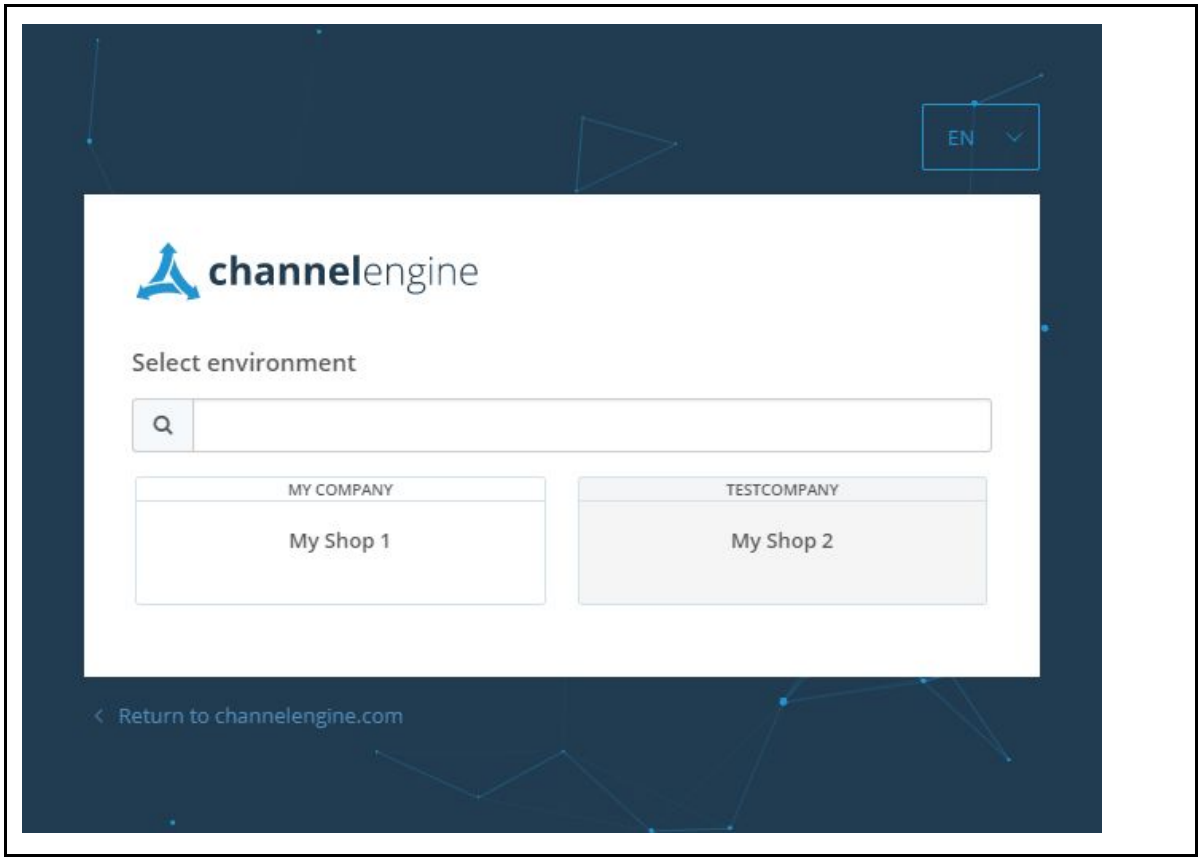
1. Install the extension through composer or the web installer
2. After installing Go to **System > Integrations**, our ChannelEngine integration should be listed there.



