## About

Currently in Magento, when you want to print a product or shopping cart page, you have to press "CTRL + P" key on your keyboard. In product detail page, there is a "Print Product" link but its result is same as pressing "CTRL + P" keys where a new popup window will appear with print options.

While printing product and cart page this way, it will print header information, menu, sidebar, and footer of the page as well.

If you don't want header, menu, sidebar and footer information to be printed then this extension will be helpful to you.

This extension allows you to print product and shopping cart page in a neat and clean format without unnecessary header, menu, sidebar, and footer.

After installing the module, "Print Product" link is added to the product page and "Print Shopping Cart" link is added to cart page.

When you click on the "Print Product" or "Print Shopping Cart" link, a new window will open. That new window contains the clear layout only consisting your shop's logo and address in the header and the necessary body content.

## Features

- Add "Print Product" link in Product detail page
- Clicking "Print Product" link will open a new window with only product information and without unnecessary header, menu, sidebar, and footer. This window also contains a "Print This Page" button which lets you print the page.
- Add "Print Shopping Cart" link in Shopping cart page
- Clicking "Print Shopping Cart" link will open a new window with only shopping cart information and without unnecessary header, menu, sidebar, and footer. This window also contains a "Print This Page" button which lets you print the page.

# Installation

1. The module's files should be placed in Magento root folder.
2. After that, you need to login to your Magento store's admin and refresh Magento cache from menu:

System → Cache Management

3. That's all. The extension is installed now.