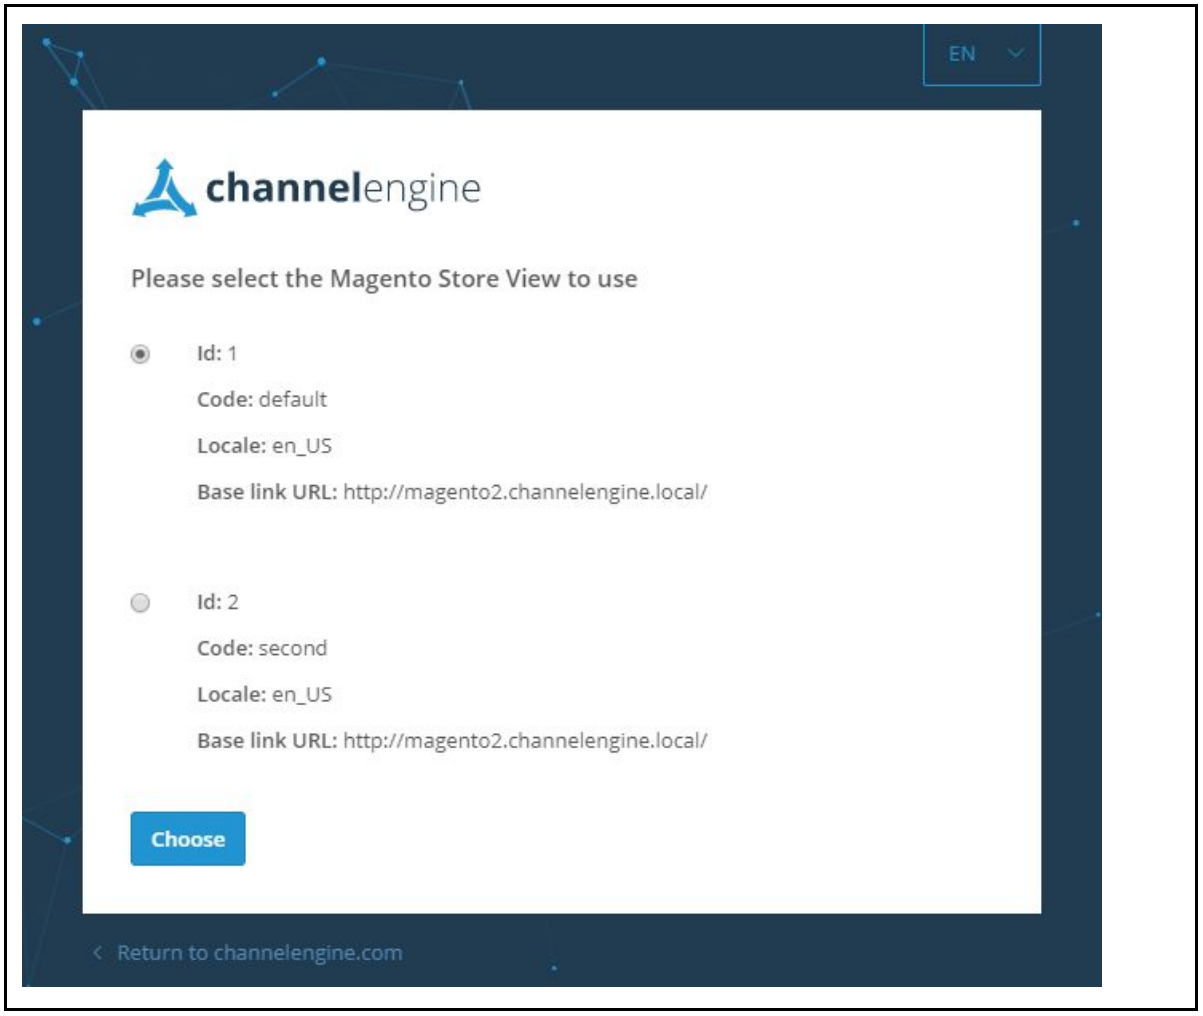
3. Click on **Activate** this will prompt you with the different endpoints that we request to use. In this screen click the orange **Allow** button.



4. A popup will open, if you are not yet logged in to ChannelEngine, this popup will direct you to the ChannelEngine login page. Use your ChannelEngine account to log in.
5. **Optional** In case you have multiple ChannelEngine environments, a screen will be shown to select the ChannelEngine environment that you want to integrate with.



6. **Optional** In case you have multiple store views, a screen will be shown that allows you to select the store view that you want to integrate with.



7. The integration has been completed, please contact us to verify that the integration is working correctly.
